EDMOND CLOUTIER, C.M.G., O.A., D.S.P., Queen's Printer and Controller of Stationery, Ottawa, 1957.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

In October, 1947 the Dominion Bureau of Statistics, in co-operation with the National Council of the Canadian Feed Manufacturers' Association, commenced a survey on a sample basis of Shipments of Prepared Stock and Poultry Feeds, showing export shipments as well as provincial destinations in Canada.

By 1950 the monthly survey on Shipments assumed real value since it formed a basis of comparing current months with corresponding months of the previous year. Because it was still difficult to estimate certain individual commodities reliably, the coverage of the survey was increased to 200 firms in 1951 and became representative of about 76% of the total volume of the industry. This series was presented on an index basis up to the end of 1953.

During 1953 the feeds industry desired volume figures which would reveal the actual disappearance into the hands of ultimate consumers. The result is the current survey which is produced from monthly returns of all primary manufacturers of concentrates together with returns of a sample survey of manufacturers who use raw ingredients in their finished feeds.

The information presented in this report has been arranged as follows:

Table 1 presents the total annual production of Primary and Secondary or complete feeds in Canada for 1955 together with an estimate of production for the calendar year 1956 and as well the production for the current month in 1956 and 1957 with cumulative totals for 1956 and 1957.

Table 2 shows the 1957 shipments of primary or concentrated feeds by principal commodities, provincial destination and export. Column (a) gives the total shipments of all concentrates while column (b) gives the shipments of concentrates moving out of the Industry in their original form. The difference between column (a) and column (b) shows the amount of primary feeds used by the secondary feed manufacturers in producing complete feeds. Factor No. 2, which will convert concentrates to feeds is included respectively in brackets after the title of each concentrate. (See pages 4, 6 and 8). How to use these factors is explained on page 21.

Table 3 shows the volume of monthly shipments of secondary or complete feeds by principal commodities, provincial destination and export. Using conversion factors provided by all firms in the primary survey, the resulting volume of feeds has been added to those totals reported by firms which manufacture finished feeds from raw materials. The volume of feeds, shown in this section, therefore, represents the estimated total feeds shipped by all types of manufacturers including franchise operators and independent manufacturers who purchase concentrates from primary manufacturers. Factor No. 1, which will show the proportion of concentrates moving out of the Industry is shown on page 20.

Table 4 presents the volume of shipments by manufacturers of other types of stock feeds by principal commodities, provincial destination and export. In this section specialized feeds such as dog and cat foods, mineral mixtures, etc., are the result of 100% survey of the producing industry. Other commodities are estimated on a sample basis.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

CLASSIFICATION OF FEEDS

A complete feed is a formulated feed to be fed as is, and may be in the form of mash, pellets, crumbles, cubes, etc. For your assistance in classifying these commodities, the following explanation is offered:

1. Calf concentrates - Any concentrate or making a complete Calf Feed.

2. Dairy and Cattle concentrates - Any concentrate 24% protein or higher for Cattle or Dairy Cows.

3. Swine concentrates - Any concentrate 35% protein or higher for swine.

4. Poultry Concentrates:
   (a) Chick Starter Concentrates - Any concentrate for making a complete Chick Starter.
   (b) Broiler Concentrates - Any concentrate for making a complete Broiler Feed.
   (c) Growing Concentrates - Any concentrate for making a complete feed for growing chickens.
   (d) Laying and Hatching Concentrates - Any concentrate for making a complete feed for laying hens.
   (e) Fattening and Finishing Concentrates - Any concentrate for making a complete fattening feed for fowl other than Broilers or Turkeys.
   (f) Turkey Concentrates - Any concentrate for making a complete turkey feed.
   (g) Other Concentrates - Any concentrate for Poultry not covered by any other classification.

5. Calf feeds - Any complete feed for calves up to 5 months of age.

6. Dairy and Cattle Feeds - Any complete feed under 24% protein for Cattle or Dairy Cows but excluding Calf Feeds.

7. Swine Feeds - Any complete swine feed under 35% protein.

8. Poultry Feeds:
   (a) Chick Starter Feeds - Any complete feed for starting chickens other than Broilers.
   (b) Broiler Feeds - Any complete feed for starting, growing or finishing Broilers.
   (c) Growing Feeds - Any complete feed for growing chickens.
   (d) Laying and Hatching Feeds - Any complete feed for laying hens.
   (e) Fattening and Finishing Feeds - Any complete feed for fattening cockerels, capons or other fowl other than broilers and turkeys and excluding Scratch Grains.
   (f) Turkey Feeds - Any complete feed for starting, growing or finishing turkeys.
   (g) Other Complete Feeds - Any complete feed for pheasants, ducks or other poultry and not covered by any other classification.

11. Dog and Cat Foods:
   (b) Biscuits - Kibble and all baked products.
   (c) Meal - Pellets, cubes and other forms.

12. Scratch Grains - Any mixture of Whole or Cracked Grains only for Poultry.

13. Other Animal Feeds - Such as Horse Feed, Rabbit Feed, etc.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 1 - Production of Prepared Stock and Poultry Feeds in Canada 1955 together with estimated comparable data for 1956. Current monthly production accompanied by cumulative totals for 1956 and 1957 reported in columns (3), (4), (5), and (6) respectively.

In converting concentrates to finished feeds, the Bureau uses the above factors to establish the amount of concentrates which moved into the secondary manufacturing industry, as such. These factors were established from the returns of all firms in the survey and reflect the weighted average above, which we use for a current 12 months reports. If you agree that changes should be made in any of these factors, you should advise us at once whether or not you think the factor is low or high.

From the above, you will notice that 86.8 per cent of the calf concentrates shipped in the province of Ontario in any month during 1954 moved into the hands of franchise operators and other manufacturers who make feeds from concentrates. The balance, or 13.2 per cent, moved out of the industry and was used by farmers and other similar consumers directly.

Factor No. 2, which will turn concentrates into finished feeds, is given on pages 4, 6 and 8 in brackets after the name of each commodity.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

5,155		666		83		637		10,465		1,498		28,768	

HOW TO USE THE CONVERSION FACTORS

You will note on page 4 that the industry reported they had shipped in the province of Quebec for January, 1957 1,399 tons of Dairy and Cattle concentrates, of which 330 tons were used or sold directly for use to the farmer and other such consumers. In other words, 1,069 tons moved into the hands of secondary manufacturers for further use in manufacturing complete feeds. In order to obtain the finished feeds resulting from the conversion of 1,069 tons of Dairy and Cattle concentrates, we make use of the conversion factor as follows:

1,069 x 6.0 = 6,414 tons of Dairy and Cattle Feeds.

Now turn to page 10 and you will see that the shipments of Dairy and Cattle Feeds in the province of Quebec in the same month amounted to 9,236 tons. The summary would appear as follows:

Total shipments =	9,236 tons
Shipments by secondary manufacturers (1) =	6,414 tons
Shipments by manufacturers (2) =	2,822 tons

In order to assess the proportion of total feed shipments, which your firm enjoys, the following instructions are important. In terms of concentrates, the concentrate manufacturer would divide the total Dairy and Cattle feeds shipped in the province of Quebec (9,236 tons) by 6.0 and add 330 tons of concentrates moving out of the industry thus:

$$\frac{9,236}{6.0} = 1,539 + 330 = 1,869 \text{ tons}$$

To the above he would relate his total shipments of Dairy and Cattle concentrates for the province of Quebec during the same period.

In terms of complete feeds, the complete feeds manufacturer (including franchise operators) would assess their share of the market by determining, in the following manner, the total supply of finished feeds:

Total commercial feeds shipped		9,236 tons (see page 10)
Estimated feeds produced from concentrates sold outside the industry from which would be	330 x 6.0 =	1,980 tons (see page 4)
Total supply of finished feeds used as finished feeds or in the form of concentrates		11,216 tons

(1) Includes franchise operators and those secondary manufacturers who use concentrates to manufacture complete feeds.

(2) Includes manufacturers who produce finished feeds directly from raw materials.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

In October, 1947 the Dominion Bureau of Statistics, in co-operation with the National Council of the Canadian Feed Manufacturers' Association, commenced a survey on a sample basis of Shipments of Prepared Stock and Poultry Feeds, showing export shipments as well as provincial destinations in Canada.

By 1950 the monthly survey on Shipments assumed real value since it formed a basis of comparing current months with corresponding months of the previous year. Because it was still difficult to estimate certain individual commodities reliably, the coverage of the survey was increased to 200 firms in 1951 and became representative of about 76% of the total volume of the industry. This series was presented on an index basis up to the end of 1953.

During 1953 the feeds industry desired volume figures which would reveal the actual disappearance into the hands of ultimate consumers. The result is the current survey which is produced from monthly returns of all primary manufacturers of concentrates together with returns of a sample survey of manufacturers who use raw ingredients in their finished feeds.

The information presented in this report has been arranged as follows:

Table 1 presents the total annual production of Primary and Secondary or complete feeds in Canada for 1955 together with an estimate of production for the calendar year 1956 and as well the production for the current month in 1956 and 1957 with cumulative totals for 1956 and 1957.

Table 2 shows the 1957 shipments of primary or concentrated feeds by principal commodities, provincial destination and export. Column (a) gives the total shipments of all concentrates while column (b) gives the shipments of concentrates moving out of the Industry in their original form. The difference between column (a) and column (b) shows the amount of primary feeds used by the secondary feed manufacturers in producing complete feeds. Factor No. 2, which will convert concentrates to feeds is included respectively in brackets after the title of each concentrate. (See pages 4, 6 and 8). How to use these factors is explained on page 21.

Table 3 shows the volume of monthly shipments of secondary or complete feeds by principal commodities, provincial destination and export. Using conversion factors provided by all firms in the primary survey, the resulting volume of feeds has been added to those totals reported by firms which manufacture finished feeds from raw materials. The volume of feeds, shown in this section, therefore, represents the estimated total feeds shipped by all types of manufacturers including franchise operators and independent manufacturers who purchase concentrates from primary manufacturers. Factor No. 1, which will show the proportion of concentrates moving out of the Industry is shown on page 20.

Table 4 presents the volume of shipments by manufacturers of other types of stock feeds by principal commodities, provincial destination and export. In this section specialized feeds such as dog and cat foods, mineral mixtures, etc., are the result of 100% survey of the producing industry. Other commodities are estimated on a sample basis.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

CLASSIFICATION OF FEEDS

A complete feed is a formulated feed to be fed as is, and may be in the form of mash, pellets, crumbles, cubes, etc. For your assistance in classifying these commodities, the following explanation is offered:

1. Calf concentrates - Any concentrate or making a complete Calf Feed.

2. Dairy and Cattle concentrates - Any concentrate 24% protein or higher for Cattle or Dairy Cows.

3. Swine concentrates - Any concentrate 35% protein or higher for swine.

4. Poultry Concentrates:
   (a) Chick Starter Concentrates - Any concentrate for making a complete Chick Starter.
   (b) Broiler Concentrates - Any concentrate for making a complete Broiler Feed.
   (c) Growing Concentrates - Any concentrate for making a complete feed for growing chickens.
   (d) Laying and Hatching Concentrates - Any concentrate for making a complete feed for laying hens.
   (e) Fattening and Finishing Concentrates - Any concentrate for making a complete fattening feed for fowl other than Broilers or Turkeys.
   (f) Turkey Concentrates - Any concentrate for making a complete turkey feed.
   (g) Other Concentrates - Any concentrate for Poultry not covered by any other classification.

5. Calf feeds - Any complete feed for calves up to 5 months of age.

6. Dairy and Cattle Feeds - Any complete feed under 24% protein for Cattle or Dairy Cows but excluding Calf Feeds.

7. Swine Feeds - Any complete swine feed under 35% protein.

8. Poultry Feeds:
   (a) Chick Starter Feeds - Any complete feed for starting chickens other than Broilers.
   (b) Broiler Feeds - Any complete feed for starting, growing or finishing Broilers.
   (c) Growing Feeds - Any complete feed for growing chickens.
   (d) Laying and Hatching Feeds - Any complete feed for laying hens.
   (e) Fattening and Finishing Feeds - Any complete feed for fattening cockerels, capons or other fowl other than broilers and turkeys and excluding Scratch Grains.
   (f) Turkey Feeds - Any complete feed for starting, growing or finishing turkeys.
   (g) Other Complete Feeds - Any complete feed for pheasants, ducks or other poultry and not covered by any other classification.

11. Dog and Cat Foods:
   (b) Biscuits - Kibble and all baked products.
   (c) Meal - Pellets, cubes and other forms.

12. Scratch Grains - Any mixture of Whole or Cracked Grains only for Poultry.

13. Other Animal Feeds - Such as Horse Feed, Rabbit Feed, etc.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 1 - Production of Prepared Stock and Poultry Feeds in Canada 1955 together with estimated comparable data for 1956. Current monthly production accompanied by cumulative totals for 1956 and 1957 reported in columns (3), (4), (5), and (6) respectively.

(b) Broiler Concentrates	0	.607	.877	.019	.999	.968	.485	0	.861	1.000	.500
(c) Growing Concentrates	.500	.692	.674	.544	.797	.726	.217	.182	.260	.297	.712
(d) Laying and Hatching Concentrates	0	.741	.740	.581	.866	.562	.206	.089	.186	.098	.697
(e) Fattening & Finishing Concentrates	0	.882	.231	.412	.923	.673	.129	0	.338	.666	0
(f) Turkey Concentrates	0	1.000	.962	.395	.965	.887	.295	.342	.278	.361	0
(g) Other Poultry Concentrates	0	.246	.116	.596	.258	.429	.019	0	1.000	0	.333

In converting concentrates to finished feeds, the Bureau uses the above factors to establish the amount of concentrates which moved into the secondary manufacturing industry, as such. These factors were established from the returns of all firms in the survey and reflect the weighted average above, which we use for a current 12 months reports. If you agree that changes should be made in any of these factors, you should advise us at once whether or not you think the factor is low or high.

From the above, you will notice that 86.8 per cent of the calf concentrates shipped in the province of Ontario in any month during 1954 moved into the hands of franchise operators and other manufacturers who make feeds from concentrates. The balance, or 13.2 per cent, moved out of the industry and was used by farmers and other similar consumers directly.

Factor No. 2, which will turn concentrates into finished feeds, is given on pages 4, 6 and 8 in brackets after the name of each commodity.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 4 - ALL OTHER ANIMAL FEEDS. Volume of monthly shipments of other prepared stock feeds by principal commodities, provincial destination and export, 1956 - 1957, shown in tons. (Concluded)

5,155		666		83		637		10,465		1,498		28,768	

HOW TO USE THE CONVERSION FACTORS

You will note on page 4 that the industry reported they had shipped in the province of Quebec for January, 1957 1,399 tons of Dairy and Cattle concentrates, of which 330 tons were used or sold directly for use to the farmer and other such consumers. In other words, 1,069 tons moved into the hands of secondary manufacturers for further use in manufacturing complete feeds. In order to obtain the finished feeds resulting from the conversion of 1,069 tons of Dairy and Cattle concentrates, we make use of the conversion factor as follows:

$$1{,}069 \times 6.0 = 6{,}414 \text{ tons of Dairy and Cattle Feeds.}$$

Now turn to page 10 and you will see that the shipments of Dairy and Cattle Feeds in the province of Quebec in the same month amounted to 9,236 tons. The summary would appear as follows:

Total shipments =	9,236 tons
Shipments by secondary manufacturers (1) =	6,414 tons
Shipments by manufacturers (2) =	2,822 tons

In order to assess the proportion of total feed shipments, which your firm enjoys, the following instructions are important. In terms of concentrates, the concentrate manufacturer would divide the total Dairy and Cattle feeds shipped in the province of Quebec (9,236 tons) by 6.0 and add 330 tons of concentrates moving out of the industry thus:

$$\frac{9{,}236}{6.0} = 1{,}539 + 330 = 1{,}869 \text{ tons}$$

To the above he would relate his total shipments of Dairy and Cattle concentrates for the province of Quebec during the same period.

In terms of complete feeds, the complete feeds manufacturer (including franchise operators) would assess their share of the market by determining, in the following manner, the total supply of finished feeds:

Total commercial feeds shipped		9,236 tons (see page 10)
Estimated feeds produced from concentrates sold outside the industry from which would be	330 x 6.0 =	1,980 tons (see page 4)
Total supply of finished feeds used as finished feeds or in the form of concentrates		11,216 tons

(1) Includes franchise operators and those secondary manufacturers who use concentrates to manufacture complete feeds.

(2) Includes manufacturers who produce finished feeds directly from raw materials.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

In October, 1947 the Dominion Bureau of Statistics, in co-operation with the National Council of the Canadian Feed Manufacturers' Association, commenced a survey on a sample basis of Shipments of Prepared Stock and Poultry Feeds, showing export shipments as well as provincial destinations in Canada.

By 1950 the monthly survey on Shipments assumed real value since it formed a basis of comparing current months with corresponding months of the previous year. Because it was still difficult to estimate certain individual commodities reliably, the coverage of the survey was increased to 200 firms in 1951 and became representative of about 76% of the total volume of the industry. This series was presented on an index basis up to the end of 1953.

During 1953 the feeds industry desired volume figures which would reveal the actual disappearance into the hands of ultimate consumers. The result is the current survey which is produced from monthly returns of all primary manufacturers of concentrates together with returns of a sample survey of manufacturers who use raw ingredients in their finished feeds.

The information presented in this report has been arranged as follows:

Table 1 presents the total annual production of Primary and Secondary or complete feeds in Canada for 1955 together with an estimate of production for the calendar year 1956 and as well the production for the current month in 1956 and 1957 with cumulative totals for 1956 and 1957.

Table 2 shows the 1957 shipments of primary or concentrated feeds by principal commodities, provincial destination and export. Column (a) gives the total shipments of all concentrates while column (b) gives the shipments of concentrates moving out of the Industry in their original form. The difference between column (a) and column (b) shows the amount of primary feeds used by the secondary feed manufacturers in producing complete feeds. Factor No. 2, which will convert concentrates to feeds is included respectively in brackets after the title of each concentrate. (See pages 4, 6 and 8). How to use these factors is explained on page 21.

Table 3 shows the volume of monthly shipments of secondary or complete feeds by principal commodities, provincial destination and export. Using conversion factors provided by all firms in the primary survey, the resulting volume of feeds has been added to those totals reported by firms which manufacture finished feeds from raw materials. The volume of feeds, shown in this section, therefore, represents the estimated total feeds shipped by all types of manufacturers including franchise operators and independent manufacturers who purchase concentrates from primary manufacturers. Factor No. 1, which will show the proportion of concentrates moving out of the Industry is shown on page 20.

Table 4 presents the volume of shipments by manufacturers of other types of stock feeds by principal commodities, provincial destination and export. In this section specialized feeds such as dog and cat foods, mineral mixtures, etc., are the result of 100% survey of the producing industry. Other commodities are estimated on a sample basis.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

CLASSIFICATION OF FEEDS

A complete feed is a formulated feed to be fed as is, and may be in the form of mash, pellets, crumbles, cubes, etc. For your assistance in classifying these commodities, the following explanation is offered:

1. Calf concentrates - Any concentrate or making a complete Calf Feed.

2. Dairy and Cattle concentrates - Any concentrate 24% protein or higher for Cattle or Dairy Cows.

3. Swine concentrates - Any concentrate 35% protein or higher for swine.

4. Poultry Concentrates:
   (a) Chick Starter Concentrates - Any concentrate for making a complete Chick Starter.
   (b) Broiler Concentrates - Any concentrate for making a complete Broiler Feed.
   (c) Growing Concentrates - Any concentrate for making a complete feed for growing chickens.
   (d) Laying and Hatching Concentrates - Any concentrate for making a complete feed for laying hens.
   (e) Fattening and Finishing Concentrates - Any concentrate for making a complete fattening feed for fowl other than Broilers or Turkeys.
   (f) Turkey Concentrates - Any concentrate for making a complete turkey feed.
   (g) Other Concentrates - Any concentrate for Poultry not covered by any other classification.

5. Calf feeds - Any complete feed for calves up to 5 months of age.

6. Dairy and Cattle Feeds - Any complete feed under 24% protein for Cattle or Dairy Cows but excluding Calf Feeds.

7. Swine Feeds - Any complete swine feed under 35% protein.

8. Poultry Feeds:
   (a) Chick Starter Feeds - Any complete feed for starting chickens other than Broilers.
   (b) Broiler Feeds - Any complete feed for starting, growing or finishing Broilers.
   (c) Growing Feeds - Any complete feed for growing chickens.
   (d) Laying and Hatching Feeds - Any complete feed for laying hens.
   (e) Fattening and Finishing Feeds - Any complete feed for fattening cockerels, capons or other fowl other than broilers and turkeys and excluding Scratch Grains.
   (f) Turkey Feeds - Any complete feed for starting, growing or finishing turkeys.
   (g) Other Complete Feeds - Any complete feed for pheasants, ducks or other poultry and not covered by any other classification.

11. Dog and Cat Foods:
   (b) Biscuits - Kibble and all baked products.
   (c) Meal - Pellets, cubes and other forms.

12. Scratch Grains - Any mixture of Whole or Cracked Grains only for Poultry.

13. Other Animal Feeds - Such as Horse Feed, Rabbit Feed, etc.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 1 - Production of Prepared Stock and Poultry Feeds in Canada 1955 together with estimated comparable data for 1956. Current monthly production accompanied by cumulative totals for 1956 and 1957 reported in columns (3), (4), (5), and (6) respectively.

FACTORS USED IN DETERMINING QUANTITIES OF CONCENTRATES MOVING INTO SECONDARY INDUSTRY

	Shipped to or sold in									
	Newfound-land	Prince Edward Island	Nova Scotia	New Brunswick	Quebec	Ontario	Manitoba	Saskat-chewan	Alberta	British Columbia	Export
Primary or Concentrated Feeds											
1. Calf Concentrates	0	.914	.769	.538	.849	.868	.809	.750	.707	.666	0
2. Dairy and Cattle Concentrates	1.000	.592	.648	.460	.764	.415	.268	.215	.296	.041	.190
3. Swine Concentrates	.647	.598	.536	.546	.821	.480	.233	.250	.270	.208	.700
4. Poultry Concentrates											
(a) Chick Starter Concentrates	0	1.000	.750	.670	.919	.904	.725	.868	.969	1.000	1.000
(b) Broiler Concentrates	0	.607	.877	.019	.999	.968	.485	0	.861	1.000	.500
(c) Growing Concentrates	.500	.692	.674	.544	.797	.726	.217	.182	.260	.297	.712
(d) Laying and Hatching Concentrates	0	.741	.740	.581	.866	.562	.206	.089	.186	.098	.697
(e) Fattening & Finishing Concentrates	0	.882	.231	.412	.923	.673	.129	0	.338	.666	0
(f) Turkey Concentrates	0	1.000	.962	.395	.965	.887	.295	.342	.278	.361	0
(g) Other Poultry Concentrates	0	.246	.116	.596	.258	.429	.019	0	1.000	0	.333

In converting concentrates to finished feeds, the Bureau uses the above factors to establish the amount of concentrates which moved into the secondary manufacturing industry, as such. These factors were established from the returns of all firms in the survey and reflect the weighted average above, which we use for a current 12 months reports. If you agree that changes should be made in any of these factors, you should advise us at once whether or not you think the factor is low or high.

From the above, you will notice that 86.8 per cent of the calf concentrates shipped in the province of Ontario in any month during 1954 moved into the hands of franchise operators and other manufacturers who make feeds from concentrates. The balance, or 13.2 per cent, moved out of the industry and was used by farmers and other similar consumers directly.

Factor No. 2, which will turn concentrates into finished feeds, is given on pages 4, 6 and 8 in brackets after the name of each commodity.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

HOW TO USE THE CONVERSION FACTORS

You will note on page 4 that the industry reported they had shipped in the province of Quebec for January, 1957 1,399 tons of Dairy and Cattle concentrates, of which 330 tons were used or sold directly for use to the farmer and other such consumers. In other words, 1,069 tons moved into the hands of secondary manufacturers for further use in manufacturing complete feeds. In order to obtain the finished feeds resulting from the conversion of 1,069 tons of Dairy and Cattle concentrates, we make use of the conversion factor as follows:

1,069 x 6.0 = 6,414 tons of Dairy and Cattle Feeds.

Now turn to page 10 and you will see that the shipments of Dairy and Cattle Feeds in the province of Quebec in the same month amounted to 9,236 tons. The summary would appear as follows:

Total shipments =	9,236 tons
Shipments by secondary manufacturers (1) =	6,414 tons
Shipments by manufacturers (2) =	2,822 tons

In order to assess the proportion of total feed shipments, which your firm enjoys, the following instructions are important. In terms of concentrates, the concentrate manufacturer would divide the total Dairy and Cattle feeds shipped in the province of Quebec (9,236 tons) by 6.0 and add 330 tons of concentrates moving out of the industry thus:

$$\frac{9,236}{6.0} = 1,539 + 330 = 1,869 \text{ tons}$$

To the above he would relate his total shipments of Dairy and Cattle concentrates for the province of Quebec during the same period.

In terms of complete feeds, the complete feeds manufacturer (including franchise operators) would assess their share of the market by determining, in the following manner, the total supply of finished feeds:

Total commercial feeds shipped		9,236 tons (see page 10)
Estimated feeds produced from concentrates sold outside the industry from which would be	330 x 6.0 =	1,980 tons (see page 4)
Total supply of finished feeds used as finished feeds or in the form of concentrates		11,216 tons

(1) Includes franchise operators and those secondary manufacturers who use concentrates to manufacture complete feeds.

(2) Includes manufacturers who produce finished feeds directly from raw materials.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

In October, 1947 the Dominion Bureau of Statistics, in co-operation with the National Council of the Canadian Feed Manufacturers' Association, commenced a survey on a sample basis of Shipments of Prepared Stock and Poultry Feeds, showing export shipments as well as provincial destinations in Canada.

By 1950 the monthly survey on Shipments assumed real value since it formed a basis of comparing current months with corresponding months of the previous year. Because it was still difficult to estimate certain individual commodities reliably, the coverage of the survey was increased to 200 firms in 1951 and became representative of about 76% of the total volume of the industry. This series was presented on an index basis up to the end of 1953.

During 1953 the feeds industry desired volume figures which would reveal the actual disappearance into the hands of ultimate consumers. The result is the current survey which is produced from monthly returns of all primary manufacturers of concentrates together with returns of a sample survey of manufacturers who use raw ingredients in their finished feeds.

The information presented in this report has been arranged as follows:

Table 1 presents the total annual production of Primary and Secondary or complete feeds in Canada for 1955 together with an estimate of production for the calendar year 1956 and as well the production for the current month in 1956 and 1957 with cumulative totals for 1956 and 1957.

Table 2 shows the 1957 shipments of primary or concentrated feeds by principal commodities, provincial destination and export. Column (a) gives the total shipments of all concentrates while column (b) gives the shipments of concentrates moving out of the Industry in their original form. The difference between column (a) and column (b) shows the amount of primary feeds used by the secondary feed manufacturers in producing complete feeds. Factor No. 2, which will convert concentrates to feeds is included respectively in brackets after the title of each concentrate. (See pages 4, 6 and 8). How to use these factors is explained on page 21.

Table 3 shows the volume of monthly shipments of secondary or complete feeds by principal commodities, provincial destination and export. Using conversion factors provided by all firms in the primary survey, the resulting volume of feeds has been added to those totals reported by firms which manufacture finished feeds from raw materials. The volume of feeds, shown in this section, therefore, represents the estimated total feeds shipped by all types of manufacturers including franchise operators and independent manufacturers who purchase concentrates from primary manufacturers. Factor No. 1, which will show the proportion of concentrates moving out of the Industry is shown on page 20.

Table 4 presents the volume of shipments by manufacturers of other types of stock feeds by principal commodities, provincial destination and export. In this section specialized feeds such as dog and cat foods, mineral mixtures, etc., are the result of 100% survey of the producing industry. Other commodities are estimated on a sample basis.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

CLASSIFICATION OF FEEDS

A complete feed is a formulated feed to be fed as is, and may be in the form of mash, pellets, crumbles, cubes, etc. For your assistance in classifying these commodities, the following explanation is offered:

1. Calf concentrates - Any concentrate or making a complete Calf Feed.

2. Dairy and Cattle concentrates - Any concentrate 24% protein or higher for Cattle or Dairy Cows.

3. Swine concentrates - Any concentrate 35% protein or higher for swine.

4. Poultry Concentrates:
   (a) Chick Starter Concentrates - Any concentrate for making a complete Chick Starter.
   (b) Broiler Concentrates - Any concentrate for making a complete Broiler Feed.
   (c) Growing Concentrates - Any concentrate for making a complete feed for growing chickens.
   (d) Laying and Hatching Concentrates - Any concentrate for making a complete feed for laying hens.
   (e) Fattening and Finishing Concentrates - Any concentrate for making a complete fattening feed for fowl other than Broilers or Turkeys.
   (f) Turkey Concentrates - Any concentrate for making a complete turkey feed.
   (g) Other Concentrates - Any concentrate for Poultry not covered by any other classification.

5. Calf feeds - Any complete feed for calves up to 5 months of age.

6. Dairy and Cattle Feeds - Any complete feed under 24% protein for Cattle or Dairy Cows but excluding Calf Feeds.

7. Swine Feeds - Any complete swine feed under 35% protein.

8. Poultry Feeds:
   (a) Chick Starter Feeds - Any complete feed for starting chickens other than Broilers.
   (b) Broiler Feeds - Any complete feed for starting, growing or finishing Broilers.
   (c) Growing Feeds - Any complete feed for growing chickens.
   (d) Laying and Hatching Feeds - Any complete feed for laying hens.
   (e) Fattening and Finishing Feeds - Any complete feed for fattening cockerels, capons or other fowl other than broilers and turkeys and excluding Scratch Grains.
   (f) Turkey Feeds - Any complete feed for starting, growing or finishing turkeys.
   (g) Other Complete Feeds - Any complete feed for pheasants, ducks or other poultry and not covered by any other classification.

11. Dog and Cat Foods:
   (b) Biscuits - Kibble and all baked products.
   (c) Meal - Pellets, cubes and other forms.

12. Scratch Grains - Any mixture of Whole or Cracked Grains only for Poultry.

13. Other Animal Feeds - Such as Horse Feed, Rabbit Feed, etc.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 1 - Production of Prepared Stock and Poultry Feeds in Canada 1955 together with estimated comparable data for 1956. Current monthly production accompanied by cumulative totals for 1956 and 1957 reported in columns (3), (4), (5), and (6) respectively.

(e) Fattening & Finishing Concentrates	0	.882	.231	.412	.923	.673	.129	0	.338	.666	0
(f) Turkey Concentrates	0	1.000	.962	.395	.965	.887	.295	.342	.278	.361	0
(g) Other Poultry Concentrates	0	.246	.116	.596	.258	.429	.019	0	1.000	0	.333

In converting concentrates to finished feeds, the Bureau uses the above factors to establish the amount of concentrates which moved into the secondary manufacturing industry, as such. These factors were established from the returns of all firms in the survey and reflect the weighted average above, which we use for a current 12 months reports. If you agree that changes should be made in any of these factors, you should advise us at once whether or not you think the factor is low or high.

From the above, you will notice that 86.8 per cent of the calf concentrates shipped in the province of Ontario in any month during 1954 moved into the hands of franchise operators and other manufacturers who make feeds from concentrates. The balance, or 13.2 per cent, moved out of the industry and was used by farmers and other similar consumers directly.

Factor No. 2, which will turn concentrates into finished feeds, is given on pages 4, 6 and 8 in brackets after the name of each commodity.

HOW TO USE THE CONVERSION FACTORS

You will note on page 4 that the industry reported they had shipped in the province of Quebec for January, 1957 1,399 tons of Dairy and Cattle concentrates, of which 330 tons were used or sold directly for use to the farmer and other such consumers. In other words, 1,069 tons moved into the hands of secondary manufacturers for further use in manufacturing complete feeds. In order to obtain the finished feeds resulting from the conversion of 1,069 tons of Dairy and Cattle concentrates, we make use of the conversion factor as follows:

1,069 x 6.0 = 6,414 tons of Dairy and Cattle Feeds.

Now turn to page 10 and you will see that the shipments of Dairy and Cattle Feeds in the province of Quebec in the same month amounted to 9,236 tons. The summary would appear as follows:

Total shipments =	9,236 tons
Shipments by secondary manufacturers (1) =	6,414 tons
Shipments by manufacturers (2) =	2,822 tons

In order to assess the proportion of total feed shipments, which your firm enjoys, the following instructions are important. In terms of concentrates, the concentrate manufacturer would divide the total Dairy and Cattle feeds shipped in the province of Quebec (9,236 tons) by 6.0 and add 330 tons of concentrates moving out of the industry thus:

$$\frac{9,236}{6.0} = 1,539 + 330 = 1,869 \text{ tons}$$

To the above he would relate his total shipments of Dairy and Cattle concentrates for the province of Quebec during the same period.

In terms of complete feeds, the complete feeds manufacturer (including franchise operators) would assess their share of the market by determining, in the following manner, the total supply of finished feeds:

Total commercial feeds shipped		9,236 tons (see page 10)
Estimated feeds produced from concentrates sold outside the industry from which would be	330 x 6.0 =	1,980 tons (see page 4)
Total supply of finished feeds used as finished feeds or in the form of concentrates		11,216 tons

(1) Includes franchise operators and those secondary manufacturers who use concentrates to manufacture complete feeds.

(2) Includes manufacturers who produce finished feeds directly from raw materials.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

In October, 1947 the Dominion Bureau of Statistics, in co-operation with the National Council of the Canadian Feed Manufacturers' Association, commenced a survey on a sample basis of Shipments of Prepared Stock and Poultry Feeds, showing export shipments as well as provincial destinations in Canada.

By 1950 the monthly survey on Shipments assumed real value since it formed a basis of comparing current months with corresponding months of the previous year. Because it was still difficult to estimate certain individual commodities reliably, the coverage of the survey was increased to 200 firms in 1951 and became representative of about 76% of the total volume of the industry. This series was presented on an index basis up to the end of 1953.

During 1953 the feeds industry desired volume figures which would reveal the actual disappearance into the hands of ultimate consumers. The result is the current survey which is produced from monthly returns of all primary manufacturers of concentrates together with returns of a sample survey of manufacturers who use raw ingredients in their finished feeds.

The information presented in this report has been arranged as follows:

Table 1 presents the total annual production of Primary and Secondary or complete feeds in Canada for 1955 together with an estimate of production for the calendar year 1956 and as well the production for the current month in 1956 and 1957 with cumulative totals for 1956 and 1957.

Table 2 shows the 1957 shipments of primary or concentrated feeds by principal commodities, provincial destination and export. Column (a) gives the total shipments of all concentrates while column (b) gives the shipments of concentrates moving out of the Industry in their original form. The difference between column (a) and column (b) shows the amount of primary feeds used by the secondary feed manufacturers in producing complete feeds. Factor No. 2, which will convert concentrates to feeds is included respectively in brackets after the title of each concentrate. (See pages 4, 6 and 8). How to use these factors is explained on page 21.

Table 3 shows the volume of monthly shipments of secondary or complete feeds by principal commodities, provincial destination and export. Using conversion factors provided by all firms in the primary survey, the resulting volume of feeds has been added to those totals reported by firms which manufacture finished feeds from raw materials. The volume of feeds, shown in this section, therefore, represents the estimated total feeds shipped by all types of manufacturers including franchise operators and independent manufacturers who purchase concentrates from primary manufacturers. Factor No. 1, which will show the proportion of concentrates moving out of the Industry is shown on page 20.

Table 4 presents the volume of shipments by manufacturers of other types of stock feeds by principal commodities, provincial destination and export. In this section specialized feeds such as dog and cat foods, mineral mixtures, etc., are the result of 100% survey of the producing industry. Other commodities are estimated on a sample basis.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

CLASSIFICATION OF FEEDS

A complete feed is a formulated feed to be fed as is, and may be in the form of mash, pellets, crumbles, cubes, etc. For your assistance in classifying these commodities, the following explanation is offered:

1. Calf concentrates - Any concentrate or making a complete Calf Feed.

2. Dairy and Cattle concentrates - Any concentrate 24% protein or higher for Cattle or Dairy Cows.

3. Swine concentrates - Any concentrate 35% protein or higher for swine.

4. Poultry Concentrates:
   (a) Chick Starter Concentrates - Any concentrate for making a complete Chick Starter.
   (b) Broiler Concentrates - Any concentrate for making a complete Broiler Feed.
   (c) Growing Concentrates - Any concentrate for making a complete feed for growing chickens.
   (d) Laying and Hatching Concentrates - Any concentrate for making a complete feed for laying hens.
   (e) Fattening and Finishing Concentrates - Any concentrate for making a complete fattening feed for fowl other than Broilers or Turkeys.
   (f) Turkey Concentrates - Any concentrate for making a complete turkey feed.
   (g) Other Concentrates - Any concentrate for Poultry not covered by any other classification.

5. Calf feeds - Any complete feed for calves up to 5 months of age.

6. Dairy and Cattle Feeds - Any complete feed under 24% protein for Cattle or Dairy Cows but excluding Calf Feeds.

7. Swine Feeds - Any complete swine feed under 35% protein.

8. Poultry Feeds:
   (a) Chick Starter Feeds - Any complete feed for starting chickens other than Broilers.
   (b) Broiler Feeds - Any complete feed for starting, growing or finishing Broilers.
   (c) Growing Feeds - Any complete feed for growing chickens.
   (d) Laying and Hatching Feeds - Any complete feed for laying hens.
   (e) Fattening and Finishing Feeds - Any complete feed for fattening cockerels, capons or other fowl other than broilers and turkeys and excluding Scratch Grains.
   (f) Turkey Feeds - Any complete feed for starting, growing or finishing turkeys.
   (g) Other Complete Feeds - Any complete feed for pheasants, ducks or other poultry and not covered by any other classification.

11. Dog and Cat Foods:
   (b) Biscuits - Kibble and all baked products.
   (c) Meal - Pellets, cubes and other forms.

12. Scratch Grains - Any mixture of Whole or Cracked Grains only for Poultry.

13. Other Animal Feeds - Such as Horse Feed, Rabbit Feed, etc.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 1 - Production of Prepared Stock and Poultry Feeds in Canada 1955 together with estimated comparable data for 1956. Current monthly production accompanied by cumulative totals for 1956 and 1957 reported in columns (3), (4), (5), and (6) respectively.

FACTORS USED IN DETERMINING QUANTITIES OF CONCENTRATES MOVING INTO SECONDARY INDUSTRY

	Shipped to or sold in									
	Newfound-land	Prince Edward Island	Nova Scotia	New Brunswick	Quebec	Ontario	Manitoba	Saskat-chewan	Alberta	British Columbia	Export
Primary or Concentrated Feeds											
1. Calf Concentrates	0	.914	.769	.538	.849	.868	.809	.750	.707	.666	0
2. Dairy and Cattle Concentrates	1.000	.592	.648	.460	.764	.415	.268	.215	.296	.041	.190
3. Swine Concentrates	.647	.598	.536	.546	.821	.480	.233	.250	.270	.208	.700
4. Poultry Concentrates											
(a) Chick Starter Concentrates	0	1.000	.750	.670	.919	.904	.725	.868	.969	1.000	1.000
(b) Broiler Concentrates	0	.607	.877	.019	.999	.968	.485	0	.861	1.000	.500
(c) Growing Concentrates	.500	.692	.674	.544	.797	.726	.217	.182	.260	.297	.712
(d) Laying and Hatching Concentrates	0	.741	.740	.581	.866	.562	.206	.089	.186	.098	.697
(e) Fattening & Finishing Concentrates	0	.882	.231	.412	.923	.673	.129	0	.338	.666	0
(f) Turkey Concentrates	0	1.000	.962	.395	.965	.887	.295	.342	.278	.361	0
(g) Other Poultry Concentrates	0	.246	.116	.596	.258	.429	.019	0	1.000	0	.333

In converting concentrates to finished feeds, the Bureau uses the above factors to establish the amount of concentrates which moved into the secondary manufacturing industry, as such. These factors were established from the returns of all firms in the survey and reflect the weighted average above, which we use for a current 12 months reports. If you agree that changes should be made in any of these factors, you should advise us at once whether or not you think the factor is low or high.

From the above, you will notice that 86.8 per cent of the calf concentrates shipped in the province of Ontario in any month during 1954 moved into the hands of franchise operators and other manufacturers who make feeds from concentrates. The balance, or 13.2 per cent, moved out of the industry and was used by farmers and other similar consumers directly.

Factor No. 2, which will turn concentrates into finished feeds, is given on pages 4, 6 and 8 in brackets after the name of each commodity.

HOW TO USE THE CONVERSION FACTORS

You will note on page 4 that the industry reported they had shipped in the province of Quebec for January, 1957 1,399 tons of Dairy and Cattle concentrates, of which 330 tons were used or sold directly for use to the farmer and other such consumers. In other words, 1,069 tons moved into the hands of secondary manufacturers for further use in manufacturing complete feeds. In order to obtain the finished feeds resulting from the conversion of 1,069 tons of Dairy and Cattle concentrates, we make use of the conversion factor as follows:

1,069 x 6.0 = 6,414 tons of Dairy and Cattle Feeds.

Now turn to page 10 and you will see that the shipments of Dairy and Cattle Feeds in the province of Quebec in the same month amounted to 9,236 tons. The summary would appear as follows:

Total shipments =	9,236 tons
Shipments by secondary manufacturers (1) =	6,414 tons
Shipments by manufacturers (2) =	2,822 tons

In order to assess the proportion of total feed shipments, which your firm enjoys, the following instructions are important. In terms of concentrates, the concentrate manufacturer would divide the total Dairy and Cattle feeds shipped in the province of Quebec (9,236 tons) by 6.0 and add 330 tons of concentrates moving out of the industry thus:

$$\frac{9,236}{6.0} = 1,539 + 330 = 1,869 \text{ tons}$$

To the above he would relate his total shipments of Dairy and Cattle concentrates for the province of Quebec during the same period.

In terms of complete feeds, the complete feeds manufacturer (including franchise operators) would assess their share of the market by determining, in the following manner, the total supply of finished feeds:

Total commercial feeds shipped		9,236 tons (see page 10)
Estimated feeds produced from concentrates sold outside the industry from which would be	330 x 6.0 =	1,980 tons (see page 4)
Total supply of finished feeds used as finished feeds or in the form of concentrates		11,216 tons

(1) Includes franchise operators and those secondary manufacturers who use concentrates to manufacture complete feeds.

(2) Includes manufacturers who produce finished feeds directly from raw materials.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

In October, 1947 the Dominion Bureau of Statistics, in co-operation with the National Council of the Canadian Feed Manufacturers' Association, commenced a survey on a sample basis of Shipments of Prepared Stock and Poultry Feeds, showing export shipments as well as provincial destinations in Canada.

By 1950 the monthly survey on Shipments assumed real value since it formed a basis of comparing current months with corresponding months of the previous year. Because it was still difficult to estimate certain individual commodities reliably, the coverage of the survey was increased to 200 firms in 1951 and became representative of about 76% of the total volume of the industry. This series was presented on an index basis up to the end of 1953.

During 1953 the feeds industry desired volume figures which would reveal the actual disappearance into the hands of ultimate consumers. The result is the current survey which is produced from monthly returns of all primary manufacturers of concentrates together with returns of a sample survey of manufacturers who use raw ingredients in their finished feeds.

The information presented in this report has been arranged as follows:

Table 1 presents the total annual production of Primary and Secondary or complete feeds in Canada for 1955 together with an estimate of production for the calendar year 1956 and as well the production for the current month in 1956 and 1957 with cumulative totals for 1956 and 1957.

Table 2 shows the 1957 shipments of primary or concentrated feeds by principal commodities, provincial destination and export. Column (a) gives the total shipments of all concentrates while column (b) gives the shipments of concentrates moving out of the Industry in their original form. The difference between column (a) and column (b) shows the amount of primary feeds used by the secondary feed manufacturers in producing complete feeds. Factor No. 2, which will convert concentrates to feeds is included respectively in brackets after the title of each concentrate. (See pages 4, 6 and 8). How to use these factors is explained on page 21.

Table 3 shows the volume of monthly shipments of secondary or complete feeds by principal commodities, provincial destination and export. Using conversion factors provided by all firms in the primary survey, the resulting volume of feeds has been added to those totals reported by firms which manufacture finished feeds from raw materials. The volume of feeds, shown in this section, therefore, represents the estimated total feeds shipped by all types of manufacturers including franchise operators and independent manufacturers who purchase concentrates from primary manufacturers. Factor No. 1, which will show the proportion of concentrates moving out of the Industry is shown on page 20.

Table 4 presents the volume of shipments by manufacturers of other types of stock feeds by principal commodities, provincial destination and export. In this section specialized feeds such as dog and cat foods, mineral mixtures, etc., are the result of 100% survey of the producing industry. Other commodities are estimated on a sample basis.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

CLASSIFICATION OF FEEDS

A complete feed is a formulated feed to be fed as is, and may be in the form of mash, pellets, crumbles, cubes, etc. For your assistance in classifying these commodities, the following explanation is offered:

1. Calf concentrates - Any concentrate or making a complete Calf Feed.

2. Dairy and Cattle concentrates - Any concentrate 24% protein or higher for Cattle or Dairy Cows.

3. Swine concentrates - Any concentrate 35% protein or higher for swine.

4. Poultry Concentrates:
   (a) Chick Starter Concentrates - Any concentrate for making a complete Chick Starter.
   (b) Broiler Concentrates - Any concentrate for making a complete Broiler Feed.
   (c) Growing Concentrates - Any concentrate for making a complete feed for growing chickens.
   (d) Laying and Hatching Concentrates - Any concentrate for making a complete feed for laying hens.
   (e) Fattening and Finishing Concentrates - Any concentrate for making a complete fattening feed for fowl other than Broilers or Turkeys.
   (f) Turkey Concentrates - Any concentrate for making a complete turkey feed.
   (g) Other Concentrates - Any concentrate for Poultry not covered by any other classification.

5. Calf feeds - Any complete feed for calves up to 5 months of age.

6. Dairy and Cattle Feeds - Any complete feed under 24% protein for Cattle or Dairy Cows but excluding Calf Feeds.

7. Swine Feeds - Any complete swine feed under 35% protein.

8. Poultry Feeds:
   (a) Chick Starter Feeds - Any complete feed for starting chickens other than Broilers.
   (b) Broiler Feeds - Any complete feed for starting, growing or finishing Broilers.
   (c) Growing Feeds - Any complete feed for growing chickens.
   (d) Laying and Hatching Feeds - Any complete feed for laying hens.
   (e) Fattening and Finishing Feeds - Any complete feed for fattening cockerels, capons or other fowl other than broilers and turkeys and excluding Scratch Grains.
   (f) Turkey Feeds - Any complete feed for starting, growing or finishing turkeys.
   (g) Other Complete Feeds - Any complete feed for pheasants, ducks or other poultry and not covered by any other classification.

11. Dog and Cat Foods:
   (b) Biscuits - Kibble and all baked products.
   (c) Meal - Pellets, cubes and other forms.

12. Scratch Grains - Any mixture of Whole or Cracked Grains only for Poultry.

13. Other Animal Feeds - Such as Horse Feed, Rabbit Feed, etc.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 1 - Production of Prepared Stock and Poultry Feeds in Canada 1955 together with estimated comparable data for 1956. Current monthly production accompanied by cumulative totals for 1956 and 1957 reported in columns (3), (4), (5), and (6) respectively.

FACTORS USED IN DETERMINING QUANTITIES OF CONCENTRATES MOVING INTO SECONDARY INDUSTRY

	Shipped to or sold in										
	Newfound-land	Prince Edward Island	Nova Scotia	New Brunswick	Quebec	Ontario	Manitoba	Saskat-chewan	Alberta	British Columbia	Export
Primary or Concentrated Feeds											
1. Calf Concentrates	0	.914	.769	.538	.849	.868	.809	.750	.707	.666	0
2. Dairy and Cattle Concentrates	1.000	.592	.648	.460	.764	.415	.268	.215	.296	.041	.190
3. Swine Concentrates	.647	.598	.536	.546	.821	.480	.233	.250	.270	.208	.700
4. Poultry Concentrates											
(a) Chick Starter Concentrates	0	1.000	.750	.670	.919	.904	.725	.868	.969	1.000	1.000
(b) Broiler Concentrates	0	.607	.877	.019	.999	.968	.485	0	.861	1.000	.500
(c) Growing Concentrates	.500	.692	.674	.544	.797	.726	.217	.182	.260	.297	.712
(d) Laying and Hatching Concentrates	0	.741	.740	.581	.866	.562	.206	.089	.186	.098	.697
(e) Fattening & Finishing Concentrates	0	.882	.231	.412	.923	.673	.129	0	.338	.666	0
(f) Turkey Concentrates	0	1.000	.962	.395	.965	.887	.295	.342	.278	.361	0
(g) Other Poultry Concentrates	0	.246	.116	.596	.258	.429	.019	0	1.000	0	.333

In converting concentrates to finished feeds, the Bureau uses the above factors to establish the amount of concentrates which moved into the secondary manufacturing industry, as such. These factors were established from the returns of all firms in the survey and reflect the weighted average above, which we use for a current 12 months reports. If you agree that changes should be made in any of these factors, you should advise us at once whether or not you think the factor is low or high.

From the above, you will notice that 86.8 per cent of the calf concentrates shipped in the province of Ontario in any month during 1954 moved into the hands of franchise operators and other manufacturers who make feeds from concentrates. The balance, or 13.2 per cent, moved out of the industry and was used by farmers and other similar consumers directly.

Factor No. 2, which will turn concentrates into finished feeds, is given on pages 4, 6 and 8 in brackets after the name of each commodity.

HOW TO USE THE CONVERSION FACTORS

You will note on page 4 that the industry reported they had shipped in the province of Quebec for January, 1957 1,399 tons of Dairy and Cattle concentrates, of which 330 tons were used or sold directly for use to the farmer and other such consumers. In other words, 1,069 tons moved into the hands of secondary manufacturers for further use in manufacturing complete feeds. In order to obtain the finished feeds resulting from the conversion of 1,069 tons of Dairy and Cattle concentrates, we make use of the conversion factor as follows:

1,069 x 6.0 = 6,414 tons of Dairy and Cattle Feeds.

Now turn to page 10 and you will see that the shipments of Dairy and Cattle Feeds in the province of Quebec in the same month amounted to 9,236 tons. The summary would appear as follows:

Total shipments =	9,236 tons
Shipments by secondary manufacturers (1) =	6,414 tons
Shipments by manufacturers (2) =	2,822 tons

In order to assess the proportion of total feed shipments, which your firm enjoys, the following instructions are important. In terms of concentrates, the concentrate manufacturer would divide the total Dairy and Cattle feeds shipped in the province of Quebec (9,236 tons) by 6.0 and add 330 tons of concentrates moving out of the industry thus:

$$\frac{9,236}{6.0} = 1,539 + 330 = 1,869 \text{ tons}$$

To the above he would relate his total shipments of Dairy and Cattle concentrates for the province of Quebec during the same period.

In terms of complete feeds, the complete feeds manufacturer (including franchise operators) would assess their share of the market by determining, in the following manner, the total supply of finished feeds:

Total commercial feeds shipped		9,236 tons (see page 10)
Estimated feeds produced from concentrates sold outside the industry from which would be	330 x 6.0 =	1,980 tons (see page 4)
Total supply of finished feeds used as finished feeds or in the form of concentrates		11,216 tons

(1) Includes franchise operators and those secondary manufacturers who use concentrates to manufacture complete feeds.

(2) Includes manufacturers who produce finished feeds directly from raw materials.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

In October, 1947 the Dominion Bureau of Statistics, in co-operation with the National Council of the Canadian Feed Manufacturers' Association, commenced a survey on a sample basis of Shipments of Prepared Stock and Poultry Feeds, showing export shipments as well as provincial destinations in Canada.

By 1950 the monthly survey on Shipments assumed real value since it formed a basis of comparing current months with corresponding months of the previous year. Because it was still difficult to estimate certain individual commodities reliably, the coverage of the survey was increased to 200 firms in 1951 and became representative of about 76% of the total volume of the industry. This series was presented on an index basis up to the end of 1953.

During 1953 the feeds industry desired volume figures which would reveal the actual disappearance into the hands of ultimate consumers. The result is the current survey which is produced from monthly returns of all primary manufacturers of concentrates together with returns of a sample survey of manufacturers who use raw ingredients in their finished feeds.

The information presented in this report has been arranged as follows:

Table 1 presents the total annual production of Primary and Secondary or complete feeds in Canada for 1955 together with an estimate of production for the calendar year 1956 and as well the production for the current month in 1956 and 1957 with cumulative totals for 1956 and 1957.

Table 2 shows the 1957 shipments of primary or concentrated feeds by principal commodities, provincial destination and export. Column (a) gives the total shipments of all concentrates while column (b) gives the shipments of concentrates moving out of the Industry in their original form. The difference between column (a) and column (b) shows the amount of primary feeds used by the secondary feed manufacturers in producing complete feeds. Factor No. 2, which will convert concentrates to feeds is included respectively in brackets after the title of each concentrate. (See pages 4, 6 and 8). How to use these factors is explained on page 21.

Table 3 shows the volume of monthly shipments of secondary or complete feeds by principal commodities, provincial destination and export. Using conversion factors provided by all firms in the primary survey, the resulting volume of feeds has been added to those totals reported by firms which manufacture finished feeds from raw materials. The volume of feeds, shown in this section, therefore, represents the estimated total feeds shipped by all types of manufacturers including franchise operators and independent manufacturers who purchase concentrates from primary manufacturers. Factor No. 1, which will show the proportion of concentrates moving out of the Industry is shown on page 20.

Table 4 presents the volume of shipments by manufacturers of other types of stock feeds by principal commodities, provincial destination and export. In this section specialized feeds such as dog and cat foods, mineral mixtures, etc., are the result of 100% survey of the producing industry. Other commodities are estimated on a sample basis.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

CLASSIFICATION OF FEEDS

A complete feed is a formulated feed to be fed as is, and may be in the form of mash, pellets, crumbles, cubes, etc. For your assistance in classifying these commodities, the following explanation is offered:

1. Calf concentrates - Any concentrate or making a complete Calf Feed.

2. Dairy and Cattle concentrates - Any concentrate 24% protein or higher for Cattle or Dairy Cows.

3. Swine concentrates - Any concentrate 35% protein or higher for swine.

4. Poultry Concentrates:
   (a) Chick Starter Concentrates - Any concentrate for making a complete Chick Starter.
   (b) Broiler Concentrates - Any concentrate for making a complete Broiler Feed.
   (c) Growing Concentrates - Any concentrate for making a complete feed for growing chickens.
   (d) Laying and Hatching Concentrates - Any concentrate for making a complete feed for laying hens.
   (e) Fattening and Finishing Concentrates - Any concentrate for making a complete fattening feed for fowl other than Broilers or Turkeys.
   (f) Turkey Concentrates - Any concentrate for making a complete turkey feed.
   (g) Other Concentrates - Any concentrate for Poultry not covered by any other classification.

5. Calf feeds - Any complete feed for calves up to 5 months of age.

6. Dairy and Cattle Feeds - Any complete feed under 24% protein for Cattle or Dairy Cows but excluding Calf Feeds.

7. Swine Feeds - Any complete swine feed under 35% protein.

8. Poultry Feeds:
   (a) Chick Starter Feeds - Any complete feed for starting chickens other than Broilers.
   (b) Broiler Feeds - Any complete feed for starting, growing or finishing Broilers.
   (c) Growing Feeds - Any complete feed for growing chickens.
   (d) Laying and Hatching Feeds - Any complete feed for laying hens.
   (e) Fattening and Finishing Feeds - Any complete feed for fattening cockerels, capons or other fowl other than broilers and turkeys and excluding Scratch Grains.
   (f) Turkey Feeds - Any complete feed for starting, growing or finishing turkeys.
   (g) Other Complete Feeds - Any complete feed for pheasants, ducks or other poultry and not covered by any other classification.

11. Dog and Cat Foods:
   (b) Biscuits - Kibble and all baked products.
   (c) Meal - Pellets, cubes and other forms.

12. Scratch Grains - Any mixture of Whole or Cracked Grains only for Poultry.

13. Other Animal Feeds - Such as Horse Feed, Rabbit Feed, etc.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 1 - Production of Prepared Stock and Poultry Feeds in Canada 1955 together with estimated comparable data for 1956. Current monthly production accompanied by cumulative totals for 1956 and 1957 reported in columns (3), (4), (5), and (6) respectively.

FACTORS USED IN DETERMINING QUANTITIES OF CONCENTRATES MOVING INTO SECONDARY INDUSTRY

	Shipped to or sold in									
	Newfound-land	Prince Edward Island	Nova Scotia	New Brunswick	Quebec	Ontario	Manitoba	Saskat-chewan	Alberta	British Columbia	Export
Primary or Concentrated Feeds											
1. Calf Concentrates	0	.914	.769	.538	.849	.868	.809	.750	.707	.666	0
2. Dairy and Cattle Concentrates	1.000	.592	.648	.460	.764	.415	.268	.215	.296	.041	.190
3. Swine Concentrates	.647	.598	.536	.546	.821	.480	.233	.250	.270	.208	.700
4. Poultry Concentrates											
(a) Chick Starter Concentrates	0	1.000	.750	.670	.919	.904	.725	.868	.969	1.000	1.000
(b) Broiler Concentrates	0	.607	.877	.019	.999	.968	.485	0	.861	1.000	.500
(c) Growing Concentrates	.500	.692	.674	.544	.797	.726	.217	.182	.260	.297	.712
(d) Laying and Hatching Concentrates	0	.741	.740	.581	.866	.562	.206	.089	.186	.098	.697
(e) Fattening & Finishing Concentrates	0	.882	.231	.412	.923	.673	.129	0	.338	.666	0
(f) Turkey Concentrates	0	1.000	.962	.395	.965	.887	.295	.342	.278	.361	0
(g) Other Poultry Concentrates	0	.246	.116	.596	.258	.429	.019	0	1.000	0	.333

In converting concentrates to finished feeds, the Bureau uses the above factors to establish the amount of concentrates which moved into the secondary manufacturing industry, as such. These factors were established from the returns of all firms in the survey and reflect the weighted average above, which we use for a current 12 months reports. If you agree that changes should be made in any of these factors, you should advise us at once whether or not you think the factor is low or high.

From the above, you will notice that 86.8 per cent of the calf concentrates shipped in the province of Ontario in any month during 1954 moved into the hands of franchise operators and other manufacturers who make feeds from concentrates. The balance, or 13.2 per cent, moved out of the industry and was used by farmers and other similar consumers directly.

Factor No. 2, which will turn concentrates into finished feeds, is given on pages 4, 6 and 8 in brackets after the name of each commodity.

HOW TO USE THE CONVERSION FACTORS

You will note on page 4 that the industry reported they had shipped in the province of Quebec for January, 1957 1,399 tons of Dairy and Cattle concentrates, of which 330 tons were used or sold directly for use to the farmer and other such consumers. In other words, 1,069 tons moved into the hands of secondary manufacturers for further use in manufacturing complete feeds. In order to obtain the finished feeds resulting from the conversion of 1,069 tons of Dairy and Cattle concentrates, we make use of the conversion factor as follows:

1,069 x 6.0 = 6,414 tons of Dairy and Cattle Feeds.

Now turn to page 10 and you will see that the shipments of Dairy and Cattle Feeds in the province of Quebec in the same month amounted to 9,236 tons. The summary would appear as follows:

Total shipments =	9,236 tons
Shipments by secondary manufacturers (1) =	6,414 tons
Shipments by manufacturers (2) =	2,822 tons

In order to assess the proportion of total feed shipments, which your firm enjoys, the following instructions are important. In terms of concentrates, the concentrate manufacturer would divide the total Dairy and Cattle feeds shipped in the province of Quebec (9,236 tons) by 6.0 and add 330 tons of concentrates moving out of the industry thus:

$$\frac{9,236}{6.0} = 1,539 + 330 = 1,869 \text{ tons}$$

To the above he would relate his total shipments of Dairy and Cattle concentrates for the province of Quebec during the same period.

In terms of complete feeds, the complete feeds manufacturer (including franchise operators) would assess their share of the market by determining, in the following manner, the total supply of finished feeds:

Total commercial feeds shipped		9,236 tons (see page 10)
Estimated feeds produced from concentrates sold outside the industry from which would be	330 x 6.0 =	1,980 tons (see page 4)
Total supply of finished feeds used as finished feeds or in the form of concentrates		11,216 tons

(1) Includes franchise operators and those secondary manufacturers who use concentrates to manufacture complete feeds.

(2) Includes manufacturers who produce finished feeds directly from raw materials.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

In October, 1947 the Dominion Bureau of Statistics, in co-operation with the National Council of the Canadian Feed Manufacturers' Association, commenced a survey on a sample basis of Shipments of Prepared Stock and Poultry Feeds, showing export shipments as well as provincial destinations in Canada.

By 1950 the monthly survey on Shipments assumed real value since it formed a basis of comparing current months with corresponding months of the previous year. Because it was still difficult to estimate certain individual commodities reliably, the coverage of the survey was increased to 200 firms in 1951 and became representative of about 76% of the total volume of the industry. This series was presented on an index basis up to the end of 1953.

During 1953 the feeds industry desired volume figures which would reveal the actual disappearance into the hands of ultimate consumers. The result is the current survey which is produced from monthly returns of all primary manufacturers of concentrates together with returns of a sample survey of manufacturers who use raw ingredients in their finished feeds.

The information presented in this report has been arranged as follows:

Table 1 presents the total annual production of Primary and Secondary or complete feeds in Canada for 1955 together with an estimate of production for the calendar year 1956 and as well the production for the current month in 1956 and 1957 with cumulative totals for 1956 and 1957.

Table 2 shows the 1957 shipments of primary or concentrated feeds by principal commodities, provincial destination and export. Column (a) gives the total shipments of all concentrates while column (b) gives the shipments of concentrates moving out of the Industry in their original form. The difference between column (a) and column (b) shows the amount of primary feeds used by the secondary feed manufacturers in producing complete feeds. Factor No. 2, which will convert concentrates to feeds is included respectively in brackets after the title of each concentrate. (See pages 4, 6 and 8). How to use these factors is explained on page 21.

Table 3 shows the volume of monthly shipments of secondary or complete feeds by principal commodities, provincial destination and export. Using conversion factors provided by all firms in the primary survey, the resulting volume of feeds has been added to those totals reported by firms which manufacture finished feeds from raw materials. The volume of feeds, shown in this section, therefore, represents the estimated total feeds shipped by all types of manufacturers including franchise operators and independent manufacturers who purchase concentrates from primary manufacturers. Factor No. 1, which will show the proportion of concentrates moving out of the Industry is shown on page 20.

Table 4 presents the volume of shipments by manufacturers of other types of stock feeds by principal commodities, provincial destination and export. In this section specialized feeds such as dog and cat foods, mineral mixtures, etc., are the result of 100% survey of the producing industry. Other commodities are estimated on a sample basis.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

CLASSIFICATION OF FEEDS

A complete feed is a formulated feed to be fed as is, and may be in the form of mash, pellets, crumbles, cubes, etc. For your assistance in classifying these commodities, the following explanation is offered:

1. Calf concentrates - Any concentrate or making a complete Calf Feed.

2. Dairy and Cattle concentrates - Any concentrate 24% protein or higher for Cattle or Dairy Cows.

3. Swine concentrates - Any concentrate 35% protein or higher for swine.

4. Poultry Concentrates:
   (a) Chick Starter Concentrates - Any concentrate for making a complete Chick Starter.
   (b) Broiler Concentrates - Any concentrate for making a complete Broiler Feed.
   (c) Growing Concentrates - Any concentrate for making a complete feed for growing chickens.
   (d) Laying and Hatching Concentrates - Any concentrate for making a complete feed for laying hens.
   (e) Fattening and Finishing Concentrates - Any concentrate for making a complete fattening feed for fowl other than Broilers or Turkeys:
   (f) Turkey Concentrates - Any concentrate for making a complete turkey feed.
   (g) Other Concentrates - Any concentrate for Poultry not covered by any other classification.

5. Calf feeds - Any complete feed for calves up to 5 months of age.

6. Dairy and Cattle Feeds - Any complete feed under 24% protein for Cattle or Dairy Cows but excluding Calf Feeds.

7. Swine Feeds - Any complete swine feed under 35% protein.

8. Poultry Feeds:
   (a) Chick Starter Feeds - Any complete feed for starting chickens other than Broilers.
   (b) Broiler Feeds - Any complete feed for starting, growing or finishing Broilers.
   (c) Growing Feeds - Any complete feed for growing chickens.
   (d) Laying and Hatching Feeds - Any complete feed for laying hens.
   (e) Fattening and Finishing Feeds - Any complete feed for fattening cockerels, capons or other fowl other than broilers and turkeys and excluding Scratch Grains.
   (f) Turkey Feeds - Any complete feed for starting, growing or finishing turkeys.
   (g) Other Complete Feeds - Any complete feed for pheasants, ducks or other poultry and not covered by any other classification.

11. Dog and Cat Foods:
   (b) Biscuits - Kibble and all baked products.
   (c) Meal - Pellets, cubes and other forms.

12. Scratch Grains - Any mixture of Whole or Cracked Grains only for Poultry.

13. Other Animal Feeds - Such as Horse Feed, Rabbit Feed, etc.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 1 - Production of Prepared Stock and Poultry Feeds in Canada 1955 together with estimated comparable data for 1956. Current monthly production accompanied by cumulative totals for 1956 and 1957 reported in columns (3), (4), (5), and (6) respectively.

FACTORS USED IN DETERMINING QUANTITIES OF CONCENTRATES MOVING INTO SECONDARY INDUSTRY

	Shipped to or sold in									
	Newfound-land	Prince Edward Island	Nova Scotia	New Brunswick	Quebec	Ontario	Manitoba	Saskat-chewan	Alberta	British Columbia	Export
Primary or Concentrated Feeds											
1. Calf Concentrates	0	.914	.769	.538	.849	.868	.809	.750	.707	.666	0
2. Dairy and Cattle Concentrates	1.000	.592	.648	.460	.764	.415	.268	.215	.296	.041	.190
3. Swine Concentrates	.647	.598	.536	.546	.821	.480	.233	.250	.270	.208	.700
4. Poultry Concentrates											
(a) Chick Starter Concentrates	0	1.000	.750	.670	.919	.904	.725	.868	.969	1.000	1.000
(b) Broiler Concentrates	0	.607	.877	.019	.999	.968	.485	0	.861	1.000	.500
(c) Growing Concentrates	.500	.692	.674	.544	.797	.726	.217	.182	.260	.297	.712
(d) Laying and Hatching Concentrates	0	.741	.740	.581	.866	.562	.206	.089	.186	.098	.697
(e) Fattening & Finishing Concentrates	0	.882	.231	.412	.923	.673	.129	0	.338	.666	0
(f) Turkey Concentrates	0	1.000	.962	.395	.965	.887	.295	.342	.278	.361	0
(g) Other Poultry Concentrates	0	.246	.116	.596	.258	.429	.019	0	1.000	0	.333

In converting concentrates to finished feeds, the Bureau uses the above factors to establish the amount of concentrates which moved into the secondary manufacturing industry, as such. These factors were established from the returns of all firms in the survey and reflect the weighted average above, which we use for a current 12 months reports. If you agree that changes should be made in any of these factors, you should advise us at once whether or not you think the factor is low or high.

From the above, you will notice that 86.8 per cent of the calf concentrates shipped in the province of Ontario in any month during 1954 moved into the hands of franchise operators and other manufacturers who make feeds from concentrates. The balance, or 13.2 per cent, moved out of the industry and was used by farmers and other similar consumers directly.

Factor No. 2, which will turn concentrates into finished feeds, is given on pages 4, 6 and 8 in brackets after the name of each commodity.

HOW TO USE THE CONVERSION FACTORS

You will note on page 4 that the industry reported they had shipped in the province of Quebec for January, 1957 1,399 tons of Dairy and Cattle concentrates, of which 330 tons were used or sold directly for use to the farmer and other such consumers. In other words, 1,069 tons moved into the hands of secondary manufacturers for further use in manufacturing complete feeds. In order to obtain the finished feeds resulting from the conversion of 1,069 tons of Dairy and Cattle concentrates, we make use of the conversion factor as follows:

1,069 x 6.0 = 6,414 tons of Dairy and Cattle Feeds.

Now turn to page 10 and you will see that the shipments of Dairy and Cattle Feeds in the province of Quebec in the same month amounted to 9,236 tons. The summary would appear as follows:

Total shipments =	9,236 tons
Shipments by secondary manufacturers (1) =	6,414 tons
Shipments by manufacturers (2) =	2,822 tons

In order to assess the proportion of total feed shipments, which your firm enjoys, the following instructions are important. In terms of concentrates, the concentrate manufacturer would divide the total Dairy and Cattle feeds shipped in the province of Quebec (9,236 tons) by 6.0 and add 330 tons of concentrates moving out of the industry thus:

$$\frac{9,236}{6.0} = 1,539 + 330 = 1,869 \text{ tons}$$

To the above he would relate his total shipments of Dairy and Cattle concentrates for the province of Quebec during the same period.

In terms of complete feeds, the complete feeds manufacturer (including franchise operators) would assess their share of the market by determining, in the following manner, the total supply of finished feeds:

Total commercial feeds shipped		9,236 tons (see page 10)
Estimated feeds produced from concentrates sold outside the industry from which would be	330 x 6.0 =	1,980 tons (see page 4)
Total supply of finished feeds used as finished feeds or in the form of concentrates		11,216 tons

(1) Includes franchise operators and those secondary manufacturers who use concentrates to manufacture complete feeds.

(2) Includes manufacturers who produce finished feeds directly from raw materials.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

CLASSIFICATION OF FEEDS

A complete feed is a formulated feed to be fed as is, and may be in the form of mash, pellets, crumbles, cubes, etc. For your assistance in classifying these commodities, the following explanation is offered:

1. Calf concentrates - Any concentrate or making a complete Calf Feed.

2. Dairy and Cattle concentrates - Any concentrate 24% protein or higher for Cattle or Dairy Cows.

3. Swine concentrates - Any concentrate 35% protein or higher for swine.

4. Poultry Concentrates:
   (a) Chick Starter Concentrates - Any concentrate for making a complete Chick Starter.
   (b) Broiler Concentrates - Any concentrate for making a complete Broiler Feed.
   (c) Growing Concentrates - Any concentrate for making a complete feed for growing chickens.
   (d) Laying and Hatching Concentrates - Any concentrate for making a complete feed for laying hens.
   (e) Fattening and Finishing Concentrates - Any concentrate for making a complete fattening feed for fowl other than Broilers or Turkeys.
   (f) Turkey Concentrates - Any concentrate for making a complete turkey feed.
   (g) Other Concentrates - Any concentrate for Poultry not covered by any other classification.

5. Calf feeds - Any complete feed for calves up to 5 months of age.

6. Dairy and Cattle Feeds - Any complete feed under 24% protein for Cattle or Dairy Cows but excluding Calf Feeds.

7. Swine Feeds - Any complete swine feed under 35% protein.

8. Poultry Feeds:
   (a) Chick Starter Feeds - Any complete feed for starting chickens other than Broilers.
   (b) Broiler Feeds - Any complete feed for starting, growing or finishing Broilers.
   (c) Growing Feeds - Any complete feed for growing chickens.
   (d) Laying and Hatching Feeds - Any complete feed for laying hens.
   (e) Fattening and Finishing Feeds - Any complete feed for fattening cockerels, capons or other fowl other than broilers and turkeys and excluding Scratch Grains.
   (f) Turkey Feeds - Any complete feed for starting, growing or finishing turkeys.
   (g) Other Complete Feeds - Any complete feed for pheasants, ducks or other poultry and not covered by any other classification.

11. Dog and Cat Foods:
   (b) Biscuits - Kibble and all baked products.
   (c) Meal - Pellets, cubes and other forms.

12. Scratch Grains - Any mixture of Whole or Cracked Grains only for Poultry.

13. Other Animal Feeds - Such as Horse Feed, Rabbit Feed, etc.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 1 - Production of Prepared Stock and Poultry Feeds in Canada 1955 together with estimated comparable data for 1956. Current monthly production accompanied by cumulative totals for 1956 and 1957 reported in columns (3), (4), (5), and (6) respectively.

FACTORS USED IN DETERMINING QUANTITIES OF CONCENTRATES MOVING INTO SECONDARY INDUSTRY

	Shipped to or sold in										
	Newfound-land	Prince Edward Island	Nova Scotia	New Brunswick	Quebec	Ontario	Manitoba	Saskat-chewan	Alberta	British Columbia	Export
Primary or Concentrated Feeds											
1. Calf Concentrates	0	.914	.769	.538	.849	.868	.809	.750	.707	.666	0
2. Dairy and Cattle Concentrates	1.000	.592	.648	.460	.764	.415	.268	.215	.296	.041	.190
3. Swine Concentrates	.647	.598	.536	.546	.821	.480	.233	.250	.270	.208	.700
4. Poultry Concentrates											
(a) Chick Starter Concentrates	0	1.000	.750	.670	.919	.904	.725	.868	.969	1.000	1.000
(b) Broiler Concentrates	0	.607	.877	.019	.999	.968	.485	0	.861	1.000	.500
(c) Growing Concentrates	.500	.692	.674	.544	.797	.726	.217	.182	.260	.297	.712
(d) Laying and Hatching Concentrates	0	.741	.740	.581	.866	.562	.206	.089	.186	.098	.697
(e) Fattening & Finishing Concentrates	0	.882	.231	.412	.923	.673	.129	0	.338	.666	0
(f) Turkey Concentrates	0	1.000	.962	.395	.965	.887	.295	.342	.278	.361	0
(g) Other Poultry Concentrates	0	.246	.116	.596	.258	.429	.019	0	1.000	0	.333

In converting concentrates to finished feeds, the Bureau uses the above factors to establish the amount of concentrates which moved into the secondary manufacturing industry, as such. These factors were established from the returns of all firms in the survey and reflect the weighted average above, which we use for a current 12 months reports. If you agree that changes should be made in any of these factors, you should advise us at once whether or not you think the factor is low or high.

From the above, you will notice that 86.8 per cent of the calf concentrates shipped in the province of Ontario in any month during 1954 moved into the hands of franchise operators and other manufacturers who make feeds from concentrates. The balance, or 13.2 per cent, moved out of the industry and was used by farmers and other similar consumers directly.

Factor No. 2, which will turn concentrates into finished feeds, is given on pages 4, 6 and 8 in brackets after the name of each commodity.

HOW TO USE THE CONVERSION FACTORS

You will note on page 4 that the industry reported they had shipped in the province of Quebec for January, 1957 1,399 tons of Dairy and Cattle concentrates, of which 330 tons were used or sold directly for use to the farmer and other such consumers. In other words, 1,069 tons moved into the hands of secondary manufacturers for further use in manufacturing complete feeds. In order to obtain the finished feeds resulting from the conversion of 1,069 tons of Dairy and Cattle concentrates, we make use of the conversion factor as follows:

1,069 x 6.0 = 6,414 tons of Dairy and Cattle Feeds.

Now turn to page 10 and you will see that the shipments of Dairy and Cattle Feeds in the province of Quebec in the same month amounted to 9,236 tons. The summary would appear as follows:

Total shipments =	9,236 tons
Shipments by secondary manufacturers (1) =	6,414 tons
Shipments by manufacturers (2) =	2,822 tons

In order to assess the proportion of total feed shipments, which your firm enjoys, the following instructions are important. In terms of concentrates, the concentrate manufacturer would divide the total Dairy and Cattle feeds shipped in the province of Quebec (9,236 tons) by 6.0 and add 330 tons of concentrates moving out of the industry thus:

$$\frac{9,236}{6.0} = 1,539 + 330 = 1,869 \text{ tons}$$

To the above he would relate his total shipments of Dairy and Cattle concentrates for the province of Quebec during the same period.

In terms of complete feeds, the complete feeds manufacturer (including franchise operators) would assess their share of the market by determining, in the following manner, the total supply of finished feeds:

Total commercial feeds shipped		9,236 tons (see page 10)
Estimated feeds produced from concentrates sold outside the industry from which would be	330 x 6.0 =	1,980 tons (see page 4)
Total supply of finished feeds used as finished feeds or in the form of concentrates		11,216 tons

(1) Includes franchise operators and those secondary manufacturers who use concentrates to manufacture complete feeds.

(2) Includes manufacturers who produce finished feeds directly from raw materials.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

In October, 1947 the Dominion Bureau of Statistics, in co-operation with the National Council of the Canadian Feed Manufacturers' Association, commenced a survey on a sample basis of Shipments of Prepared Stock and Poultry Feeds, showing export shipments as well as provincial destinations in Canada.

By 1950 the monthly survey on Shipments assumed real value since it formed a basis of comparing current months with corresponding months of the previous year. Because it was still difficult to estimate certain individual commodities reliably, the coverage of the survey was increased to 200 firms in 1951 and became representative of about 76% of the total volume of the industry. This series was presented on an index basis up to the end of 1953.

During 1953 the feeds industry desired volume figures which would reveal the actual disappearance into the hands of ultimate consumers. The result is the current survey which is produced from monthly returns of all primary manufacturers of concentrates together with returns of a sample survey of manufacturers who use raw ingredients in their finished feeds.

The information presented in this report has been arranged as follows:

Table 1 presents the total annual production of Primary and Secondary or complete feeds in Canada for 1955 together with an estimate of production for the calendar year 1956 and as well the production for the current month in 1956 and 1957 with cumulative totals for 1956 and 1957.

Table 2 shows the 1957 shipments of primary or concentrated feeds by principal commodities, provincial destination and export. Column (a) gives the total shipments of all concentrates while column (b) gives the shipments of concentrates moving out of the Industry in their original form. The difference between column (a) and column (b) shows the amount of primary feeds used by the secondary feed manufacturers in producing complete feeds. Factor No. 2, which will convert concentrates to feeds is included respectively in brackets after the title of each concentrate. (See pages 4, 6 and 8). How to use these factors is explained on page 21.

Table 3 shows the volume of monthly shipments of secondary or complete feeds by principal commodities, provincial destination and export. Using conversion factors provided by all firms in the primary survey, the resulting volume of feeds has been added to those totals reported by firms which manufacture finished feeds from raw materials. The volume of feeds, shown in this section, therefore, represents the estimated total feeds shipped by all types of manufacturers including franchise operators and independent manufacturers who purchase concentrates from primary manufacturers. Factor No. 1, which will show the proportion of concentrates moving out of the Industry is shown on page 20.

Table 4 presents the volume of shipments by manufacturers of other types of stock feeds by principal commodities, provincial destination and export. In this section specialized feeds such as dog and cat foods, mineral mixtures, etc., are the result of 100% survey of the producing industry. Other commodities are estimated on a sample basis.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

CLASSIFICATION OF FEEDS

A complete feed is a formulated feed to be fed as is, and may be in the form of mash, pellets, crumbles, cubes, etc. For your assistance in classifying these commodities, the following explanation is offered:

1. Calf concentrates - Any concentrate or making a complete Calf Feed.

2. Dairy and Cattle concentrates - Any concentrate 24% protein or higher for Cattle or Dairy Cows.

3. Swine concentrates - Any concentrate 35% protein or higher for swine.

4. Poultry Concentrates:
   (a) Chick Starter Concentrates - Any concentrate for making a complete Chick Starter.
   (b) Broiler Concentrates - Any concentrate for making a complete Broiler Feed.
   (c) Growing Concentrates - Any concentrate for making a complete feed for growing chickens.
   (d) Laying and Hatching Concentrates - Any concentrate for making a complete feed for laying hens.
   (e) Fattening and Finishing Concentrates - Any concentrate for making a complete fattening feed for fowl other than Broilers or Turkeys.
   (f) Turkey Concentrates - Any concentrate for making a complete turkey feed.
   (g) Other Concentrates - Any concentrate for Poultry not covered by any other classification.

5. Calf feeds - Any complete feed for calves up to 5 months of age.

6. Dairy and Cattle Feeds - Any complete feed under 24% protein for Cattle or Dairy Cows but excluding Calf Feeds.

7. Swine Feeds - Any complete swine feed under 35% protein.

8. Poultry Feeds:
   (a) Chick Starter Feeds - Any complete feed for starting chickens other than Broilers.
   (b) Broiler Feeds - Any complete feed for starting, growing or finishing Broilers.
   (c) Growing Feeds - Any complete feed for growing chickens.
   (d) Laying and Hatching Feeds - Any complete feed for laying hens.
   (e) Fattening and Finishing Feeds - Any complete feed for fattening cockerels, capons or other fowl other than broilers and turkeys and excluding Scratch Grains.
   (f) Turkey Feeds - Any complete feed for starting, growing or finishing turkeys.
   (g) Other Complete Feeds - Any complete feed for pheasants, ducks or other poultry and not covered by any other classification.

11. Dog and Cat Foods:
   (b) Biscuits - Kibble and all baked products.
   (c) Meal - Pellets, cubes and other forms.

12. Scratch Grains - Any mixture of Whole or Cracked Grains only for Poultry.

13. Other Animal Feeds - Such as Horse Feed, Rabbit Feed, etc.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 1 - Production of Prepared Stock and Poultry Feeds in Canada 1955 together with estimated comparable data for 1956. Current monthly production accompanied by cumulative totals for 1956 and 1957 reported in columns (3), (4), (5), and (6) respectively.

FACTORS USED IN DETERMINING QUANTITIES OF CONCENTRATES MOVING INTO SECONDARY INDUSTRY

	Shipped to or sold in										
	Newfound-land	Prince Edward Island	Nova Scotia	New Brunswick	Quebec	Ontario	Manitoba	Saskat-chewan	Alberta	British Columbia	Export
Primary or Concentrated Feeds											
1. Calf Concentrates	0	.914	.769	.538	.849	.868	.809	.750	.707	.666	0
2. Dairy and Cattle Concentrates	1.000	.592	.648	.460	.764	.415	.268	.215	.296	.041	.190
3. Swine Concentrates	.647	.598	.536	.546	.821	.480	.233	.250	.270	.208	.700
4. Poultry Concentrates											
(a) Chick Starter Concentrates	0	1.000	.750	.670	.919	.904	.725	.868	.969	1.000	1.000
(b) Broiler Concentrates	0	.607	.877	.019	.999	.968	.485	0	.861	1.000	.500
(c) Growing Concentrates	.500	.692	.674	.544	.797	.726	.217	.182	.260	.297	.712
(d) Laying and Hatching Concentrates	0	.741	.740	.581	.866	.562	.206	.089	.186	.098	.697
(e) Fattening & Finishing Concentrates	0	.882	.231	.412	.923	.673	.129	0	.338	.666	0
(f) Turkey Concentrates	0	1.000	.962	.395	.965	.887	.295	.342	.278	.361	0
(g) Other Poultry Concentrates	0	.246	.116	.596	.258	.429	.019	0	1.000	0	.333

In converting concentrates to finished feeds, the Bureau uses the above factors to establish the amount of concentrates which moved into the secondary manufacturing industry, as such. These factors were established from the returns of all firms in the survey and reflect the weighted average above, which we use for a current 12 months reports. If you agree that changes should be made in any of these factors, you should advise us at once whether or not you think the factor is low or high.

From the above, you will notice that 86.8 per cent of the calf concentrates shipped in the province of Ontario in any month during 1954 moved into the hands of franchise operators and other manufacturers who make feeds from concentrates. The balance, or 13.2 per cent, moved out of the industry and was used by farmers and other similar consumers directly.

Factor No. 2, which will turn concentrates into finished feeds, is given on pages 4, 6 and 8 in brackets after the name of each commodity.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

HOW TO USE THE CONVERSION FACTORS

You will note on page 4 that the industry reported they had shipped in the province of Quebec for January, 1957 1,399 tons of Dairy and Cattle concentrates, of which 330 tons were used or sold directly for use to the farmer and other such consumers. In other words, 1,069 tons moved into the hands of secondary manufacturers for further use in manufacturing complete feeds. In order to obtain the finished feeds resulting from the conversion of 1,069 tons of Dairy and Cattle concentrates, we make use of the conversion factor as follows:

1,069 x 6.0 = 6,414 tons of Dairy and Cattle Feeds.

Now turn to page 10 and you will see that the shipments of Dairy and Cattle Feeds in the province of Quebec in the same month amounted to 9,236 tons. The summary would appear as follows:

Total shipments =	9,236 tons
Shipments by secondary manufacturers (1) =	6,414 tons
Shipments by manufacturers (2) =	2,822 tons

In order to assess the proportion of total feed shipments, which your firm enjoys, the following instructions are important. In terms of concentrates, the concentrate manufacturer would divide the total Dairy and Cattle feeds shipped in the province of Quebec (9,236 tons) by 6.0 and add 330 tons of concentrates moving out of the industry thus:

$$\frac{9,236}{6.0} = 1,539 + 330 = 1,869 \text{ tons}$$

To the above he would relate his total shipments of Dairy and Cattle concentrates for the province of Quebec during the same period.

In terms of complete feeds, the complete feeds manufacturer (including franchise operators) would assess their share of the market by determining, in the following manner, the total supply of finished feeds:

Total commercial feeds shipped		9,236 tons (see page 10)
Estimated feeds produced from concentrates sold outside the industry from which would be	330 x 6.0 =	1,980 tons (see page 4)
Total supply of finished feeds used as finished feeds or in the form of concentrates		11,216 tons

(1) Includes franchise operators and those secondary manufacturers who use concentrates to manufacture complete feeds.

(2) Includes manufacturers who produce finished feeds directly from raw materials.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

In October, 1947 the Dominion Bureau of Statistics, in co-operation with the National Council of the Canadian Feed Manufacturers' Association, commenced a survey on a sample basis of Shipments of Prepared Stock and Poultry Feeds, showing export shipments as well as provincial destinations in Canada.

By 1950 the monthly survey on Shipments assumed real value since it formed a basis of comparing current months with corresponding months of the previous year. Because it was still difficult to estimate certain individual commodities reliably, the coverage of the survey was increased to 200 firms in 1951 and became representative of about 76% of the total volume of the industry. This series was presented on an index basis up to the end of 1953.

During 1953 the feeds industry desired volume figures which would reveal the actual disappearance into the hands of ultimate consumers. The result is the current survey which is produced from monthly returns of all primary manufacturers of concentrates together with returns of a sample survey of manufacturers who use raw ingredients in their finished feeds.

The information presented in this report has been arranged as follows:

Table 1 presents the total annual production of Primary and Secondary or complete feeds in Canada for 1955 together with an estimate of production for the calendar year 1956 and as well the production for the current month in 1956 and 1957 with cumulative totals for 1956 and 1957.

Table 2 shows the 1957 shipments of primary or concentrated feeds by principal commodities, provincial destination and export. Column (a) gives the total shipments of all concentrates while column (b) gives the shipments of concentrates moving out of the Industry in their original form. The difference between column (a) and column (b) shows the amount of primary feeds used by the secondary feed manufacturers in producing complete feeds. Factor No. 2, which will convert concentrates to feeds is included respectively in brackets after the title of each concentrate. (See pages 4, 6 and 8). How to use these factors is explained on page 21.

Table 3 shows the volume of monthly shipments of secondary or complete feeds by principal commodities, provincial destination and export. Using conversion factors provided by all firms in the primary survey, the resulting volume of feeds has been added to those totals reported by firms which manufacture finished feeds from raw materials. The volume of feeds, shown in this section, therefore, represents the estimated total feeds shipped by all types of manufacturers including franchise operators and independent manufacturers who purchase concentrates from primary manufacturers. Factor No. 1, which will show the proportion of concentrates moving out of the Industry is shown on page 20.

Table 4 presents the volume of shipments by manufacturers of other types of stock feeds by principal commodities, provincial destination and export. In this section specialized feeds such as dog and cat foods, mineral mixtures, etc., are the result of 100% survey of the producing industry. Other commodities are estimated on a sample basis.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

CLASSIFICATION OF FEEDS

A complete feed is a formulated feed to be fed as is, and may be in the form of mash, pellets, crumbles, cubes, etc. For your assistance in classifying these commodities, the following explanation is offered:

1. Calf concentrates - Any concentrate or making a complete Calf Feed.

2. Dairy and Cattle concentrates - Any concentrate 24% protein or higher for Cattle or Dairy Cows.

3. Swine concentrates - Any concentrate 35% protein or higher for swine.

4. Poultry Concentrates:
   (a) Chick Starter Concentrates - Any concentrate for making a complete Chick Starter.
   (b) Broiler Concentrates - Any concentrate for making a complete Broiler Feed.
   (c) Growing Concentrates - Any concentrate for making a complete feed for growing chickens.
   (d) Laying and Hatching Concentrates - Any concentrate for making a complete feed for laying hens.
   (e) Fattening and Finishing Concentrates - Any concentrate for making a complete fattening feed for fowl other than Broilers or Turkeys.
   (f) Turkey Concentrates - Any concentrate for making a complete turkey feed.
   (g) Other Concentrates - Any concentrate for Poultry not covered by any other classification.

5. Calf feeds - Any complete feed for calves up to 5 months of age.

6. Dairy and Cattle Feeds - Any complete feed under 24% protein for Cattle or Dairy Cows but excluding Calf Feeds.

7. Swine Feeds - Any complete swine feed under 35% protein.

8. Poultry Feeds:
   (a) Chick Starter Feeds - Any complete feed for starting chickens other than Broilers.
   (b) Broiler Feeds - Any complete feed for starting, growing or finishing Broilers.
   (c) Growing Feeds - Any complete feed for growing chickens.
   (d) Laying and Hatching Feeds - Any complete feed for laying hens.
   (e) Fattening and Finishing Feeds - Any complete feed for fattening cockerels, capons or other fowl other than broilers and turkeys and excluding Scratch Grains.
   (f) Turkey Feeds - Any complete feed for starting, growing or finishing turkeys.
   (g) Other Complete Feeds - Any complete feed for pheasants, ducks or other poultry and not covered by any other classification.

11. Dog and Cat Foods:
   (b) Biscuits - Kibble and all baked products.
   (c) Meal - Pellets, cubes and other forms.

12. Scratch Grains - Any mixture of Whole or Cracked Grains only for Poultry.

13. Other Animal Feeds - Such as Horse Feed, Rabbit Feed, etc.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 1 - Production of Prepared Stock and Poultry Feeds in Canada 1955 together with estimated comparable data for 1956. Current monthly production accompanied by cumulative totals for 1956 and 1957 reported in columns (3), (4), (5), and (6) respectively.

4. Poultry Concentrates											
(a) Chick Starter Concentrates	0	1.000	.750	.670	.919	.904	.725	.868	.969	1.000	1.000
(b) Broiler Concentrates	0	.607	.877	.019	.999	.968	.485	0	.861	1.000	.500
(c) Growing Concentrates	.500	.692	.674	.544	.797	.726	.217	.182	.260	.297	.712
(d) Laying and Hatching Concentrates	0	.741	.740	.581	.866	.562	.206	.089	.186	.098	.697
(e) Fattening & Finishing Concentrates	0	.882	.231	.412	.923	.673	.129	0	.338	.666	0
(f) Turkey Concentrates	0	1.000	.962	.395	.965	.887	.295	.342	.278	.361	0
(g) Other Poultry Concentrates	0	.246	.116	.596	.258	.429	.019	0	1.000	0	.333

In converting concentrates to finished feeds, the Bureau uses the above factors to establish the amount of concentrates which moved into the secondary manufacturing industry, as such. These factors were established from the returns of all firms in the survey and reflect the weighted average above, which we use for a current 12 months reports. If you agree that changes should be made in any of these factors, you should advise us at once whether or not you think the factor is low or high.

From the above, you will notice that 86.8 per cent of the calf concentrates shipped in the province of Ontario in any mont during 1954 moved into the hands of franchise operators and other manufacturers who make feeds from concentrates. The balance, or 13.2 per cent, moved out of the industry and was used by farmers and other similar consumers directly.

Factor No. 2, which will turn concentrates into finished feeds, is given on pages 4, 6 and 8 in brackets after the name of each commodity.

HOW TO USE THE CONVERSION FACTORS

You will note on page 4 that the industry reported they had shipped in the province of Quebec for January, 1957 1,399 tons of Dairy and Cattle concentrates, of which 330 tons were used or sold directly for use to the farmer and other such consumers. In other words, 1,069 tons moved into the hands of secondary manufacturers for further use in manufacturing complete feeds. In order to obtain the finished feeds resulting from the conversion of 1,069 tons of Dairy and Cattle concentrates, we make use of the conversion factor as follows:

1,069 x 6.0 = 6,414 tons of Dairy and Cattle Feeds.

Now turn to page 10 and you will see that the shipments of Dairy and Cattle Feeds in the province of Quebec in the same month amounted to 9,236 tons. The summary would appear as follows:

Total shipments =	9,236 tons
Shipments by secondary manufacturers (1) =	6,414 tons
Shipments by manufacturers (2) =	2,822 tons

In order to assess the proportion of total feed shipments, which your firm enjoys, the following instructions are important. In terms of concentrates, the concentrate manufacturer would divide the total Dairy and Cattle feeds shipped in the province of Quebec (9,236 tons) by 6.0 and add 330 tons of concentrates moving out of the industry thus:

$$\frac{9,236}{6.0} = 1,539 + 330 = 1,869 \text{ tons}$$

To the above he would relate his total shipments of Dairy and Cattle concentrates for the province of Quebec during the same period.

In terms of complete feeds, the complete feeds manufacturer (including franchise operators) would assess their share of the market by determining, in the following manner, the total supply of finished feeds:

Total commercial feeds shipped		9,236 tons (see page 10)
Estimated feeds produced from concentrates sold outside the industry from which would be	330 x 6.0 =	1,980 tons (see page 4)
Total supply of finished feeds used as finished feeds or in the form of concentrates		11,216 tons

(1) Includes franchise operators and those secondary manufacturers who use concentrates to manufacture complete feeds.

(2) Includes manufacturers who produce finished feeds directly from raw materials.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

In October, 1947 the Dominion Bureau of Statistics, in co-operation with the National Council of the Canadian Feed Manufacturers' Association, commenced a survey on a sample basis of Shipments of Prepared Stock and Poultry Feeds, showing export shipments as well as provincial destinations in Canada.

By 1950 the monthly survey on Shipments assumed real value since it formed a basis of comparing current months with corresponding months of the previous year. Because it was still difficult to estimate certain individual commodities reliably, the coverage of the survey was increased to 200 firms in 1951 and became representative of about 76% of the total volume of the industry. This series was presented on an index basis up to the end of 1953.

During 1953 the feeds industry desired volume figures which would reveal the actual disappearance into the hands of ultimate consumers. The result is the current survey which is produced from monthly returns of all primary manufacturers of concentrates together with returns of a sample survey of manufacturers who use raw ingredients in their finished feeds.

The information presented in this report has been arranged as follows:

Table 1 presents the total annual production of Primary and Secondary or complete feeds in Canada for 1955 together with an estimate of production for the calendar year 1956 and as well the production for the current month in 1956 and 1957 with cumulative totals for 1956 and 1957.

Table 2 shows the 1957 shipments of primary or concentrated feeds by principal commodities, provincial destination and export. Column (a) gives the total shipments of all concentrates while column (b) gives the shipments of concentrates moving out of the Industry in their original form. The difference between column (a) and column (b) shows the amount of primary feeds used by the secondary feed manufacturers in producing complete feeds. Factor No. 2, which will convert concentrates to feeds is included respectively in brackets after the title of each concentrate. (See pages 4, 6 and 8). How to use these factors is explained on page 21.

Table 3 shows the volume of monthly shipments of secondary or complete feeds by principal commodities, provincial destination and export. Using conversion factors provided by all firms in the primary survey, the resulting volume of feeds has been added to those totals reported by firms which manufacture finished feeds from raw materials. The volume of feeds, shown in this section, therefore, represents the estimated total feeds shipped by all types of manufacturers including franchise operators and independent manufacturers who purchase concentrates from primary manufacturers. Factor No. 1, which will show the proportion of concentrates moving out of the Industry is shown on page 20.

Table 4 presents the volume of shipments by manufacturers of other types of stock feeds by principal commodities, provincial destination and export. In this section specialized feeds such as dog and cat foods, mineral mixtures, etc., are the result of 100% survey of the producing industry. Other commodities are estimated on a sample basis.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

CLASSIFICATION OF FEEDS

A complete feed is a formulated feed to be fed as is, and may be in the form of mash, pellets, crumbles, cubes, etc. For your assistance in classifying these commodities, the following explanation is offered:

1. Calf concentrates - Any concentrate or making a complete Calf Feed.

2. Dairy and Cattle concentrates - Any concentrate 24% protein or higher for Cattle or Dairy Cows.

3. Swine concentrates - Any concentrate 35% protein or higher for swine.

4. Poultry Concentrates:
   (a) Chick Starter Concentrates - Any concentrate for making a complete Chick Starter.
   (b) Broiler Concentrates - Any concentrate for making a complete Broiler Feed.
   (c) Growing Concentrates - Any concentrate for making a complete feed for growing chickens.
   (d) Laying and Hatching Concentrates - Any concentrate for making a complete feed for laying hens.
   (e) Fattening and Finishing Concentrates - Any concentrate for making a complete fattening feed for fowl other than Broilers or Turkeys.
   (f) Turkey Concentrates - Any concentrate for making a complete turkey feed.
   (g) Other Concentrates - Any concentrate for Poultry not covered by any other classification.

5. Calf feeds - Any complete feed for calves up to 5 months of age.

6. Dairy and Cattle Feeds - Any complete feed under 24% protein for Cattle or Dairy Cows but excluding Calf Feeds.

7. Swine Feeds - Any complete swine feed under 35% protein.

8. Poultry Feeds:
   (a) Chick Starter Feeds - Any complete feed for starting chickens other than Broilers.
   (b) Broiler Feeds - Any complete feed for starting, growing or finishing Broilers.
   (c) Growing Feeds - Any complete feed for growing chickens.
   (d) Laying and Hatching Feeds - Any complete feed for laying hens.
   (e) Fattening and Finishing Feeds - Any complete feed for fattening cockerels, capons or other fowl other than broilers and turkeys and excluding Scratch Grains.
   (f) Turkey Feeds - Any complete feed for starting, growing or finishing turkeys.
   (g) Other Complete Feeds - Any complete feed for pheasants, ducks or other poultry and not covered by any other classification.

11. Dog and Cat Foods:
   (b) Biscuits - Kibble and all baked products.
   (c) Meal - Pellets, cubes and other forms.

12. Scratch Grains - Any mixture of Whole or Cracked Grains only for Poultry.

13. Other Animal Feeds - Such as Horse Feed, Rabbit Feed, etc.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 1 - Production of Prepared Stock and Poultry Feeds in Canada 1955 together with estimated comparable data for 1956. Current monthly production accompanied by cumulative totals for 1956 and 1957 reported in columns (3), (4), (5), and (6) respectively.

3. Swine Concentrates	.647	.598	.536	.546	.821	.480	.233	.250	.270	.208	.700
4. Poultry Concentrates											
(a) Chick Starter Concentrates	0	1.000	.750	.670	.919	.904	.725	.868	.969	1.000	1.000
(b) Broiler Concentrates	0	.607	.877	.019	.999	.968	.485	0	.861	1.000	.500
(c) Growing Concentrates	.500	.692	.674	.544	.797	.726	.217	.182	.260	.297	.712
(d) Laying and Hatching Concentrates	0	.741	.740	.581	.866	.562	.206	.089	.186	.098	.697
(e) Fattening & Finishing Concentrates	0	.882	.231	.412	.923	.673	.129	0	.338	.666	0
(f) Turkey Concentrates	0	1.000	.962	.395	.965	.887	.295	.342	.278	.361	0
(g) Other Poultry Concentrates	0	.246	.116	.596	.258	.429	.019	0	1.000	0	.333

In converting concentrates to finished feeds, the Bureau uses the above factors to establish the amount of concentrates which moved into the secondary manufacturing industry, as such. These factors were established from the returns of all firms in the survey and reflect the weighted average above, which we use for a current 12 months reports. If you agree that changes should be made in any of these factors, you should advise us at once whether or not you think the factor is low or high.

From the above, you will notice that 86.8 per cent of the calf concentrates shipped in the province of Ontario in any month during 1954 moved into the hands of franchise operators and other manufacturers who make feeds from concentrates. The balance, or 13.2 per cent, moved out of the industry and was used by farmers and other similar consumers directly.

Factor No. 2, which will turn concentrates into finished feeds, is given on pages 4, 6 and 8 in brackets after the name of each commodity.

HOW TO USE THE CONVERSION FACTORS

You will note on page 4 that the industry reported they had shipped in the province of Quebec for January, 1957 1,399 tons of Dairy and Cattle concentrates, of which 330 tons were used or sold directly for use to the farmer and other such consumers. In other words, 1,069 tons moved into the hands of secondary manufacturers for further use in manufacturing complete feeds. In order to obtain the finished feeds resulting from the conversion of 1,069 tons of Dairy and Cattle concentrates, we make use of the conversion factor as follows:

1,069 x 6.0 = 6,414 tons of Dairy and Cattle Feeds.

Now turn to page 10 and you will see that the shipments of Dairy and Cattle Feeds in the province of Quebec in the same month amounted to 9,236 tons. The summary would appear as follows:

Total shipments =	9,236 tons
Shipments by secondary manufacturers (1) =	6,414 tons
Shipments by manufacturers (2) =	2,822 tons

In order to assess the proportion of total feed shipments, which your firm enjoys, the following instructions are important. In terms of concentrates, the concentrate manufacturer would divide the total Dairy and Cattle feeds shipped in the province of Quebec (9,236 tons) by 6.0 and add 330 tons of concentrates moving out of the industry thus:

$$\frac{9,236}{6.0} = 1,539 + 330 = 1,869 \text{ tons}$$

To the above he would relate his total shipments of Dairy and Cattle concentrates for the province of Quebec during the same period.

In terms of complete feeds, the complete feeds manufacturer (including franchise operators) would assess their share of the market by determining, in the following manner, the total supply of finished feeds:

Total commercial feeds shipped		9,236 tons (see page 10)
Estimated feeds produced from concentrates sold outside the industry from which would be	330 x 6.0 =	1,980 tons (see page 4)
Total supply of finished feeds used as finished feeds or in the form of concentrates		11,216 tons

(1) Includes franchise operators and those secondary manufacturers who use concentrates to manufacture complete feeds.

(2) Includes manufacturers who produce finished feeds directly from raw materials.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

In October, 1947 the Dominion Bureau of Statistics, in co-operation with the National Council of the Canadian Feed Manufacturers' Association, commenced a survey on a sample basis of Shipments of Prepared Stock and Poultry Feeds, showing export shipments as well as provincial destinations in Canada.

By 1950 the monthly survey on Shipments assumed real value since it formed a basis of comparing current months with corresponding months of the previous year. Because it was still difficult to estimate certain individual commodities reliably, the coverage of the survey was increased to 200 firms in 1951 and became representative of about 76% of the total volume of the industry. This series was presented on an index basis up to the end of 1953.

During 1953 the feeds industry desired volume figures which would reveal the actual disappearance into the hands of ultimate consumers. The result is the current survey which is produced from monthly returns of all primary manufacturers of concentrates together with returns of a sample survey of manufacturers who use raw ingredients in their finished feeds.

The information presented in this report has been arranged as follows:

Table 1 presents the total annual production of Primary and Secondary or complete feeds in Canada for 1956 together with an estimate of production for the calendar year 1957 and as well the production for the current month in 1957 and 1958 with cumulative totals for 1957 and 1958.

Table 2 shows the 1958 shipments of primary or concentrated feeds by principal commodities, provincial destination and export. Column (a) gives the total shipments of all concentrates while column (b) gives the shipments of concentrates moving out of the Industry in their original form. The difference between column (a) and column (b) shows the amount of primary feeds used by the secondary feed manufacturers in producing complete feeds. Factor No. 2, which will convert concentrates to feeds is included respectively in brackets after the title of each concentrate. (See pages 4, 6 and 8). How to use these factors is explained on page 21.

Table 3 shows the volume of monthly shipments of secondary or complete feeds by principal commodities, provincial destination and export. Using conversion factors provided by all firms in the primary survey, the resulting volume of feeds has been added to those totals reported by firms which manufacture finished feeds from raw materials. The volume of feeds, shown in this section, therefore, represents the estimated total feeds shipped by all types of manufacturers including franchise operators and independent manufacturers who purchase concentrates from primary manufacturers. Factor No. 1, which will show the proportion of concentrates moving out of the Industry is shown on page 20.

Table 4 presents the volume of shipments by manufacturers of other types of stock feeds by principal commodities, provincial destination and export. In this section specialized feeds such as dog and cat foods, mineral mixtures, etc., are the result of 100% survey of the producing industry. Other commodities are estimated on a sample basis.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

CLASSIFICATION OF FEEDS

A complete feed is a formulated feed to be fed as is, and may be in the form of mash, pellets, crumbles, cubes, etc. For your assistance in classifying these commodities, the following explanation is offered:

1. Calf concentrates - Any concentrate or making a complete Calf Feed.

2. Dairy and Cattle concentrates - Any concentrate 24% protein or higher for Cattle or Dairy Cows.

3. Swine concentrates - Any concentrate 35% protein or higher for swine.

4. Poultry Concentrates:
   (a) Chick Starter Concentrates - Any concentrate for making a complete Chick Starter.
   (b) Broiler Concentrates - Any concentrate for making a complete Broiler Feed.
   (c) Growing Concentrates - Any concentrate for making a complete feed for growing chickens.
   (d) Laying and Hatching Concentrates - Any concentrate for making a complete feed for laying hens.
   (e) Fattening and Finishing Concentrates - Any concentrate for making a complete fattening feed for fowl other than Broilers or Turkeys.
   (f) Turkey Concentrates - Any concentrate for making a complete turkey feed.
   (g) Other Concentrates - Any concentrate for Poultry not covered by any other classification.

5. Calf feeds - Any complete feed for calves up to 5 months of age.

6. Dairy and Cattle Feeds - Any complete feed under 24% protein for Cattle or Dairy Cows but excluding Calf Feeds.

7. Swine Feeds - Any complete swine feed under 35% protein.

8. Poultry Feeds:
   (a) Chick Starter Feeds - Any complete feed for starting chickens other than Broilers.
   (b) Broilers Feeds - Any complete feed for starting, growing or finishing Broilers.
   (c) Growing Feeds - Any complete feed for growing chickens.
   (d) Laying and Hatching Feeds - Any complete feed for laying hens.
   (e) Fattening and Finishing Feeds - Any complete feed for fattening cockerels, capons or other fowl other than broilers and turkeys and excluding Scratch Grains.
   (f) Turkey Feeds - Any complete feed for starting, growing or finishing turkeys.
   (g) Other Complete Feeds - Any complete feed for pheasants, ducks or other poultry and not covered by any other classification.

11. Dog and Cat Foods:
   (b) Biscuits - Kibble and all baked products.
   (c) Meal - Pellets, cubes and other forms.

12. Scratch Grains - Any mixture of Whole or Cracked Grains only for Poultry.

13. Other Animal Feeds - Such as Horse Feed, Rabbit Feed, etc.

FACTORS USED IN DETERMINING QUANTITIES OF CONCENTRATES MOVING INTO SECONDARY INDUSTRY

	Shipped to or sold in										
	Newfound-land	Prince Edward Island	Nova Scotia	New Brunswick	Quebec	Ontario	Manitoba	Saskat-chewan	Alberta	British Columbia	Export
Primary or Concentrated Feeds											
1. Calf Concentrates	0	.914	.769	.538	.849	.868	.809	.750	.707	.666	0
2. Dairy and Cattle Concentrates	1.000	.592	.648	.460	.764	.415	.268	.215	.296	.041	.190
3. Swine Concentrates	.647	.598	.536	.546	.821	.480	.233	.250	.270	.208	.700
4. Poultry Concentrates											
(a) Chick Starter Concentrates	0	1.000	.750	.670	.919	.904	.725	.868	.969	1.000	1.000
(b) Broiler Concentrates	0	.607	.877	.019	.999	.968	.485	0	.861	1.000	.500
(c) Growing Concentrates	.500	.692	.674	.544	.797	.726	.217	.182	.260	.297	.712
(d) Laying and Hatching Concentrates	0	.741	.740	.581	.866	.562	.206	.089	.186	.098	.697
(e) Fattening & Finishing Concontrates	0	.882	.231	.412	.923	.673	.129	0	.338	.666	0
(f) Turkey Concentrates	0	1.000	.962	.395	.965	.887	.295	.342	.278	.361	0
(g) Other Poultry Concentrates	0	.246	.116	.596	.258	.429	.019	0	1.000	0	.333

In converting concentrates to finished feeds, the Bureau uses the above factors to establish the amount of concentrates which moved into the secondary manufacturing industry, as such. These factors were established from the returns of all firms in the survey and reflect the weighted average above, which we use for a current 12 months reports. If you agree that changes should be made in any of these factors, you should advise us at once whether or not you think the factor is low or high.

From the above, you will notice that 86.8 per cent of the calf concentrates shipped in the province of Ontario in any month during 1954 moved into the hands of franchise operators and other manufacturers who make feeds from concentrates. The balance, or 13.2 per cent, moved out of the industry and was used by farmers and other similar consumers directly.

Factor No. 2, which will turn concentrates into finished feeds, is given on pages 4, 6 and 8 in brackets after the name of each commodity.

HOW TO USE THE CONVERSION FACTORS

You will note on page 4 that the industry reported they had shipped in the province of Quebec for January, 1958 1,533 tons of Dairy and Cattle concentrates, of which 362 tons were used or sold directly for use to the farmer and other such consumers. In other words, 1,171 tons moved into the hands of secondary manufacturers for further use in manufacturing complete feeds. In order to obtain the finished feeds resulting from the conversion of 1,171 tons of Dairy and Cattle concentrates, we make use of the conversion factor as follows:

1,171 x 6.0 = 7,026 tons of Dairy and Cattle Feeds.

Now turn to page 10 and you will see that the shipments of Dairy and Cattle Feeds in the province of Quebec in the same month amounted to 9,643 tons. The summary would appear as follows.

Total shipments = 9,643 tons

Shipments by secondary manufacturers (1) = 7,026 tons

Shipments by manufacturers (2) = 2,617 tons

In order to assess the proportion of total feed shipments, which your firm enjoys, the following instructions are important. In terms of concentrates, the concentrate manufacturer would divide the total Dairy and Cattle feeds shipped in the province of Quebec (9,643 tons) by 6.0 and add 362 tons of concentrates moving out of the industry thus:

$$\frac{9,643}{6.0} = 1,607 + 362 = 1,969 \text{ tons}$$

To the above he would relate his total shipments of Dairy and Cattle concentrates for the province of Quebec during the same period.

In terms of complete feeds, the complete feeds manufacturer (including franchise operators) would assess their share of the market by determining, in the following manner, the total supply of finished feeds:

Total commercial feeds shipped		9,643 tons (see page 10)
Estimated feeds produced from concentrates sold outside the industry from which would be	362 x 6.0 =	2,172 tons (see page 4)
Total supply of finished feeds used as finished feeds or in the form of concentrates		11,815 tons

(1) Includes franchise operators and those secondary manufacturers who use concentrates to manufacture complete feeds.

(2) Includes manufacturers who produce finished feeds directly from raw materials.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

In October, 1947 the Dominion Bureau of Statistics, in co-operation with the National Council of the Canadian Feed Manufacturers' Association, commenced a survey on a sample basis of Shipments of Prepared Stock and Poultry Feeds, showing export shipments as well as provincial destinations in Canada.

By 1950 the monthly survey on Shipments assumed real value since it formed a basis of comparing current months with corresponding months of the previous year. Because it was still difficult to estimate certain individual commodities reliably, the coverage of the survey was increased to 200 firms in 1951 and became representative of about 76% of the total volume of the industry. This series was presented on an index basis up to the end of 1953.

During 1953 the feeds industry desired volume figures which would reveal the actual disappearance into the hands of ultimate consumers. The result is the current survey which is produced from monthly returns of all primary manufacturers of concentrates together with returns of a sample survey of manufacturers who use raw ingredients in their finished feeds.

The information presented in this report has been arranged as follows:

Table 1 presents the total annual production of Primary and Secondary or complete feeds in Canada for 1956 together with an estimate of production for the calendar year 1957 and as well the production for the current month in 1957 and 1958 with cumulative totals for 1957 and 1958.

Table 2 shows the 1958 shipments of primary or concentrated feeds by principal commodities, provincial destination and export. Column (a) gives the total shipments of all concentrates while column (b) gives the shipments of concentrates moving out of the Industry in their original form. The difference between column (a) and column (b) shows the amount of primary feeds used by the secondary feed manufacturers in producing complete feeds. Factor No. 2, which will convert concentrates to feeds is included respectively in brackets after the title of each concentrate. (See pages 4, 6 and 8). How to use these factors is explained on page 21.

Table 3 shows the volume of monthly shipments of secondary or complete feeds by principal commodities, provincial destination and export. Using conversion factors provided by all firms in the primary survey, the resulting volume of feeds has been added to those totals reported by firms which manufacture finished feeds from raw materials. The volume of feeds, shown in this section, therefore, represents the estimated total feeds shipped by all types of manufacturers including franchise operators and independent manufacturers who purchase concentrates from primary manufacturers. Factor No. 1, which will show the proportion of concentrates moving out of the Industry is shown on page 20.

Table 4 presents the volume of shipments by manufacturers of other types of stock feeds by principal commodities, provincial destination and export. In this section specialized feeds such as dog and cat foods, mineral mixtures, etc., are the result of 100% survey of the producing industry. Other commodities are estimated on a sample basis.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

CLASSIFICATION OF FEEDS

A complete feed is a formulated feed to be fed as is, and may be in the form of mash, pellets, crumbles, cubes, etc. For your assistance in classifying these commodities, the following explanation is offered:

1. Calf concentrates - Any concentrate or making a complete Calf Feed.

2. Dairy and Cattle concentrates - Any concentrate 24% protein or higher for Cattle or Dairy Cows.

3. Swine concentrates - Any concentrate 35% protein or higher for swine.

4. Poultry Concentrates:
   (a) Chick Starter Concentrates - Any concentrate for making a complete Chick Starter.
   (b) Broiler Concentrates - Any concentrate for making a complete Broiler Feed.
   (c) Growing Concentrates - Any concentrate for making a complete feed for growing chickens.
   (d) Laying and Hatching Concentrates - Any concentrate for making a complete feed for laying hens.
   (e) Fattening and Finishing Concentrates - Any concentrate for making a complete fattening feed for fowl other than Broilers or Turkeys.
   (f) Turkey Concentrates - Any concentrate for making a complete turkey feed.
   (g) Other Concentrates - Any concentrate for Poultry not covered by any other classification.

5. Calf feeds - Any complete feed for calves up to 5 months of age.

6. Dairy and Cattle Feeds - Any complete feed under 24% protein for Cattle or Dairy Cows but excluding Calf Feeds.

7. Swine Feeds - Any complete swine feed under 35% protein.

8. Poultry Feeds:
   (a) Chick Starter Feeds - Any complete feed for starting chickens other than Broilers.
   (b) Broilers Feeds - Any complete feed for starting, growing or finishing Broilers.
   (c) Growing Feeds - Any complete feed for growing chickens.
   (d) Laying and Hatching Feeds - Any complete feed for laying hens.
   (e) Fattening and Finishing Feeds - Any complete feed for fattening cockerels, capons or other fowl other than broilers and turkeys and excluding Scratch Grains.
   (f) Turkey Feeds - Any complete feed for starting, growing or finishing turkeys.
   (g) Other Complete Feeds - Any complete feed for pheasants, ducks or other poultry and not covered by any other classification.

11. Dog and Cat Foods:
   (b) Biscuits - Kibble and all baked products.
   (c) Meal - Pellets, cubes and other forms.

12. Scratch Grains - Any mixture of Whole or Cracked Grains only for Poultry.

13. Other Animal Feeds - Such as Horse Feed, Rabbit Feed, etc.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 1 - Production of Prepared Stock and Poultry Feeds in Canada 1956 together with estimated comparable data for 1957. Current monthly production accompanied by cumulative totals for 1957 and 1958 reported in columns (3), (4), (5), and (6) respectively.

FACTORS USED IN DETERMINING QUANTITIES OF CONCENTRATES MOVING INTO SECONDARY INDUSTRY

	Shipped to or sold in										
	Newfound-land	Prince Edward Island	Nova Scotia	New Brunswick	Quebec	Ontario	Manitoba	Saskat-chewan	Alberta	British Columbia	Export
Primary or Concentrated Feeds											
1. Calf Concentrates	0	.914	.769	.538	.849	.868	.809	.750	.707	.666	0
2. Dairy and Cattle Concentrates	1.000	.592	.648	.460	.764	.415	.268	.215	.296	.041	.190
3. Swine Concentrates	.647	.598	.536	.546	.821	.480	.233	.250	.270	.208	.700
4. Poultry Concentrates											
(a) Chick Starter Concentrates	0	1.000	.750	.670	.919	.904	.725	.868	.969	1.000	1.000
(b) Broiler Concentrates	0	.607	.877	.019	.999	.968	.485	0	.861	1.000	.500
(c) Growing Concentrates	.500	.692	.674	.544	.797	.726	.217	.182	.260	.297	.712
(d) Laying and Hatching Concentrates	0	.741	.740	.581	.866	.562	.206	.089	.186	.098	.697
(e) Fattening & Finishing Concontrates	0	.882	.231	.412	.923	.673	.129	0	.338	.666	0
(f) Turkey Concentrates	0	1.000	.962	.395	.965	.887	.295	.342	.278	.361	0
(g) Other Poultry Concentrates	0	.246	.116	.596	.258	.429	.019	0	1.000	0	.333

In converting concentrates to finished feeds, the Bureau uses the above factors to establish the amount of concentrates which moved into the secondary manufacturing industry, as such. These factors were established from the returns of all firms in the survey and reflect the weighted average above, which we use for a current 12 months reports. If you agree that changes should be made in any of these factors, you should advise us at once whether or not you think the factor is low or high.

From the above, you will notice that 86.8 per cent of the calf concentrates shipped in the province of Ontario in any mont during 1954 moved into the hands of franchise operators and other manufacturers who make feeds from concentrates. The balance, or 13.2 per cent, moved out of the industry and was used by farmers and other similar consumers directly.

Factor No. 2, which will turn concentrates into finished feeds, is given on pages 4, 6 and 8 in brackets after the name of each commodity.

HOW TO USE THE CONVERSION FACTORS

You will note on page 4 that the industry reported they had shipped in the province of Quebec for January, 1958 1,533 tons of Dairy and Cattle concentrates, of which 362 tons were used or sold directly for use to the farmer and other such consumers. In other words, 1,171 tons moved into the hands of secondary manufacturers for further use in manufacturing complete feeds. In order to obtain the finished feeds resulting from the conversion of 1,171 tons of Dairy and Cattle concentrates, we make use of the conversion factor as follows:

1,171 x 6.0 = 7,026 tons of Dairy and Cattle Feeds.

Now turn to page 10 and you will see that the shipments of Dairy and Cattle Feeds in the province of Quebec in the same month amounted to 9,643 tons. The summary would appear as follows.

Total shipments = 9,643 tons

Shipments by secondary manufacturers (1) = 7,026 tons

Shipments by manufacturers (2) = 2,617 tons

In order to assess the proportion of total feed shipments, which your firm enjoys, the following instructions are important. In terms of concentrates, the concentrate manufacturer would divide the total Dairy and Cattle feeds shipped in the province of Quebec (9,643 tons) by 6.0 and add 362 tons of concentrates moving out of the industry thus:

$$\frac{9,643}{6.0} = 1,607 + 362 = 1,969 \text{ tons}$$

To the above he would relate his total shipments of Dairy and Cattle concentrates for the province of Quebec during the same period.

In terms of complete feeds, the complete feeds manufacturer (including franchise operators) would assess their share of the market by determining, in the following manner, the total supply of finished feeds:

Total commercial feeds shipped		9,643 tons (see page 10)
Estimated feeds produced from concentrates sold outside the industry from which would be	362 x 6.0 =	2,172 tons (see page 4)
Total supply of finished feeds used as finished feeds or in the form of concentrates		11,815 tons

(1) Includes franchise operators and those secondary manufacturers who use concentrates to manufacture complete feeds.

(2) Includes manufacturers who produce finished feeds directly from raw materials.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

In October, 1947 the Dominion Bureau of Statistics, in co-operation with the National Council of the Canadian Feed Manufacturers' Association, commenced a survey on a sample basis of Shipments of Prepared Stock and Poultry Feeds, showing export shipments as well as provincial destinations in Canada.

By 1950 the monthly survey on Shipments assumed real value since it formed a basis of comparing current months with corresponding months of the previous year. Because it was still difficult to estimate certain individual commodities reliably, the coverage of the survey was increased to 200 firms in 1951 and became representative of about 76% of the total volume of the industry. This series was presented on an index basis up to the end of 1953.

During 1953 the feeds industry desired volume figures which would reveal the actual disappearance into the hands of ultimate consumers. The result is the current survey which is produced from monthly returns of all primary manufacturers of concentrates together with returns of a sample survey of manufacturers who use raw ingredients in their finished feeds.

The information presented in this report has been arranged as follows:

Table 1 presents the total annual production of Primary and Secondary or complete feeds in Canada for 1956 together with an estimate of production for the calendar year 1957 and as well the production for the current month in 1957 and 1958 with cumulative totals for 1957 and 1958.

Table 2 shows the 1958 shipments of primary or concentrated feeds by principal commodities, provincial destination and export. Column (a) gives the total shipments of all concentrates while column (b) gives the shipments of concentrates moving out of the Industry in their original form. The difference between column (a) and column (b) shows the amount of primary feeds used by the secondary feed manufacturers in producing complete feeds. Factor No. 2, which will convert concentrates to feeds is included respectively in brackets after the title of each concentrate. (See pages 4, 6 and 8). How to use these factors is explained on page 21.

Table 3 shows the volume of monthly shipments of secondary or complete feeds by principal commodities, provincial destination and export. Using conversion factors provided by all firms in the primary survey, the resulting volume of feeds has been added to those totals reported by firms which manufacture finished feeds from raw materials. The volume of feeds, shown in this section, therefore, represents the estimated total feeds shipped by all types of manufacturers including franchise operators and independent manufacturers who purchase concentrates from primary manufacturers. Factor No. 1, which will show the proportion of concentrates moving out of the Industry is shown on page 20.

Table 4 presents the volume of shipments by manufacturers of other types of stock feeds by principal commodities, provincial destination and export. In this section specialized feeds such as dog and cat foods, mineral mixtures, etc., are the result of 100% survey of the producing industry. Other commodities are estimated on a sample basis.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

CLASSIFICATION OF FEEDS

A complete feed is a formulated feed to be fed as is, and may be in the form of mash, pellets, crumbles, cubes, etc. For your assistance in classifying these commodities, the following explanation is offered:

1. Calf concentrates - Any concentrate or making a complete Calf Feed.

2. Dairy and Cattle concentrates - Any concentrate 24% protein or higher for Cattle or Dairy Cows.

3. Swine concentrates - Any concentrate 35% protein or higher for swine.

4. Poultry Concentrates:
   (a) Chick Starter Concentrates - Any concentrate for making a complete Chick Starter.
   (b) Broiler Concentrates - Any concentrate for making a complete Broiler Feed.
   (c) Growing Concentrates - Any concentrate for making a complete feed for growing chickens.
   (d) Laying and Hatching Concentrates - Any concentrate for making a complete feed for laying hens.
   (e) Fattening and Finishing Concentrates - Any concentrate for making a complete fattening feed for fowl other than Broilers or Turkeys.
   (f) Turkey Concentrates - Any concentrate for making a complete turkey feed.
   (g) Other Concentrates - Any concentrate for Poultry not covered by any other classification.

5. Calf feeds - Any complete feed for calves up to 5 months of age.

6. Dairy and Cattle Feeds - Any complete feed under 24% protein for Cattle or Dairy Cows but excluding Calf Feeds.

7. Swine Feeds - Any complete swine feed under 35% protein.

8. Poultry Feeds:
   (a) Chick Starter Feeds - Any complete feed for starting chickens other than Broilers.
   (b) Broilers Feeds - Any complete feed for starting, growing or finishing Broilers.
   (c) Growing Feeds - Any complete feed for growing chickens.
   (d) Laying and Hatching Feeds - Any complete feed for laying hens.
   (e) Fattening and Finishing Feeds - Any complete feed for fattening cockerels, capons or other fowl other than broilers and turkeys and excluding Scratch Grains.
   (f) Turkey Feeds - Any complete feed for starting, growing or finishing turkeys.
   (g) Other Complete Feeds - Any complete feed for pheasants, ducks or other poultry and not covered by any other classification.

11. Dog and Cat Foods:
   (b) Biscuits - Kibble and all baked products.
   (c) Meal - Pellets, cubes and other forms.

12. Scratch Grains - Any mixture of Whole or Cracked Grains only for Poultry.

13. Other Animal Feeds - Such as Horse Feed, Rabbit Feed, etc.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 1 - Production of Prepared Stock and Poultry Feeds in Canada 1956 together with estimated comparable data for 1957. Current monthly production accompanied by cumulative totals for 1957 and 1958 reported in columns (3), (4), (5), and (6) respectively.

FACTORS USED IN DETERMINING QUANTITIES OF CONCENTRATES MOVING INTO SECONDARY INDUSTRY

	Shipped to or sold in										
	Newfound-land	Prince Edward Island	Nova Scotia	New Brunswick	Quebec	Ontario	Manitoba	Saskat-chewan	Alberta	British Columbia	Export
Primary or Concentrated Feeds											
1. Calf Concentrates	0	.914	.769	.538	.849	.868	.809	.750	.707	.666	0
2. Dairy and Cattle Concentrates	1.000	.592	.648	.460	.764	.415	.268	.215	.296	.041	.190
3. Swine Concentrates ..,.....	.647	.598	.536	.546	.821	.480	.233	.250	.270	.208	.700
4. Poultry Concentrates											
(a) Chick Starter Concentrates	0	1.000	.750	.670	.919	.904	.725	.868	.969	1.000	1.000
(b) Broiler Concentrates	0	.607	.877	.019	.999	.968	.485	0	.861	1.000	.500
(c) Growing Concentrates	.500	.692	.674	.544	.797	.726	.217	.182	.260	.297	.712
(d) Laying and Hatching Concentrates	0	.741	.740	.581	.866	.562	.206	.089	.186	.098	.697
(e) Fattening & Finishing Concontrates	0	.882	.231	.412	.923	.673	.129	0	.338	.666	0
(f) Turkey Concentrates	0	1.000	.962	.395	.965	.887	.295	.342	.278	.361	0
(g) Other Poultry Concentrates	0	.246	.116	.596	.258	.429	.019	0	1.000	0	.333

In converting concentrates to finished feeds, the Bureau uses the above factors to establish the amount of concentrates which moved into the secondary manufacturing industry, as such. These factors were established from the returns of all firms in the survey and reflect the weighted average above, which we use for a current 12 months reports. If you agree that changes should be made in any of these factors, you should advise us at once whether or not you think the factor is low or high.

From the above, you will notice that 86.8 per cent of the calf concentrates shipped in the province of Ontario in any month during 1954 moved into the hands of franchise operators and other manufacturers who make feeds from concentrates. The balance, or 13.2 per cent, moved out of the industry and was used by farmers and other similar consumers directly.

Factor No. 2, which will turn concentrates into finished feeds, is given on pages 4, 6 and 8 in brackets after the name of each commodity.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 4 - ALL OTHER ANIMAL FEEDS. Volume of monthly shipments of other prepared stock feeds by principal commodities, provincial destination and export, 1957 - 1958, shown in tons. (Concluded)

HOW TO USE THE CONVERSION FACTORS

You will note on page 4 that the industry reported they had shipped in the province of Quebec for January, 1958 1,533 tons of Dairy and Cattle concentrates, of which 362 tons were used or sold directly for use to the farmer and other such consumers. In other words, 1,171 tons moved into the hands of secondary manufacturers for further use in manufacturing complete feeds. In order to obtain the finished feeds resulting from the conversion of 1,171 tons of Dairy and Cattle concentrates, we make use of the conversion factor as follows:

1,171 x 6.0 = 7,026 tons of Dairy and Cattle Feeds.

Now turn to page 10 and you will see that the shipments of Dairy and Cattle Feeds in the province of Quebec in the same month amounted to 9,643 tons. The summary would appear as follows.

Total shipments = 9,643 tons

Shipments by secondary manufacturers (1) = 7,026 tons

Shipments by manufacturers (2) = 2,617 tons

In order to assess the proportion of total feed shipments, which your firm enjoys, the following instructions are important. In terms of concentrates, the concentrate manufacturer would divide the total Dairy and Cattle feeds shipped in the province of Quebec (9,643 tons) by 6.0 and add 362 tons of concentrates moving out of the industry thus:

$$\frac{9,643}{6.0} = 1,607 + 362 = 1,969 \text{ tons}$$

To the above he would relate his total shipments of Dairy and Cattle concentrates for the province of Quebec during the same period.

In terms of complete feeds, the complete feeds manufacturer (including franchise operators) would assess their share of the market by determining, in the following manner, the total supply of finished feeds:

Total commercial feeds shipped		9,643 tons (see page 10)
Estimated feeds produced from concentrates sold outside the industry from which would be	362 x 6.0 =	2,172 tons (see page 4)
Total supply of finished feeds used as finished feeds or in the form of concentrates		11,815 tons

(1) Includes franchise operators and those secondary manufacturers who use concentrates to manufacture complete feeds.

(2) Includes manufacturers who produce finished feeds directly from raw materials.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

In October, 1947 the Dominion Bureau of Statistics, in co-operation with the National Council of the Canadian Feed Manufacturers' Association, commenced a survey on a sample basis of Shipments of Prepared Stock and Poultry Feeds, showing export shipments as well as provincial destinations in Canada.

By 1950 the monthly survey on Shipments assumed real value since it formed a basis of comparing current months with corresponding months of the previous year. Because it was still difficult to estimate certain individual commodities reliably, the coverage of the survey was increased to 200 firms in 1951 and became representative of about 76% of the total volume of the industry. This series was presented on an index basis up to the end of 1953.

During 1953 the feeds industry desired volume figures which would reveal the actual disappearance into the hands of ultimate consumers. The result is the current survey which is produced from monthly returns of all primary manufacturers of concentrates together with returns of a sample survey of manufacturers who use raw ingredients in their finished feeds.

The information presented in this report has been arranged as follows:

Table 1 presents the total annual production of Primary and Secondary or complete feeds in Canada for 1956 together with an estimate of production for the calendar year 1957 and as well the production for the current month in 1957 and 1958 with cumulative totals for 1957 and 1958.

Table 2 shows the 1958 shipments of primary or concentrated feeds by principal commodities, provincial destination and export. Column (a) gives the total shipments of all concentrates while column (b) gives the shipments of concentrates moving out of the Industry in their original form. The difference between column (a) and column (b) shows the amount of primary feeds used by the secondary feed manufacturers in producing complete feeds. Factor No. 2, which will convert concentrates to feeds is included respectively in brackets after the title of each concentrate. (See pages 4, 6 and 8). How to use these factors is explained on page 21.

Table 3 shows the volume of monthly shipments of secondary or complete feeds by principal commodities, provincial destination and export. Using conversion factors provided by all firms in the primary survey, the resulting volume of feeds has been added to those totals reported by firms which manufacture finished feeds from raw materials. The volume of feeds, shown in this section, therefore, represents the estimated total feeds shipped by all types of manufacturers including franchise operators and independent manufacturers who purchase concentrates from primary manufacturers. Factor No. 1, which will show the proportion of concentrates moving out of the Industry is shown on page 20.

Table 4 presents the volume of shipments by manufacturers of other types of stock feeds by principal commodities, provincial destination and export. In this section specialized feeds such as dog and cat foods, mineral mixtures, etc., are the result of 100% survey of the producing industry. Other commodities are estimated on a sample basis.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

CLASSIFICATION OF FEEDS

A complete feed is a formulated feed to be fed as is, and may be in the form of mash, pellets, crumbles, cubes, etc. For your assistance in classifying these commodities, the following explanation is offered:

1. Calf concentrates - Any concentrate or making a complete Calf Feed.

2. Dairy and Cattle concentrates - Any concentrate 24% protein or higher for Cattle or Dairy Cows.

3. Swine concentrates - Any concentrate 35% protein or higher for swine.

4. Poultry Concentrates:
   (a) Chick Starter Concentrates - Any concentrate for making a complete Chick Starter.
   (b) Broiler Concentrates - Any concentrate for making a complete Broiler Feed.
   (c) Growing Concentrates - Any concentrate for making a complete feed for growing chickens.
   (d) Laying and Hatching Concentrates - Any concentrate for making a complete feed for laying hens.
   (e) Fattening and Finishing Concentrates - Any concentrate for making a complete fattening feed for fowl other than Broilers or Turkeys.
   (f) Turkey Concentrates - Any concentrate for making a complete turkey feed.
   (g) Other Concentrates - Any concentrate for Poultry not covered by any other classification.

5. Calf feeds - Any complete feed for calves up to 5 months of age.

6. Dairy and Cattle Feeds - Any complete feed under 24% protein for Cattle or Dairy Cows but excluding Calf Feeds.

7. Swine Feeds - Any complete swine feed under 35% protein.

8. Poultry Feeds:
   (a) Chick Starter Feeds - Any complete feed for starting chickens other than Broilers.
   (b) Broilers Feeds - Any complete feed for starting, growing or finishing Broilers.
   (c) Growing Feeds - Any complete feed for growing chickens.
   (d) Laying and Hatching Feeds - Any complete feed for laying hens.
   (e) Fattening and Finishing Feeds - Any complete feed for fattening cockerels, capons or other fowl other than broilers and turkeys and excluding Scratch Grains.
   (f) Turkey Feeds - Any complete feed for starting, growing or finishing turkeys.
   (g) Other Complete Feeds - Any complete feed for pheasants, ducks or other poultry and not covered by any other classification.

11. Dog and Cat Foods:
   (b) Biscuits - Kibble and all baked products.
   (c) Meal - Pellets, cubes and other forms.

12. Scratch Grains - Any mixture of Whole or Cracked Grains only for Poultry.

13. Other Animal Feeds - Such as Horse Feed, Rabbit Feed, etc.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 1 - Production of Prepared Stock and Poultry Feeds in Canada 1956 together with estimated comparable data for 1957. Current monthly production accompanied by cumulative totals for 1957 and 1958 reported in columns (3), (4), (5), and (6) respectively.

Primary or Concentrated Feeds											
1. Calf Concentrates	0	.914	.769	.538	.849	.868	.809	.750	.707	.666	0
2. Dairy and Cattle Concentrates	1.000	.592	.648	.460	.764	.415	.268	.215	.296	.041	.190
3. Swine Concentrates	.647	.598	.536	.546	.821	.480	.233	.250	.270	.208	.700
4. Poultry Concentrates											
(a) Chick Starter Concentrates	0	1.000	.750	.670	.919	.904	.725	.868	.969	1.000	1.000
(b) Broiler Concentrates	0	.607	.877	.019	.999	.968	.485	0	.861	1.000	.500
(c) Growing Concentrates	.500	.692	.674	.544	.797	.726	.217	.182	.260	.297	.712
(d) Laying and Hatching Concentrates	0	.741	.740	.581	.866	.562	.206	.089	.186	.098	.697
(e) Fattening & Finishing Concentrates	0	.882	.231	.412	.923	.673	.129	0	.338	.666	0
(f) Turkey Concentrates	0	1.000	.962	.395	.965	.887	.295	.342	.278	.361	0
(g) Other Poultry Concentrates	0	.246	.116	.596	.258	.429	.019	0	1.000	0	.333

In converting concentrates to finished feeds, the Bureau uses the above factors to establish the amount of concentrates which moved into the secondary manufacturing industry, as such. These factors were established from the returns of all firms in the survey and reflect the weighted average above, which we use for a current 12 months reports. If you agree that changes should be made in any of these factors, you should advise us at once whether or not you think the factor is low or high.

From the above, you will notice that 86.8 per cent of the calf concentrates shipped in the province of Ontario in any month during 1954 moved into the hands of franchise operators and other manufacturers who make feeds from concentrates. The balance, or 13.2 per cent, moved out of the industry and was used by farmers and other similar consumers directly.

Factor No. 2, which will turn concentrates into finished feeds, is given on pages 4, 6 and 8 in brackets after the name of each commodity.

HOW TO USE THE CONVERSION FACTORS

You will note on page 4 that the industry reported they had shipped in the province of Quebec for January, 1958 1,533 tons of Dairy and Cattle concentrates, of which 362 tons were used or sold directly for use to the farmer and other such consumers. In other words, 1,171 tons moved into the hands of secondary manufacturers for further use in manufacturing complete feeds. In order to obtain the finished feeds resulting from the conversion of 1,171 tons of Dairy and Cattle concentrates, we make use of the conversion factor as follows:

1,171 x 6.0 = 7,026 tons of Dairy and Cattle Feeds.

Now turn to page 10 and you will see that the shipments of Dairy and Cattle Feeds in the province of Quebec in the same month amounted to 9,643 tons. The summary would appear as follows.

Total shipments = 9,643 tons

Shipments by secondary manufacturers (1) = 7,026 tons

Shipments by manufacturers (2) = 2,617 tons

In order to assess the proportion of total feed shipments, which your firm enjoys, the following instructions are important. In terms of concentrates, the concentrate manufacturer would divide the total Dairy and Cattle feeds shipped in the province of Quebec (9,643 tons) by 6.0 and add 362 tons of concentrates moving out of the industry thus:

$$\frac{9,643}{6.0} = 1,607 + 362 = 1,969 \text{ tons}$$

To the above he would relate his total shipments of Dairy and Cattle concentrates for the province of Quebec during the same period.

In terms of complete feeds, the complete feeds manufacturer (including franchise operators) would assess their share of the market by determining, in the following manner, the total supply of finished feeds:

Total commercial feeds shipped		9,643 tons (see page 10)
Estimated feeds produced from concentrates sold outside the industry from which would be	362 x 6.0 =	2,172 tons (see page 4)
Total supply of finished feeds used as finished feeds or in the form of concentrates		11,815 tons

(1) Includes franchise operators and those secondary manufacturers who use concentrates to manufacture complete feeds.

(2) Includes manufacturers who produce finished feeds directly from raw materials.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

In October, 1947 the Dominion Bureau of Statistics, in co-operation with the National Council of the Canadian Feed Manufacturers' Association, commenced a survey on a sample basis of Shipments of Prepared Stock and Poultry Feeds, showing export shipments as well as provincial destinations in Canada.

By 1950 the monthly survey on Shipments assumed real value since it formed a basis of comparing current months with corresponding months of the previous year. Because it was still difficult to estimate certain individual commodities reliably, the coverage of the survey was increased to 200 firms in 1951 and became representative of about 76% of the total volume of the industry. This series was presented on an index basis up to the end of 1953.

During 1953 the feeds industry desired volume figures which would reveal the actual disappearance into the hands of ultimate consumers. The result is the current survey which is produced from monthly returns of all primary manufacturers of concentrates together with returns of a sample survey of manufacturers who use raw ingredients in their finished feeds.

The information presented in this report has been arranged as follows:

Table 1 presents the total annual production of Primary and Secondary or complete feeds in Canada for 1956 together with an estimate of production for the calendar year 1957 and as well the production for the current month in 1957 and 1958 with cumulative totals for 1957 and 1958.

Table 2 shows the 1958 shipments of primary or concentrated feeds by principal commodities, provincial destination and export. Column (a) gives the total shipments of all concentrates while column (b) gives the shipments of concentrates moving out of the Industry in their original form. The difference between column (a) and column (b) shows the amount of primary feeds used by the secondary feed manufacturers in producing complete feeds. Factor No. 2, which will convert concentrates to feeds is included respectively in brackets after the title of each concentrate. (See pages 4, 6 and 8). How to use these factors is explained on page 21.

Table 3 shows the volume of monthly shipments of secondary or complete feeds by principal commodities, provincial destination and export. Using conversion factors provided by all firms in the primary survey, the resulting volume of feeds has been added to those totals reported by firms which manufacture finished feeds from raw materials. The volume of feeds, shown in this section, therefore, represents the estimated total feeds shipped by all types of manufacturers including franchise operators and independent manufacturers who purchase concentrates from primary manufacturers. Factor No. 1, which will show the proportion of concentrates moving out of the Industry is shown on page 20.

Table 4 presents the volume of shipments by manufacturers of other types of stock feeds by principal commodities, provincial destination and export. In this section specialized feeds such as dog and cat foods, mineral mixtures, etc., are the result of 100% survey of the producing industry. Other commodities are estimated on a sample basis.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

CLASSIFICATION OF FEEDS

A complete feed is a formulated feed to be fed as is, and may be in the form of mash, pellets, crumbles, cubes, etc. For your assistance in classifying these commodities, the following explanation is offered:

1. Calf concentrates - Any concentrate or making a complete Calf Feed.

2. Dairy and Cattle concentrates - Any concentrate 24% protein or higher for Cattle or Dairy Cows.

3. Swine concentrates - Any concentrate 35% protein or higher for swine.

4. Poultry Concentrates:
   (a) Chick Starter Concentrates - Any concentrate for making a complete Chick Starter.
   (b) Broiler Concentrates - Any concentrate for making a complete Broiler Feed.
   (c) Growing Concentrates - Any concentrate for making a complete feed for growing chickens.
   (d) Laying and Hatching Concentrates - Any concentrate for making a complete feed for laying hens.
   (e) Fattening and Finishing Concentrates - Any concentrate for making a complete fattening feed for fowl other than Broilers or Turkeys.
   (f) Turkey Concentrates - Any concentrate for making a complete turkey feed.
   (g) Other Concentrates - Any concentrate for Poultry not covered by any other classification.

5. Calf feeds - Any complete feed for calves up to 5 months of age.

6. Dairy and Cattle Feeds - Any complete feed under 24% protein for Cattle or Dairy Cows but excluding Calf Feeds.

7. Swine Feeds - Any complete swine feed under 35% protein.

8. Poultry Feeds:
   (a) Chick Starter Feeds - Any complete feed for starting chickens other than Broilers.
   (b) Broilers Feeds - Any complete feed for starting, growing or finishing Broilers.
   (c) Growing Feeds - Any complete feed for growing chickens.
   (d) Laying and Hatching Feeds - Any complete feed for laying hens.
   (e) Fattening and Finishing Feeds - Any complete feed for fattening cockerels, capons or other fowl other than broilers and turkeys and excluding Scratch Grains.
   (f) Turkey Feeds - Any complete feed for starting, growing or finishing turkeys.
   (g) Other Complete Feeds - Any complete feed for pheasants, ducks or other poultry and not covered by any other classification.

11. Dog and Cat Foods:
   (b) Biscuits - Kibble and all baked products.
   (c) Meal - Pellets, cubes and other forms.

12. Scratch Grains - Any mixture of Whole or Cracked Grains only for Poultry.

13. Other Animal Feeds - Such as Horse Feed, Rabbit Feed, etc.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 1 - Production of Prepared Stock and Poultry Feeds in Canada 1956 together with estimated comparable data for 1957. Current monthly production accompanied by cumulative totals for 1957 and 1958 reported in columns (3), (4), (5), and (6) respectively.

FACTORS USED IN DETERMINING QUANTITIES OF CONCENTRATES MOVING INTO SECONDARY INDUSTRY

	Shipped to or sold in									
	Newfound-land	Prince Edward Island	Nova Scotia	New Brunswick	Quebec	Ontario	Manitoba	Saskat-chewan	Alberta	British Columbia	Export
Primary or Concentrated Feeds											
1. Calf Concentrates	0	.914	.769	.538	.849	.868	.809	.750	.707	.666	0
2. Dairy and Cattle Concentrates	1.000	.592	.648	.460	.764	.415	.268	.215	.296	.041	.190
3. Swine Concentrates	.647	.598	.536	.546	.821	.480	.233	.250	.270	.208	.700
4. Poultry Concentrates											
(a) Chick Starter Concentrates	0	1.000	.750	.670	.919	.904	.725	.868	.969	1.000	1.000
(b) Broiler Concentrates	0	.607	.877	.019	.999	.968	.485	0	.861	1.000	.500
(c) Growing Concentrates	.500	.692	.674	.544	.797	.726	.217	.182	.260	.297	.712
(d) Laying and Hatching Concentrates	0	.741	.740	.581	.866	.562	.206	.089	.186	.098	.697
(e) Fattening & Finishing Concontrates	0	.882	.231	.412	.923	.673	.129	0	.338	.666	0
(f) Turkey Concentrates	0	1.000	.962	.395	.965	.887	.295	.342	.278	.361	0
(g) Other Poultry Concentrates	0	.246	.116	.596	.258	.429	.019	0	1.000	0	.333

In converting concentrates to finished feeds, the Bureau uses the above factors to establish the amount of concentrates which moved into the secondary manufacturing industry, as such. These factors were established from the returns of all firms in the survey and reflect the weighted average above, which we use for a current 12 months reports. If you agree that changes should be made in any of these factors, you should advise us at once whether or not you think the factor is low or high.

From the above, you will notice that 86.8 per cent of the calf concentrates shipped in the province of Ontario in any mont during 1954 moved into the hands of franchise operators and other manufacturers who make feeds from concentrates. The balance, or 13.2 per cent, moved out of the industry and was used by farmers and other similar consumers directly.

Factor No. 2, which will turn concentrates into finished feeds, is given on pages 4, 6 and 8 in brackets after the name of each commodity.

HOW TO USE THE CONVERSION FACTORS

You will note on page 4 that the industry reported they had shipped in the province of Quebec for January, 1958 1,533 tons of Dairy and Cattle concentrates, of which 362 tons were used or sold directly for use to the farmer and other such consumers. In other words, 1,171 tons moved into the hands of secondary manufacturers for further use in manufacturing complete feeds. In order to obtain the finished feeds resulting from the conversion of 1,171 tons of Dairy and Cattle concentrates, we make use of the conversion factor as follows:

1,171 x 6.0 = 7,026 tons of Dairy and Cattle Feeds.

Now turn to page 10 and you will see that the shipments of Dairy and Cattle Feeds in the province of Quebec in the same month amounted to 9,643 tons. The summary would appear as follows.

Total shipments = 9,643 tons

Shipments by secondary manufacturers (1) = 7,026 tons

Shipments by manufacturers (2) = 2,617 tons

In order to assess the proportion of total feed shipments, which your firm enjoys, the following instructions are important. In terms of concentrates, the concentrate manufacturer would divide the total Dairy and Cattle feeds shipped in the province of Quebec (9,643 tons) by 6.0 and add 362 tons of concentrates moving out of the industry thus:

$$\frac{9,643}{6.0} = 1,607 + 362 = 1,969 \text{ tons}$$

To the above he would relate his total shipments of Dairy and Cattle concentrates for the province of Quebec during the same period.

In terms of complete feeds, the complete feeds manufacturer (including franchise operators) would assess their share of the market by determining, in the following manner, the total supply of finished feeds:

Total commercial feeds shipped		9,643 tons (see page 10)
Estimated feeds produced from concentrates sold outside the industry from which would be	362 x 6.0 =	2,172 tons (see page 4)
Total supply of finished feeds used as finished feeds or in the form of concentrates		11,815 tons

(1) Includes franchise operators and those secondary manufacturers who use concentrates to manufacture complete feeds.

(2) Includes manufacturers who produce finished feeds directly from raw materials.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

In October, 1947 the Dominion Bureau of Statistics, in co-operation with the National Council of the Canadian Feed Manufacturers' Association, commenced a survey on a sample basis of Shipments of Prepared Stock and Poultry Feeds, showing export shipments as well as provincial destinations in Canada.

By 1950 the monthly survey on Shipments assumed real value since it formed a basis of comparing current months with corresponding months of the previous year. Because it was still difficult to estimate certain individual commodities reliably, the coverage of the survey was increased to 200 firms in 1951 and became representative of about 76% of the total volume of the industry. This series was presented on an index basis up to the end of 1953.

During 1953 the feeds industry desired volume figures which would reveal the actual disappearance into the hands of ultimate consumers. The result is the current survey which is produced from monthly returns of all primary manufacturers of concentrates together with returns of a sample survey of manufacturers who use raw ingredients in their finished feeds.

The information presented in this report has been arranged as follows:

Table 1 presents the total annual production of Primary and Secondary or complete feeds in Canada for 1956 together with an estimate of production for the calendar year 1957 and as well the production for the current month in 1957 and 1958 with cumulative totals for 1957 and 1958.

Table 2 shows the 1958 shipments of primary or concentrated feeds by principal commodities, provincial destination and export. Column (a) gives the total shipments of all concentrates while column (b) gives the shipments of concentrates moving out of the Industry in their original form. The difference between column (a) and column (b) shows the amount of primary feeds used by the secondary feed manufacturers in producing complete feeds. Factor No. 2, which will convert concentrates to feeds is included respectively in brackets after the title of each concentrate. (See pages 4, 6 and 8). How to use these factors is explained on page 21.

Table 3 shows the volume of monthly shipments of secondary or complete feeds by principal commodities, provincial destination and export. Using conversion factors provided by all firms in the primary survey, the resulting volume of feeds has been added to those totals reported by firms which manufacture finished feeds from raw materials. The volume of feeds, shown in this section, therefore, represents the estimated total feeds shipped by all types of manufacturers including franchise operators and independent manufacturers who purchase concentrates from primary manufacturers. Factor No. 1, which will show the proportion of concentrates moving out of the Industry is shown on page 20.

Table 4 presents the volume of shipments by manufacturers of other types of stock feeds by principal commodities, provincial destination and export. In this section specialized feeds such as dog and cat foods, mineral mixtures, etc., are the result of 100% survey of the producing industry. Other commodities are estimated on a sample basis.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

CLASSIFICATION OF FEEDS

A complete feed is a formulated feed to be fed as is, and may be in the form of mash, pellets, crumbles, cubes, etc. For your assistance in classifying these commodities, the following explanation is offered:

1. Calf concentrates - Any concentrate or making a complete Calf Feed.

2. Dairy and Cattle concentrates - Any concentrate 24% protein or higher for Cattle or Dairy Cows.

3. Swine concentrates - Any concentrate 35% protein or higher for swine.

4. Poultry Concentrates:
   (a) Chick Starter Concentrates - Any concentrate for making a complete Chick Starter.
   (b) Broiler Concentrates - Any concentrate for making a complete Broiler Feed.
   (c) Growing Concentrates - Any concentrate for making a complete feed for growing chickens.
   (d) Laying and Hatching Concentrates - Any concentrate for making a complete feed for laying hens.
   (e) Fattening and Finishing Concentrates - Any concentrate for making a complete fattening feed for fowl other than Broilers or Turkeys.
   (f) Turkey Concentrates - Any concentrate for making a complete turkey feed.
   (g) Other Concentrates - Any concentrate for Poultry not covered by any other classification.

5. Calf feeds - Any complete feed for calves up to 5 months of age.

6. Dairy and Cattle Feeds - Any complete feed under 24% protein for Cattle or Dairy Cows but excluding Calf Feeds.

7. Swine Feeds - Any complete swine feed under 35% protein.

8. Poultry Feeds:
   (a) Chick Starter Feeds - Any complete feed for starting chickens other than Broilers.
   (b) Broilers Feeds - Any complete feed for starting, growing or finishing Broilers.
   (c) Growing Feeds - Any complete feed for growing chickens.
   (d) Laying and Hatching Feeds - Any complete feed for laying hens.
   (e) Fattening and Finishing Feeds - Any complete feed for fattening cockerels, capons or other fowl other than broilers and turkeys and excluding Scratch Grains.
   (f) Turkey Feeds - Any complete feed for starting, growing or finishing turkeys.
   (g) Other Complete Feeds - Any complete feed for pheasants, ducks or other poultry and not covered by any other classification.

11. Dog and Cat Foods:
   (b) Biscuits - Kibble and all baked products.
   (c) Meal - Pellets, cubes and other forms.

12. Scratch Grains - Any mixture of Whole or Cracked Grains only for Poultry.

13. Other Animal Feeds - Such as Horse Feed, Rabbit Feed, etc.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 1 - Production of Prepared Stock and Poultry Feeds in Canada 1956 together with estimated comparable data for 1957. Current monthly production accompanied by cumulative totals for 1957 and 1958 reported in columns (3), (4), (5), and (6) respectively.

(c) Growing Concentrates	.500	.692	.674	.544	.797	.726	.217	.182	.260	.297	.712
(d) Laying and Hatching Concentrates	0	.741	.740	.581	.866	.562	.206	.089	.186	.098	.697
(e) Fattening & Finishing Concontrates	0	.882	.231	.412	.923	.673	.129	0	.338	.666	0
(f) Turkey Concentrates	0	1.000	.962	.395	.965	.887	.295	.342	.278	.361	0
(g) Other Poultry Concentrates	0	.246	.116	.596	.258	.429	.019	0	1.000	0	.333

In converting concentrates to finished feeds, the Bureau uses the above factors to establish the amount of concentrates which moved into the secondary manufacturing industry, as such. These factors were established from the returns of all firms in th survey and reflect the weighted average above, which we use for a current 12 months reports. If you agree that changes should be made in any of these factors, you should advise us at once whether or not you think the factor is low or high.

From the above, you will notice that 86.8 per cent of the calf concentrates shipped in the province of Ontario in any mon during 1954 moved into the hands of franchise operators and other manufacturers who make feeds from concentrates. The balance, or 13.2 per cent, moved out of the industry and was used by farmers and other similar consumers directly.

Factor No. 2, which will turn concentrates into finished feeds, is given on pages 4, 6 and 8 in brackets after the name o each commodity.

HOW TO USE THE CONVERSION FACTORS

You will note on page 4 that the industry reported they had shipped in the province of Quebec for January, 1958 1,533 tons of Dairy and Cattle concentrates, of which 362 tons were used or sold directly for use to the farmer and other such consumers. In other words, 1,171 tons moved into the hands of secondary manufacturers for further use in manufacturing complete feeds. In order to obtain the finished feeds resulting from the conversion of 1,171 tons of Dairy and Cattle concentrates, we make use of the conversion factor as follows:

1,171 x 6.0 = 7,026 tons of Dairy and Cattle Feeds.

Now turn to page 10 and you will see that the shipments of Dairy and Cattle Feeds in the province of Quebec in the same month amounted to 9,643 tons. The summary would appear as follows.

Total shipments = 9,643 tons

Shipments by secondary manufacturers (1) = 7,026 tons

Shipments by manufacturers (2) = 2,617 tons

In order to assess the proportion of total feed shipments, which your firm enjoys, the following instructions are important. In terms of concentrates, the concentrate manufacturer would divide the total Dairy and Cattle feeds shipped in the province of Quebec (9,643 tons) by 6.0 and add 362 tons of concentrates moving out of the industry thus:

$$\frac{9,643}{6.0} = 1,607 + 362 = 1,969 \text{ tons}$$

To the above he would relate his total shipments of Dairy and Cattle concentrates for the province of Quebec during the same period.

In terms of complete feeds, the complete feeds manufacturer (including franchise operators) would assess their share of the market by determining, in the following manner, the total supply of finished feeds:

Total commercial feeds shipped		9,643 tons (see page 10)
Estimated feeds produced from concentrates sold outside the industry from which would be	362 x 6.0 =	2,172 tons (see page 4)
Total supply of finished feeds used as finished feeds or in the form of concentrates		11,815 tons

(1) Includes franchise operators and those secondary manufacturers who use concentrates to manufacture complete feeds.

(2) Includes manufacturers who produce finished feeds directly from raw materials.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

In October, 1947 the Dominion Bureau of Statistics, in co-operation with the National Council of the Canadian Feed Manufacturers' Association, commenced a survey on a sample basis of Shipments of Prepared Stock and Poultry Feeds, showing export shipments as well as provincial destinations in Canada.

By 1950 the monthly survey on Shipments assumed real value since it formed a basis of comparing current months with corresponding months of the previous year. Because it was still difficult to estimate certain individual commodities reliably, the coverage of the survey was increased to 200 firms in 1951 and became representative of about 76% of the total volume of the industry. This series was presented on an index basis up to the end of 1953.

During 1953 the feeds industry desired volume figures which would reveal the actual disappearance into the hands of ultimate consumers. The result is the current survey which is produced from monthly returns of all primary manufacturers of concentrates together with returns of a sample survey of manufacturers who use raw ingredients in their finished feeds.

The information presented in this report has been arranged as follows:

Table 1 presents the total annual production of Primary and Secondary or complete feeds in Canada for 1956 together with an estimate of production for the calendar year 1957 and as well the production for the current month in 1957 and 1958 with cumulative totals for 1957 and 1958.

Table 2 shows the 1958 shipments of primary or concentrated feeds by principal commodities, provincial destination and export. Column (a) gives the total shipments of all concentrates while column (b) gives the shipments of concentrates moving out of the Industry in their original form. The difference between column (a) and column (b) shows the amount of primary feeds used by the secondary feed manufacturers in producing complete feeds. Factor No. 2, which will convert concentrates to feeds is included respectively in brackets after the title of each concentrate. (See pages 4, 6 and 8). How to use these factors is explained on page 21.

Table 3 shows the volume of monthly shipments of secondary or complete feeds by principal commodities, provincial destination and export. Using conversion factors provided by all firms in the primary survey, the resulting volume of feeds has been added to those totals reported by firms which manufacture finished feeds from raw materials. The volume of feeds, shown in this section, therefore, represents the estimated total feeds shipped by all types of manufacturers including franchise operators and independent manufacturers who purchase concentrates from primary manufacturers. Factor No. 1, which will show the proportion of concentrates moving out of the Industry is shown on page 20.

Table 4 presents the volume of shipments by manufacturers of other types of stock feeds by principal commodities, provincial destination and export. In this section specialized feeds such as dog and cat foods, mineral mixtures, etc., are the result of 100% survey of the producing industry. Other commodities are estimated on a sample basis.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

CLASSIFICATION OF FEEDS

A complete feed is a formulated feed to be fed as is, and may be in the form of mash, pellets, crumbles, cubes, etc. For your assistance in classifying these commodities, the following explanation is offered:

1. Calf concentrates - Any concentrate or making a complete Calf Feed.

2. Dairy and Cattle concentrates - Any concentrate 24% protein or higher for Cattle or Dairy Cows.

3. Swine concentrates - Any concentrate 35% protein or higher for swine.

4. Poultry Concentrates:
   (a) Chick Starter Concentrates - Any concentrate for making a complete Chick Starter.
   (b) Broiler Concentrates - Any concentrate for making a complete Broiler Feed.
   (c) Growing Concentrates - Any concentrate for making a complete feed for growing chickens.
   (d) Laying and Hatching Concentrates - Any concentrate for making a complete feed for laying hens.
   (e) Fattening and Finishing Concentrates - Any concentrate for making a complete fattening feed for fowl other than Broilers or Turkeys.
   (f) Turkey Concentrates - Any concentrate for making a complete turkey feed.
   (g) Other Concentrates - Any concentrate for Poultry not covered by any other classification.

5. Calf feeds - Any complete feed for calves up to 5 months of age.

6. Dairy and Cattle Feeds - Any complete feed under 24% protein for Cattle or Dairy Cows but excluding Calf Feeds.

7. Swine Feeds - Any complete swine feed under 35% protein.

8. Poultry Feeds:
   (a) Chick Starter Feeds - Any complete feed for starting chickens other than Broilers.
   (b) Broilers Feeds - Any complete feed for starting, growing or finishing Broilers.
   (c) Growing Feeds - Any complete feed for growing chickens.
   (d) Laying and Hatching Feeds - Any complete feed for laying hens.
   (e) Fattening and Finishing Feeds - Any complete feed for fattening cockerels, capons or other fowl other than broilers and turkeys and excluding Scratch Grains.
   (f) Turkey Feeds - Any complete feed for starting, growing or finishing turkeys
   (g) Other Complete Feeds - Any complete feed for pheasants, ducks or other poultry and not covered by any other classification.

11. Dog and Cat Foods:
   (b) Biscuits - Kibble and all baked products.
   (c) Meal - Pellets, cubes and other forms.

12. Scratch Grains - Any mixture of Whole or Cracked Grains only for Poultry.

13. Other Animal Feeds - Such as Horse Feed, Rabbit Feed, etc.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 1 - Production of Prepared Stock and Poultry Feeds in Canada 1956 together with estimated comparable data for 1957. Current monthly production accompanied by cumulative totals for 1957 and 1958 reported in columns (3), (4), (5), and (6) respectively.

FACTORS USED IN DETERMINING QUANTITIES OF CONCENTRATES MOVING INTO SECONDARY INDUSTRY

	Shipped to or sold in										
	Newfound-land	Prince Edward Island	Nova Scotia	New Brunswick	Quebec	Ontario	Manitoba	Saskat-chewan	Alberta	British Columbia	Export
Primary or Concentrated Feeds											
1. Calf Concentrates	0	.914	.769	.538	.849	.868	.809	.750	.707	.666	0
2. Dairy and Cattle Concentrates	1.000	.592	.648	.460	.764	.415	.268	.215	.296	.041	.190
3. Swine Concentrates	.647	.598	.536	.546	.821	.480	.233	.250	.270	.208	.700
4. Poultry Concentrates											
(a) Chick Starter Concentrates	0	1.000	.750	.670	.919	.904	.725	.868	.969	1.000	1.000
(b) Broiler Concentrates	0	.607	.877	.019	.999	.968	.485	0	.861	1.000	.500
(c) Growing Concentrates	.500	.692	.674	.544	.797	.726	.217	.182	.260	.297	.712
(d) Laying and Hatching Concentrates	0	.741	.740	.581	.866	.562	.206	.089	.186	.098	.697
(e) Fattening & Finishing Concontrates	0	.882	.231	.412	.923	.673	.129	0	.338	.666	0
(f) Turkey Concentrates	0	1.000	.962	.395	.965	.887	.295	.342	.278	.361	0
(g) Other Poultry Concentrates	0	.246	.116	.596	.258	.429	.019	0	1.000	0	.333

In converting concentrates to finished feeds, the Bureau uses the above factors to establish the amount of concentrates which moved into the secondary manufacturing industry, as such. These factors were established from the returns of all firms in th survey and reflect the weighted average above, which we use for a current 12 months reports. If you agree that changes should be made in any of these factors, you should advise us at once whether or not you think the factor is low or high.

From the above, you will notice that 86.8 per cent of the calf concentrates shipped in the province of Ontario in any mon during 1954 moved into the hands of franchise operators and other manufacturers who make feeds from concentrates. The balance, or 13.2 per cent, moved out of the industry and was used by farmers and other similar consumers directly.

Factor No. 2, which will turn concentrates into finished feeds, is given on pages 4, 6 and 8 in brackets after the name o each commodity.

HOW TO USE THE CONVERSION FACTORS

You will note on page 4 that the industry reported they had shipped in the province of Quebec for January, 1958 1,533 tons of Dairy and Cattle concentrates, of which 362 tons were used or sold directly for use to the farmer and other such consumers. In other words, 1,171 tons moved into the hands of secondary manufacturers for further use in manufacturing complete feeds. In order to obtain the finished feeds resulting from the conversion of 1,171 tons of Dairy and Cattle concentrates, we make use of the conversion factor as follows:

1,171 x 6.0 = 7,026 tons of Dairy and Cattle Feeds.

Now turn to page 10 and you will see that the shipments of Dairy and Cattle Feeds in the province of Quebec in the same month amounted to 9,643 tons. The summary would appear as follows.

Total shipments = 9,643 tons

Shipments by secondary manufacturers (1) = 7,026 tons

Shipments by manufacturers (2) = 2,617 tons

In order to assess the proportion of total feed shipments, which your firm enjoys, the following instructions are important. In terms of concentrates, the concentrate manufacturer would divide the total Dairy and Cattle feeds shipped in the province of Quebec (9,643 tons) by 6.0 and add 362 tons of concentrates moving out of the industry thus:

$$\frac{9,643}{6.0} = 1,607 + 362 = 1,969 \text{ tons}$$

To the above he would relate his total shipments of Dairy and Cattle concentrates for the province of Quebec during the same period.

In terms of complete feeds, the complete feeds manufacturer (including franchise operators) would assess their share of the market by determining, in the following manner, the total supply of finished feeds:

Total commercial feeds shipped		9,643 tons (see page 10)
Estimated feeds produced from concentrates sold outside the industry from which would be	362 x 6.0 =	2,172 tons (see page 4)
Total supply of finished feeds used as finished feeds or in the form of concentrates		11,815 tons

(1) Includes franchise operators and those secondary manufacturers who use concentrates to manufacture complete feeds.

(2) Includes manufacturers who produce finished feeds directly from raw materials.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

In October, 1947 the Dominion Bureau of Statistics, in co-operation with the National Council of the Canadian Feed Manufacturers' Association, commenced a survey on a sample basis of Shipments of Prepared Stock and Poultry Feeds, showing export shipments as well as provincial destinations in Canada.

By 1950 the monthly survey on Shipments assumed real value since it formed a basis of comparing current months with corresponding months of the previous year. Because it was still difficult to estimate certain individual commodities reliably, the coverage of the survey was increased to 200 firms in 1951 and became representative of about 76% of the total volume of the industry. This series was presented on an index basis up to the end of 1953.

During 1953 the feeds industry desired volume figures which would reveal the actual disappearance into the hands of ultimate consumers. The result is the current survey which is produced from monthly returns of all primary manufacturers of concentrates together with returns of a sample survey of manufacturers who use raw ingredients in their finished feeds.

The information presented in this report has been arranged as follows:

Table 1 presents the total annual production of Primary and Secondary or complete feeds in Canada for 1956 together with an estimate of production for the calendar year 1957 and as well the production for the current month in 1957 and 1958 with cumulative totals for 1957 and 1958.

Table 2 shows the 1958 shipments of primary or concentrated feeds by principal commodities, provincial destination and export. Column (a) gives the total shipments of all concentrates while column (b) gives the shipments of concentrates moving out of the Industry in their original form. The difference between column (a) and column (b) shows the amount of primary feeds used by the secondary feed manufacturers in producing complete feeds. Factor No. 2, which will convert concentrates to feeds is included respectively in brackets after the title of each concentrate. (See pages 4, 6 and 8). How to use these factors is explained on page 21.

Table 3 shows the volume of monthly shipments of secondary or complete feeds by principal commodities, provincial destination and export. Using conversion factors provided by all firms in the primary survey, the resulting volume of feeds has been added to those totals reported by firms which manufacture finished feeds from raw materials. The volume of feeds, shown in this section, therefore, represents the estimated total feeds shipped by all types of manufacturers including franchise operators and independent manufacturers who purchase concentrates from primary manufacturers. Factor No. 1, which will show the proportion of concentrates moving out of the Industry is shown on page 20.

Table 4 presents the volume of shipments by manufacturers of other types of stock feeds by principal commodities, provincial destination and export. In this section specialized feeds such as dog and cat foods, mineral mixtures, etc., are the result of 100% survey of the producing industry. Other commodities are estimated on a sample basis.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

CLASSIFICATION OF FEEDS

A complete feed is a formulated feed to be fed as is, and may be in the form of mash, pellets, crumbles, cubes, etc. For your assistance in classifying these commodities, the following explanation is offered:

1. Calf concentrates - Any concentrate or making a complete Calf Feed.

2. Dairy and Cattle concentrates - Any concentrate 24% protein or higher for Cattle or Dairy Cows.

3. Swine concentrates - Any concentrate 35% protein or higher for swine.

4. Poultry Concentrates:
   (a) Chick Starter Concentrates - Any concentrate for making a complete Chick Starter.
   (b) Broiler Concentrates - Any concentrate for making a complete Broiler Feed.
   (c) Growing Concentrates - Any concentrate for making a complete feed for growing chickens.
   (d) Laying and Hatching Concentrates - Any concentrate for making a complete feed for laying hens.
   (e) Fattening and Finishing Concentrates - Any concentrate for making a complete fattening feed for fowl other than Broilers or Turkeys.
   (f) Turkey Concentrates - Any concentrate for making a complete turkey feed.
   (g) Other Concentrates - Any concentrate for Poultry not covered by any other classification.

5. Calf feeds - Any complete feed for calves up to 5 months of age.

6. Dairy and Cattle Feeds - Any complete feed under 24% protein for Cattle or Dairy Cows but excluding Calf Feeds.

7. Swine Feeds - Any complete swine feed under 35% protein.

8. Poultry Feeds:
   (a) Chick Starter Feeds - Any complete feed for starting chickens other than Broilers.
   (b) Broilers Feeds - Any complete feed for starting, growing or finishing Broilers.
   (c) Growing Feeds - Any complete feed for growing chickens.
   (d) Laying and Hatching Feeds - Any complete feed for laying hens.
   (e) Fattening and Finishing Feeds - Any complete feed for fattening cockerels, capons or other fowl other than broilers and turkeys and excluding Scratch Grains.
   (f) Turkey Feeds - Any complete feed for starting, growing or finishing turkeys.
   (g) Other Complete Feeds - Any complete feed for pheasants, ducks or other poultry and not covered by any other classification.

11. Dog and Cat Foods:
   (b) Biscuits - Kibble and all baked products.
   (c) Meal - Pellets, cubes and other forms.

12. Scratch Grains - Any mixture of Whole or Cracked Grains only for Poultry.

13. Other Animal Feeds - Such as Horse Feed, Rabbit Feed, etc.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 1 - Production of Prepared Stock and Poultry Feeds in Canada 1956 together with estimated comparable data for 1957. Current monthly production accompanied by cumulative totals for 1957 and 1958 reported in columns (3), (4), (5), and (6) respectively.

FACTORS USED IN DETERMINING QUANTITIES OF CONCENTRATES MOVING INTO SECONDARY INDUSTRY

	Shipped to or sold in										
	Newfound-land	Prince Edward Island	Nova Scotia	New Brunswick	Quebec	Ontario	Manitoba	Saskat-chewan	Alberta	British Columbia	Export
Primary or Concentrated Feeds											
1. Calf Concentrates	0	.914	.769	.538	.849	.868	.809	.750	.707	.666	0
2. Dairy and Cattle Concentrates	1.000	.592	.648	.460	.764	.415	.268	.215	.296	.041	.190
3. Swine Concentrates	.647	.598	.536	.546	.821	.480	.233	.250	.270	.208	.700
4. Poultry Concentrates											
(a) Chick Starter Concentrates	0	1.000	.750	.670	.919	.904	.725	.868	.969	1.000	1.000
(b) Broiler Concentrates	0	.607	.877	.019	.999	.968	.485	0	.861	1.000	.500
(c) Growing Concentrates	.500	.692	.674	.544	.797	.726	.217	.182	.260	.297	.712
(d) Laying and Hatching Concentrates	0	.741	.740	.581	.866	.562	.206	.089	.186	.098	.697
(e) Fattening & Finishing Concontrates	0	.882	.231	.412	.923	.673	.129	0	.338	.666	0
(f) Turkey Concentrates	0	1.000	.962	.395	.965	.887	.295	.342	.278	.361	0
(g) Other Poultry Concentrates	0	.246	.116	.596	.258	.429	.019	0	1.000	0	.333

In converting concentrates to finished feeds, the Bureau uses the above factors to establish the amount of concentrates which moved into the secondary manufacturing industry, as such. These factors were established from the returns of all firms in the survey and reflect the weighted average above, which we use for a current 12 months reports. If you agree that changes should be made in any of these factors, you should advise us at once whether or not you think the factor is low or high.

From the above, you will notice that 86.8 per cent of the calf concentrates shipped in the province of Ontario in any month during 1954 moved into the hands of franchise operators and other manufacturers who make feeds from concentrates. The balance, or 13.2 per cent, moved out of the industry and was used by farmers and other similar consumers directly.

Factor No. 2, which will turn concentrates into finished feeds, is given on pages 4, 6 and 8 in brackets after the name of each commodity.

HOW TO USE THE CONVERSION FACTORS

You will note on page 4 that the industry reported they had shipped in the province of Quebec for January, 1958 1,533 tons of Dairy and Cattle concentrates, of which 362 tons were used or sold directly for use to the farmer and other such consumers. In other words, 1,171 tons moved into the hands of secondary manufacturers for further use in manufacturing complete feeds. In order to obtain the finished feeds resulting from the conversion of 1,171 tons of Dairy and Cattle concentrates, we make use of the conversion factor as follows:

$$1{,}171 \times 6.0 = 7{,}026 \text{ tons of Dairy and Cattle Feeds.}$$

Now turn to page 10 and you will see that the shipments of Dairy and Cattle Feeds in the province of Quebec in the same month amounted to 9,643 tons. The summary would appear as follows.

Total shipments = 9,643 tons

Shipments by secondary manufacturers (1) = 7,026 tons

Shipments by manufacturers (2) = 2,617 tons

In order to assess the proportion of total feed shipments, which your firm enjoys, the following instructions are important. In terms of concentrates, the concentrate manufacturer would divide the total Dairy and Cattle feeds shipped in the province of Quebec (9,643 tons) by 6.0 and add 362 tons of concentrates moving out of the industry thus:

$$\frac{9{,}643}{6.0} = 1{,}607 + 362 = 1{,}969 \text{ tons}$$

To the above he would relate his total shipments of Dairy and Cattle concentrates for the province of Quebec during the same period.

In terms of complete feeds, the complete feeds manufacturer (including franchise operators) would assess their share of the market by determining, in the following manner, the total supply of finished feeds:

Total commercial feeds shipped		9,643 tons (see page 10)
Estimated feeds produced from concentrates sold outside the industry from which would be	362 x 6.0 =	2,172 tons (see page 4)
Total supply of finished feeds used as finished feeds or in the form of concentrates		11,815 tons

(1) Includes franchise operators and those secondary manufacturers who use concentrates to manufacture complete feeds.

(2) Includes manufacturers who produce finished feeds directly from raw materials.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

In October, 1947 the Dominion Bureau of Statistics, in co-operation with the National Council of the Canadian Feed Manufacturers' Association, commenced a survey on a sample basis of Shipments of Prepared Stock and Poultry Feeds, showing export shipments as well as provincial destinations in Canada.

By 1950 the monthly survey on Shipments assumed real value since it formed a basis of comparing current months with corresponding months of the previous year. Because it was still difficult to estimate certain individual commodities reliably, the coverage of the survey was increased to 200 firms in 1951 and became representative of about 76% of the total volume of the industry. This series was presented on an index basis up to the end of 1953.

During 1953 the feeds industry desired volume figures which would reveal the actual disappearance into the hands of ultimate consumers. The result is the current survey which is produced from monthly returns of all primary manufacturers of concentrates together with returns of a sample survey of manufacturers who use raw ingredients in their finished feeds.

The information presented in this report has been arranged as follows:

Table 1 presents the total annual production of Primary and Secondary or complete feeds in Canada for 1956 together with an estimate of production for the calendar year 1957 and as well the production for the current month in 1957 and 1958 with cumulative totals for 1957 and 1958.

Table 2 shows the 1958 shipments of primary or concentrated feeds by principal commodities, provincial destination and export. Column (a) gives the total shipments of all concentrates while column (b) gives the shipments of concentrates moving out of the Industry in their original form. The difference between column (a) and column (b) shows the amount of primary feeds used by the secondary feed manufacturers in producing complete feeds. Factor No. 2, which will convert concentrates to feeds is included respectively in brackets after the title of each concentrate. (See pages 4, 6 and 8). How to use these factors is explained on page 21.

Table 3 shows the volume of monthly shipments of secondary or complete feeds by principal commodities, provincial destination and export. Using conversion factors provided by all firms in the primary survey, the resulting volume of feeds has been added to those totals reported by firms which manufacture finished feeds from raw materials. The volume of feeds, shown in this section, therefore, represents the estimated total feeds shipped by all types of manufacturers including franchise operators and independent manufacturers who purchase concentrates from primary manufacturers. Factor No. 1, which will show the proportion of concentrates moving out of the Industry is shown on page 20.

Table 4 presents the volume of shipments by manufacturers of other types of stock feeds by principal commodities, provincial destination and export. In this section specialized feeds such as dog and cat foods, mineral mixtures, etc., are the result of 100% survey of the producing industry. Other commodities are estimated on a sample basis.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

CLASSIFICATION OF FEEDS

A complete feed is a formulated feed to be fed as is, and may be in the form of mash, pellets, crumbles, cubes, etc. For your assistance in classifying these commodities, the following explanation is offered:

1. Calf concentrates - Any concentrate or making a complete Calf Feed.

2. Dairy and Cattle concentrates - Any concentrate 24% protein or higher for Cattle or Dairy Cows.

3. Swine concentrates - Any concentrate 35% protein or higher for swine.

4. Poultry Concentrates:
   (a) Chick Starter Concentrates - Any concentrate for making a complete Chick Starter.
   (b) Broiler Concentrates - Any concentrate for making a complete Broiler Feed.
   (c) Growing Concentrates - Any concentrate for making a complete feed for growing chickens.
   (d) Laying and Hatching Concentrates - Any concentrate for making a complete feed for laying hens.
   (e) Fattening and Finishing Concentrates - Any concentrate for making a complete fattening feed for fowl other than Broilers or Turkeys.
   (f) Turkey Concentrates - Any concentrate for making a complete turkey feed.
   (g) Other Concentrates - Any concentrate for Poultry not covered by any other classification.

5. Calf feeds - Any complete feed for calves up to 5 months of age.

6. Dairy and Cattle Feeds - Any complete feed under 24% protein for Cattle or Dairy Cows but excluding Calf Feeds.

7. Swine Feeds - Any complete swine feed under 35% protein.

8. Poultry Feeds:
   (a) Chick Starter Feeds - Any complete feed for starting chickens other than Broilers.
   (b) Broilers Feeds - Any complete feed for starting, growing or finishing Broilers.
   (c) Growing Feeds - Any complete feed for growing chickens.
   (d) Laying and Hatching Feeds - Any complete feed for laying hens.
   (e) Fattening and Finishing Feeds - Any complete feed for fattening cockerels, capons or other fowl other than broilers and turkeys and excluding Scratch Grains.
   (f) Turkey Feeds - Any complete feed for starting, growing or finishing turkeys.
   (g) Other Complete Feeds - Any complete feed for pheasants, ducks or other poultry and not covered by any other classification.

11. Dog and Cat Foods:
   (b) Biscuits - Kibble and all baked products.
   (c) Meal - Pellets, cubes and other forms.

12. Scratch Grains - Any mixture of Whole or Cracked Grains only for Poultry.

13. Other Animal Feeds - Such as Horse Feed, Rabbit Feed, etc.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 1 - Production of Prepared Stock and Poultry Feeds in Canada 1956 together with estimated comparable data for 1957. Current monthly production accompanied by cumulative totals for 1957 and 1958 reported in columns (3), (4), (5), and (6) respectively.

FACTORS USED IN DETERMINING QUANTITIES OF CONCENTRATES MOVING INTO SECONDARY INDUSTRY

	Shipped to or sold in										
	Newfound-land	Prince Edward Island	Nova Scotia	New Brunswick	Quebec	Ontario	Manitoba	Saskat-chewan	Alberta	British Columbia	Export
Primary or Concentrated Feeds											
1. Calf Concentrates	0	.914	.769	.538	.849	.868	.809	.750	.707	.666	0
2. Dairy and Cattle Concentrates	1.000	.592	.648	.460	.764	.415	.268	.215	.296	.041	.190
3. Swine Concentrates	.647	.598	.536	.546	.821	.480	.233	.250	.270	.208	.700
4. Poultry Concentrates											
(a) Chick Starter Concentrates	0	1.000	.750	.670	.919	.904	.725	.868	.969	1.000	1.000
(b) Broiler Concentrates	0	.607	.877	.019	.999	.968	.485	0	.861	1.000	.500
(c) Growing Concentrates	.500	.692	.674	.544	.797	.726	.217	.182	.260	.297	.712
(d) Laying and Hatching Concentrates	0	.741	.740	.581	.866	.562	.206	.089	.186	.098	.697
(e) Fattening & Finishing Concontrates	0	.882	.231	.412	.923	.673	.129	0	.338	.666	0
(f) Turkey Concentrates	0	1.000	.962	.395	.965	.887	.295	.342	.278	.361	0
(g) Other Poultry Concentrates	0	.246	.116	.596	.258	.429	.019	0	1.000	0	.333

In converting concentrates to finished feeds, the Bureau uses the above factors to establish the amount of concentrates which moved into the secondary manufacturing industry, as such. These factors were established from the returns of all firms in the survey and reflect the weighted average above, which we use for a current 12 months reports. If you agree that changes should be made in any of these factors, you should advise us at once whether or not you think the factor is low or high.

From the above, you will notice that 86.8 per cent of the calf concentrates shipped in the province of Ontario in any month during 1954 moved into the hands of franchise operators and other manufacturers who make feeds from concentrates. The balance, or 13.2 per cent, moved out of the industry and was used by farmers and other similar consumers directly.

Factor No. 2, which will turn concentrates into finished feeds, is given on pages 4, 6 and 8 in brackets after the name of each commodity.

HOW TO USE THE CONVERSION FACTORS

You will note on page 4 that the industry reported they had shipped in the province of Quebec for January, 1958 1,533 tons of Dairy and Cattle concentrates, of which 362 tons were used or sold directly for use to the farmer and other such consumers. In other words, 1,171 tons moved into the hands of secondary manufacturers for further use in manufacturing complete feeds. In order to obtain the finished feeds resulting from the conversion of 1,171 tons of Dairy and Cattle concentrates, we make use of the conversion factor as follows:

1,171 x 6.0 = 7,026 tons of Dairy and Cattle Feeds.

Now turn to page 10 and you will see that the shipments of Dairy and Cattle Feeds in the province of Quebec in the same month amounted to 9,643 tons. The summary would appear as follows.

Total shipments = 9,643 tons

Shipments by secondary manufacturers (1) = 7,026 tons

Shipments by manufacturers (2) = 2,617 tons

In order to assess the proportion of total feed shipments, which your firm enjoys, the following instructions are important. In terms of concentrates, the concentrate manufacturer would divide the total Dairy and Cattle feeds shipped in the province of Quebec (9,643 tons) by 6.0 and add 362 tons of concentrates moving out of the industry thus:

$$\frac{9,643}{6.0} = 1,607 + 362 = 1,969 \text{ tons}$$

To the above he would relate his total shipments of Dairy and Cattle concentrates for the province of Quebec during the same period.

In terms of complete feeds, the complete feeds manufacturer (including franchise operators) would assess their share of the market by determining, in the following manner, the total supply of finished feeds:

Total commercial feeds shipped		9,643 tons (see page 10)
Estimated feeds produced from concentrates sold outside the industry from which would be	362 x 6.0 =	2,172 tons (see page 4)
Total supply of finished feeds used as finished feeds or in the form of concentrates		11,815 tons

(1) Includes franchise operators and those secondary manufacturers who use concentrates to manufacture complete feeds.

(2) Includes manufacturers who produce finished feeds directly from raw materials.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

In October, 1947 the Dominion Bureau of Statistics, in co-operation with the National Council of the Canadian Feed Manufacturers' Association, commenced a survey on a sample basis of Shipments of Prepared Stock and Poultry Feeds, showing export shipments as well as provincial destinations in Canada.

By 1950 the monthly survey on Shipments assumed real value since it formed a basis of comparing current months with corresponding months of the previous year. Because it was still difficult to estimate certain individual commodities reliably, the coverage of the survey was increased to 200 firms in 1951 and became representative of about 76% of the total volume of the industry. This series was presented on an index basis up to the end of 1953.

During 1953 the feeds industry desired volume figures which would reveal the actual disappearance into the hands of ultimate consumers. The result is the current survey which is produced from monthly returns of all primary manufacturers of concentrates together with returns of a sample survey of manufacturers who use raw ingredients in their finished feeds.

The information presented in this report has been arranged as follows:

Table 1 presents the total annual production of Primary and Secondary or complete feeds in Canada for 1956 together with an estimate of production for the calendar year 1957 and as well the production for the current month in 1957 and 1958 with cumulative totals for 1957 and 1958.

Table 2 shows the 1958 shipments of primary or concentrated feeds by principal commodities, provincial destination and export. Column (a) gives the total shipments of all concentrates while column (b) gives the shipments of concentrates moving out of the Industry in their original form. The difference between column (a) and column (b) shows the amount of primary feeds used by the secondary feed manufacturers in producing complete feeds. Factor No. 2, which will convert concentrates to feeds is included respectively in brackets after the title of each concentrate. (See pages 4, 6 and 8). How to use these factors is explained on page 21.

Table 3 shows the volume of monthly shipments of secondary or complete feeds by principal commodities, provincial destination and export. Using conversion factors provided by all firms in the primary survey, the resulting volume of feeds has been added to those totals reported by firms which manufacture finished feeds from raw materials. The volume of feeds, shown in this section, therefore, represents the estimated total feeds shipped by all types of manufacturers including franchise operators and independent manufacturers who purchase concentrates from primary manufacturers. Factor No. 1, which will show the proportion of concentrates moving out of the Industry is shown on page 20.

Table 4 presents the volume of shipments by manufacturers of other types of stock feeds by principal commodities, provincial destination and export. In this section specialized feeds such as dog and cat foods, mineral mixtures, etc., are the result of 100% survey of the producing industry. Other commodities are estimated on a sample basis.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

CLASSIFICATION OF FEEDS

A complete feed is a formulated feed to be fed as is, and may be in the form of mash, pellets, crumbles, cubes, etc. For your assistance in classifying these commodities, the following explanation is offered:

1. Calf concentrates - Any concentrate or making a complete Calf Feed.

2. Dairy and Cattle concentrates - Any concentrate 24% protein or higher for Cattle or Dairy Cows.

3. Swine concentrates - Any concentrate 35% protein or higher for swine.

4. Poultry Concentrates:
   (a) Chick Starter Concentrates - Any concentrate for making a complete Chick Starter.
   (b) Broiler Concentrates - Any concentrate for making a complete Broiler Feed.
   (c) Growing Concentrates - Any concentrate for making a complete feed for growing chickens.
   (d) Laying and Hatching Concentrates - Any concentrate for making a complete feed for laying hens.
   (e) Fattening and Finishing Concentrates - Any concentrate for making a complete fattening feed for fowl other than Broilers or Turkeys.
   (f) Turkey Concentrates - Any concentrate for making a complete turkey feed.
   (g) Other Concentrates - Any concentrate for Poultry not covered by any other classification.

5. Calf feeds - Any complete feed for calves up to 5 months of age.

6. Dairy and Cattle Feeds - Any complete feed under 24% protein for Cattle or Dairy Cows but excluding Calf Feeds.

7. Swine Feeds - Any complete swine feed under 35% protein.

8. Poultry Feeds:
   (a) Chick Starter Feeds - Any complete feed for starting chickens other than Broilers.
   (b) Broilers Feeds - Any complete feed for starting, growing or finishing Broilers.
   (c) Growing Feeds - Any complete feed for growing chickens.
   (d) Laying and Hatching Feeds - Any complete feed for laying hens.
   (e) Fattening and Finishing Feeds - Any complete feed for fattening cockerels, capons or other fowl other than broilers and turkeys and excluding Scratch Grains.
   (f) Turkey Feeds - Any complete feed for starting, growing or finishing turkeys.
   (g) Other Complete Feeds - Any complete feed for pheasants, ducks or other poultry and not covered by any other classification.

11. Dog and Cat Foods:
   (b) Biscuits - Kibble and all baked products.
   (c) Meal - Pellets, cubes and other forms.

12. Scratch Grains - Any mixture of Whole or Cracked Grains only for Poultry.

13. Other Animal Feeds - Such as Horse Feed, Rabbit Feed, etc.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 1 - Production of Prepared Stock and Poultry Feeds in Canada 1956 together with estimated comparable data for 1957. Current monthly production accompanied by cumulative totals for 1957 and 1958 reported in columns (3), (4), (5), and (6) respectively.

In converting concentrates to finished feeds, the Bureau uses the above factors to establish the amount of concentrates which moved into the secondary manufacturing industry, as such. These factors were established from the returns of all firms in the survey and reflect the weighted average above, which we use for a current 12 months reports. If you agree that changes should be made in any of these factors, you should advise us at once whether or not you think the factor is low or high.

From the above, you will notice that 86.8 per cent of the calf concentrates shipped in the province of Ontario in any month during 1954 moved into the hands of franchise operators and other manufacturers who make feeds from concentrates. The balance, or 13.2 per cent, moved out of the industry and was used by farmers and other similar consumers directly.

Factor No. 2, which will turn concentrates into finished feeds, is given on pages 4, 6 and 8 in brackets after the name of each commodity.

HOW TO USE THE CONVERSION FACTORS

You will note on page 4 that the industry reported they had shipped in the province of Quebec for January, 1958 1,533 tons of Dairy and Cattle concentrates, of which 362 tons were used or sold directly for use to the farmer and other such consumers. In other words, 1,171 tons moved into the hands of secondary manufacturers for further use in manufacturing complete feeds. In order to obtain the finished feeds resulting from the conversion of 1,171 tons of Dairy and Cattle concentrates, we make use of the conversion factor as follows:

1,171 x 6.0 = 7,026 tons of Dairy and Cattle Feeds.

Now turn to page 10 and you will see that the shipments of Dairy and Cattle Feeds in the province of Quebec in the same month amounted to 9,643 tons. The summary would appear as follows.

Total shipments = 9,643 tons

Shipments by secondary manufacturers (1) = 7,026 tons

Shipments by manufacturers (2) = 2,617 tons

In order to assess the proportion of total feed shipments, which your firm enjoys, the following instructions are important. In terms of concentrates, the concentrate manufacturer would divide the total Dairy and Cattle feeds shipped in the province of Quebec (9,643 tons) by 6.0 and add 362 tons of concentrates moving out of the industry thus:

$$\frac{9,643}{6.0} = 1,607 + 362 = 1,969 \text{ tons}$$

To the above he would relate his total shipments of Dairy and Cattle concentrates for the province of Quebec during the same period.

In terms of complete feeds, the complete feeds manufacturer (including franchise operators) would assess their share of the market by determining, in the following manner, the total supply of finished feeds:

Total commercial feeds shipped		9,643 tons (see page 10)
Estimated feeds produced from concentrates sold outside the industry from which would be	362 x 6.0 =	2,172 tons (see page 4)
Total supply of finished feeds used as finished feeds or in the form of concentrates		11,815 tons

(1) Includes franchise operators and those secondary manufacturers who use concentrates to manufacture complete feeds.

(2) Includes manufacturers who produce finished feeds directly from raw materials.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

In October, 1947 the Dominion Bureau of Statistics, in co-operation with the National Council of the Canadian Feed Manufacturers' Association, commenced a survey on a sample basis of Shipments of Prepared Stock and Poultry Feeds, showing export shipments as well as provincial destinations in Canada.

By 1950 the monthly survey on Shipments assumed real value since it formed a basis of comparing current months with corresponding months of the previous year. Because it was still difficult to estimate certain individual commodities reliably, the coverage of the survey was increased to 200 firms in 1951 and became representative of about 76% of the total volume of the industry. This series was presented on an index basis up to the end of 1953.

During 1953 the feeds industry desired volume figures which would reveal the actual disappearance into the hands of ultimate consumers. The result is the current survey which is produced from monthly returns of all primary manufacturers of concentrates together with returns of a sample survey of manufacturers who use raw ingredients in their finished feeds.

The information presented in this report has been arranged as follows:

Table 1 presents the total annual production of Primary and Secondary or complete feeds in Canada for 1956 together with an estimate of production for the calendar year 1957 and as well the production for the current month in 1957 and 1958 with cumulative totals for 1957 and 1958.

Table 2 shows the 1958 shipments of primary or concentrated feeds by principal commodities, provincial destination and export. Column (a) gives the total shipments of all concentrates while column (b) gives the shipments of concentrates moving out of the Industry in their original form. The difference between column (a) and column (b) shows the amount of primary feeds used by the secondary feed manufacturers in producing complete feeds. Factor No. 2, which will convert concentrates to feeds is included respectively in brackets after the title of each concentrate. (See pages 4, 6 and 8). How to use these factors is explained on page 21.

Table 3 shows the volume of monthly shipments of secondary or complete feeds by principal commodities, provincial destination and export. Using conversion factors provided by all firms in the primary survey, the resulting volume of feeds has been added to those totals reported by firms which manufacture finished feeds from raw materials. The volume of feeds, shown in this section, therefore, represents the estimated total feeds shipped by all types of manufacturers including franchise operators and independent manufacturers who purchase concentrates from primary manufacturers. Factor No. 1, which will show the proportion of concentrates moving out of the Industry is shown on page 20.

Table 4 presents the volume of shipments by manufacturers of other types of stock feeds by principal commodities, provincial destination and export. In this section specialized feeds such as dog and cat foods, mineral mixtures, etc., are the result of 100% survey of the producing industry. Other commodities are estimated on a sample basis.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

CLASSIFICATION OF FEEDS

A complete feed is a formulated feed to be fed as is, and may be in the form of mash, pellets, crumbles, cubes, etc. For your assistance in classifying these commodities, the following explanation is offered:

1. Calf concentrates - Any concentrate or making a complete Calf Feed.

2. Dairy and Cattle concentrates - Any concentrate 24% protein or higher for Cattle or Dairy Cows.

3. Swine concentrates - Any concentrate 35% protein or higher for swine.

4. Poultry Concentrates:
   (a) Chick Starter Concentrates - Any concentrate for making a complete Chick Starter.
   (b) Broiler Concentrates - Any concentrate for making a complete Broiler Feed.
   (c) Growing Concentrates - Any concentrate for making a complete feed for growing chickens.
   (d) Laying and Hatching Concentrates - Any concentrate for making a complete feed for laying hens.
   (e) Fattening and Finishing Concentrates - Any concentrate for making a complete fattening feed for fowl other than Broilers or Turkeys.
   (f) Turkey Concentrates - Any concentrate for making a complete turkey feed.
   (g) Other Concentrates - Any concentrate for Poultry not covered by any other classification.

5. Calf feeds - Any complete feed for calves up to 5 months of age.

6. Dairy and Cattle Feeds - Any complete feed under 24% protein for Cattle or Dairy Cows but excluding Calf Feeds.

7. Swine Feeds - Any complete swine feed under 35% protein.

8. Poultry Feeds:
   (a) Chick Starter Feeds - Any complete feed for starting chickens other than Broilers.
   (b) Broilers Feeds - Any complete feed for starting, growing or finishing Broilers.
   (c) Growing Feeds - Any complete feed for growing chickens.
   (d) Laying and Hatching Feeds - Any complete feed for laying hens.
   (e) Fattening and Finishing Feeds - Any complete feed for fattening cockerels, capons or other fowl other than broilers and turkeys and excluding Scratch Grains.
   (f) Turkey Feeds - Any complete feed for starting, growing or finishing turkeys.
   (g) Other Complete Feeds - Any complete feed for pheasants, ducks or other poultry and not covered by any other classification.

11. Dog and Cat Foods:
   (b) Biscuits - Kibble and all baked products.
   (c) Meal - Pellets, cubes and other forms.

12. Scratch Grains - Any mixture of Whole or Cracked Grains only for Poultry.

13. Other Animal Feeds - Such as Horse Feed, Rabbit Feed, etc.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 1 - Production of Prepared Stock and Poultry Feeds in Canada 1956 together with estimated comparable data for 1957. Current monthly production accompanied by cumulative totals for 1957 and 1958 reported in columns (3), (4), (5), and (6) respectively.

(f) Turkey Concentrates	0	1.000	.962	.395	.965	.887	.295	.342	.278	.361	0
(g) Other Poultry Concentrates	0	.246	.116	.596	.258	.429	.019	0	1.000	0	.333

In converting concentrates to finished feeds, the Bureau uses the above factors to establish the amount of concentrates which moved into the secondary manufacturing industry, as such. These factors were established from the returns of all firms in the survey and reflect the weighted average above, which we use for a current 12 months reports. If you agree that changes should be made in any of these factors, you should advise us at once whether or not you think the factor is low or high.

From the above, you will notice that 86.8 per cent of the calf concentrates shipped in the province of Ontario in any mont during 1954 moved into the hands of franchise operators and other manufacturers who make feeds from concentrates. The balance, or 13.2 per cent, moved out of the industry and was used by farmers and other similar consumers directly.

Factor No. 2, which will turn concentrates into finished feeds, is given on pages 4, 6 and 8 in brackets after the name of each commodity.

HOW TO USE THE CONVERSION FACTORS

You will note on page 4 that the industry reported they had shipped in the province of Quebec for January, 1958 1,533 tons of Dairy and Cattle concentrates, of which 362 tons were used or sold directly for use to the farmer and other such consumers. In other words, 1,171 tons moved into the hands of secondary manufacturers for further use in manufacturing complete feeds. In order to obtain the finished feeds resulting from the conversion of 1,171 tons of Dairy and Cattle concentrates, we make use of the conversion factor as follows:

1,171 x 6.0 = 7,026 tons of Dairy and Cattle Feeds.

Now turn to page 10 and you will see that the shipments of Dairy and Cattle Feeds in the province of Quebec in the same month amounted to 9,643 tons. The summary would appear as follows.

Total shipments = 9,643 tons

Shipments by secondary manufacturers (1) = 7,026 tons

Shipments by manufacturers (2) = 2,617 tons

In order to assess the proportion of total feed shipments, which your firm enjoys, the following instructions are important. In terms of concentrates, the concentrate manufacturer would divide the total Dairy and Cattle feeds shipped in the province of Quebec (9,643 tons) by 6.0 and add 362 tons of concentrates moving out of the industry thus:

$$\frac{9,643}{6.0} = 1,607 + 362 = 1,969 \text{ tons}$$

To the above he would relate his total shipments of Dairy and Cattle concentrates for the province of Quebec during the same period.

In terms of complete feeds, the complete feeds manufacturer (including franchise operators) would assess their share of the market by determining, in the following manner, the total supply of finished feeds:

Total commercial feeds shipped		9,643 tons (see page 10)
Estimated feeds produced from concentrates sold outside the industry from which would be	362 x 6.0 =	2,172 tons (see page 4)
Total supply of finished feeds used as finished feeds or in the form of concentrates		11,815 tons

(1) Includes franchise operators and those secondary manufacturers who use concentrates to manufacture complete feeds.

(2) Includes manufacturers who produce finished feeds directly from raw materials.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

In October, 1947 the Dominion Bureau of Statistics, in co-operation with the National Council of the Canadian Feed Manufacturers' Association, commenced a survey on a sample basis of Shipments of Prepared Stock and Poultry Feeds, showing export shipments as well as provincial destinations in Canada.

By 1950 the monthly survey on Shipments assumed real value since it formed a basis of comparing current months with corresponding months of the previous year. Because it was still difficult to estimate certain individual commodities reliably, the coverage of the survey was increased to 200 firms in 1951 and became representative of about 76% of the total volume of the industry. This series was presented on an index basis up to the end of 1953.

During 1953 the feeds industry desired volume figures which would reveal the actual disappearance into the hands of ultimate consumers. The result is the current survey which is produced from monthly returns of all primary manufacturers of concentrates together with returns of a sample survey of manufacturers who use raw ingredients in their finished feeds.

The information presented in this report has been arranged as follows:

Table 1 presents the total annual production of Primary and Secondary or complete feeds in Canada for 1956 together with an estimate of production for the calendar year 1957 and as well the production for the current month in 1957 and 1958 with cumulative totals for 1957 and 1958.

Table 2 shows the 1958 shipments of primary or concentrated feeds by principal commodities, provincial destination and export. Column (a) gives the total shipments of all concentrates while column (b) gives the shipments of concentrates moving out of the Industry in their original form. The difference between column (a) and column (b) shows the amount of primary feeds used by the secondary feed manufacturers in producing complete feeds. Factor No. 2, which will convert concentrates to feeds is included respectively in brackets after the title of each concentrate. (See pages 4, 6 and 8). How to use these factors is explained on page 21.

Table 3 shows the volume of monthly shipments of secondary or complete feeds by principal commodities, provincial destination and export. Using conversion factors provided by all firms in the primary survey, the resulting volume of feeds has been added to those totals reported by firms which manufacture finished feeds from raw materials. The volume of feeds, shown in this section, therefore, represents the estimated total feeds shipped by all types of manufacturers including franchise operators and independent manufacturers who purchase concentrates from primary manufacturers. Factor No. 1, which will show the proportion of concentrates moving out of the Industry is shown on page 20.

Table 4 presents the volume of shipments by manufacturers of other types of stock feeds by principal commodities, provincial destination and export. In this section specialized feeds such as dog and cat foods, mineral mixtures, etc., are the result of 100% survey of the producing industry. Other commodities are estimated on a sample basis.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

CLASSIFICATION OF FEEDS

A complete feed is a formulated feed to be fed as is, and may be in the form of mash, pellets, crumbles, cubes, etc. For your assistance in classifying these commodities, the following explanation is offered:

1. Calf concentrates - Any concentrate or making a complete Calf Feed.

2. Dairy and Cattle concentrates - Any concentrate 24% protein or higher for Cattle or Dairy Cows.

3. Swine concentrates - Any concentrate 35% protein or higher for swine.

4. Poultry Concentrates:
   (a) Chick Starter Concentrates - Any concentrate for making a complete Chick Starter.
   (b) Broiler Concentrates - Any concentrate for making a complete Broiler Feed.
   (c) Growing Concentrates - Any concentrate for making a complete feed for growing chickens.
   (d) Laying and Hatching Concentrates - Any concentrate for making a complete feed for laying hens.
   (e) Fattening and Finishing Concentrates - Any concentrate for making a complete fattening feed for fowl other than Broilers or Turkeys.
   (f) Turkey Concentrates - Any concentrate for making a complete turkey feed.
   (g) Other Concentrates - Any concentrate for Poultry not covered by any other classification.

5. Calf feeds - Any complete feed for calves up to 5 months of age.

6. Dairy and Cattle Feeds - Any complete feed under 24% protein for Cattle or Dairy Cows but excluding Calf Feeds.

7. Swine Feeds - Any complete swine feed under 35% protein.

8. Poultry Feeds:
   (a) Chick Starter Feeds - Any complete feed for starting chickens other than Broilers.
   (b) Broilers Feeds - Any complete feed for starting, growing or finishing Broilers.
   (c) Growing Feeds - Any complete feed for growing chickens.
   (d) Laying and Hatching Feeds - Any complete feed for laying hens.
   (e) Fattening and Finishing Feeds - Any complete feed for fattening cockerels, capons or other fowl other than broilers and turkeys and excluding Scratch Grains.
   (f) Turkey Feeds - Any complete feed for starting, growing or finishing turkeys.
   (g) Other Complete Feeds - Any complete feed for pheasants, ducks or other poultry and not covered by any other classification.

11. Dog and Cat Foods:
   (b) Biscuits - Kibble and all baked products.
   (c) Meal - Pellets, cubes and other forms.

12. Scratch Grains - Any mixture of Whole or Cracked Grains only for Poultry.

13. Other Animal Feeds - Such as Horse Feed, Rabbit Feed, etc.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 1 - Production of Prepared Stock and Poultry Feeds in Canada 1956 together with estimated comparable data for 1957. Current monthly production accompanied by cumulative totals for 1957 and 1958 reported in columns (3), (4), (5), and (6) respectively.

(c) Growing Concentrates	.500	.692	.674	.544	.797	.726	.217	.182	.260	.297	.712
(d) Laying and Hatching Concentrates	0	.741	.740	.581	.866	.562	.206	.089	.186	.098	.697
(e) Fattening & Finishing Concontrates	0	.882	.231	.412	.923	.673	.129	0	.338	.666	0
(f) Turkey Concentrates	0	1.000	.962	.395	.965	.887	.295	.342	.278	.361	0
(g) Other Poultry Concentrates	0	.246	.116	.596	.258	.429	.019	0	1.000	0	.333

In converting concentrates to finished feeds, the Bureau uses the above factors to establish the amount of concentrates which moved into the secondary manufacturing industry, as such. These factors were established from the returns of all firms in the survey and reflect the weighted average above, which we use for a current 12 months reports. If you agree that changes should be made in any of these factors, you should advise us at once whether or not you think the factor is low or high.

From the above, you will notice that 86.8 per cent of the calf concentrates shipped in the province of Ontario in any month during 1954 moved into the hands of franchise operators and other manufacturers who make feeds from concentrates. The balance, or 13.2 per cent, moved out of the industry and was used by farmers and other similar consumers directly.

Factor No. 2, which will turn concentrates into finished feeds, is given on pages 4, 6 and 8 in brackets after the name of each commodity.

HOW TO USE THE CONVERSION FACTORS

You will note on page 4 that the industry reported they had shipped in the province of Quebec for January, 1958 1,533 tons of Dairy and Cattle concentrates, of which 362 tons were used or sold directly for use to the farmer and other such consumers. In other words, 1,171 tons moved into the hands of secondary manufacturers for further use in manufacturing complete feeds. In order to obtain the finished feeds resulting from the conversion of 1,171 tons of Dairy and Cattle concentrates, we make use of the conversion factor as follows:

1,171 x 6.0 = 7,026 tons of Dairy and Cattle Feeds.

Now turn to page 10 and you will see that the shipments of Dairy and Cattle Feeds in the province of Quebec in the same month amounted to 9,643 tons. The summary would appear as follows.

Total shipments = 9,643 tons

Shipments by secondary manufacturers (1) = 7,026 tons

Shipments by manufacturers (2) = 2,617 tons

In order to assess the proportion of total feed shipments, which your firm enjoys, the following instructions are important. In terms of concentrates, the concentrate manufacturer would divide the total Dairy and Cattle feeds shipped in the province of Quebec (9,643 tons) by 6.0 and add 362 tons of concentrates moving out of the industry thus:

$$\frac{9,643}{6.0} = 1,607 + 362 = 1,969 \text{ tons}$$

To the above he would relate his total shipments of Dairy and Cattle concentrates for the province of Quebec during the same period.

In terms of complete feeds, the complete feeds manufacturer (including franchise operators) would assess their share of the market by determining, in the following manner, the total supply of finished feeds:

Total commercial feeds shipped		9,643 tons (see page 10)
Estimated feeds produced from concentrates sold outside the industry from which would be	362 x 6.0 =	2,172 tons (see page 4)
Total supply of finished feeds used as finished feeds or in the form of concentrates		11,815 tons

(1) Includes franchise operators and those secondary manufacturers who use concentrates to manufacture complete feeds.

(2) Includes manufacturers who produce finished feeds directly from raw materials.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

In October, 1947 the Dominion Bureau of Statistics, in co-operation with the National Council of the Canadian Feed Manufacturers' Association, commenced a survey on a sample basis of Shipments of Prepared Stock and Poultry Feeds, showing export shipments as well as provincial destinations in Canada.

By 1950 the monthly survey on Shipments assumed real value since it formed a basis of comparing current months with corresponding months of the previous year. Because it was still difficult to estimate certain individual commodities reliably, the coverage of the survey was increased to 200 firms in 1951 and became representative of about 76% of the total volume of the industry. This series was presented on an index basis up to the end of 1953.

During 1953 the feeds industry desired volume figures which would reveal the actual disappearance into the hands of ultimate consumers. The result is the current survey which is produced from monthly returns of all primary manufacturers of concentrates together with returns a sample survey of manufacturers who use raw ingredients in their finished feeds.

The information presented in this report has been arranged as follows:

Table 1 presents the total annual production of Primary and Secondary or complete feeds in Canada for 1957 together with an estimate of production for the calendar year 1958 and as well the production for the current month in 1958 and 1959 with cumulative totals for 1958 and 1959.

Table 2 shows the 1959 shipments of primary or concentrated feeds by principal commodities, provincial destination and export. Column (a) gives the total shipments of all concentrates while column (b) gives the shipments of concentrates moving out of the Industry in their original form. The difference between column (a) and column (b) shows the amount of primary feeds used by the secondary feed manufacturers in producing complete feeds. Factor No. 2, which will convert concentrates to feeds is included respectively in brackets after the title of each concentrate. (See pages 4, and 8). How to use these factors is explained on page 21.

Table 3 shows the volume of monthly shipments of secondary or complete feeds by principal commodities, provincial destination and export. Using conversion factors provided by all firms in the primary survey, the resulting volume of feeds has been added to those totals reported by firms which manufacture finished feeds from raw materials. The volume of feeds, shown in this section, therefore, represents the estimated total feeds shipped by all types of manufacturers including franchise operators and independent manufacturers who purchase concentrates from primary manufacturers. Factor No. 1, which will show the proportion of concentrates moving out of the Industry is shown on page 20.

Table 4 presents the volume of shipments by manufacturers of other types of stock feeds by principal commodities, provincial destination and export. In this section specialized feeds such as dog and cat foods, mineral mixtures, etc., are the result of 100% survey of the producing industry. Other commodities are estimated on a sample basis.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

CLASSIFICATION OF FEEDS

A complete feed is a formulated feed to be fed as is, and may be in the form of mash, pellets, crumbles, cubes, etc. For your assistance in classifying these commodities, the following explanation is offered:

1. Calf concentrates - Any concentrate or making a complete Calf Feed.

2. Dairy and Cattle concentrates - Any concentrate 24% protein or higher for Cattle or Dairy Cows.

3. Swine concentrates - Any concentrate 35% protein or higher for swine.

4. Poultry Concentrates:
   (a) Chick Starter Concentrates - Any concentrate for making a complete Chick Starter.
   (b) Broiler Concentrates - Any concentrate for making a complete Broiler Feed.
   (c) Growing Concentrates - Any concentrate for making a complete feed for growing chickens.
   (d) Laying and Hatching Concentrates - Any concentrate for making a complete feed for laying hens.
   (e) Fattening and Finishing Concentrates - Any concentrate for making a complete fattening feed for fowl other than Broilers or Turkeys.
   (f) Turkey Concentrates - Any concentrate for making a complete turkey feed.
   (g) Other Concentrates - Any concentrate for Poultry not covered by any other classification.

5. Calf feeds - Any complete feed for calves up to 5 months of age.

6. Dairy and Cattle Feeds - Any complete feed under 24% protein for Cattle or Dairy Cows but excluding Calf Feeds.

7. Swine Feeds - Any complete swine feed under 35% protein.

8. Poultry Feeds:
   (a) Chick Starter Feeds - Any complete feed for starting chickens other than Broilers.
   (b) Broilers Feeds - Any complete feed for starting, growing or finishing Broilers.
   (c) Growing Feeds - Any complete feed for growing chickens.
   (d) Laying and Hatching Feeds - Any complete feed for laying hens.
   (e) Fattening and Finishing Feeds - Any complete feed for fattening cockerels, capons or other fowl other than broilers and turkeys and excluding Scratch Grains.
   (f) Turkey Feeds - Any complete feed for starting, growing or finishing turkeys.
   (g) Other Complete Feeds - Any complete feed for pheasants, ducks or other poultry and not covered by any other classification.

11. Dog and Cat Foods:
   (b) Biscuits - Kibble and all baked products.
   (c) Meal - Pellets, cubes and other forms.

12. Scratch Grains - Any mixture of Whole or Cracked Grains only for Pultry.

13. Other Animal Feeds - Such as Horse Feed, Rabbit Feed. etc.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 1 - Shipments of Prepared Stock and Poultry Feeds in Canada 1957 together with estimated comparable data for 1958. Current monthly shipments accompanied by cumulative totals for 1958 and 1959 reported in columns (3), (4), (5), and (6) respectively.

In converting concentrates to finished feeds, the Bureau uses the above factors to establish the amounts of concentrates which moved into the secondary manufacturing industry, as such. These factors were established from the returns of all firms in the survey and reflect the weighted average above, which we use for a current 12 months reports. If you agree that changes should be made in any of these factors, you should advise us at once whether or not you think the factor is low or high.

From the above, you will notice that 86.8 per cent of the calf concentrates shipped in the province of Ontario in any month during 1954 moved into the hands of franchise operators and other manufacturers who make feeds from concentrates. The balance, or 13.2 per cent, moved out of the industry and was used by farmers and other similar consumers directly.

Factor No. 2, which will turn concentrates into finished feeds, is given on pages 4, 6 and 8 in brackets after the name of each commodity.

HOW TO USE THE CONVERSION FACTORS

You will note on page 4 that the industry reported they had shipped in the province of Quebec for January, 1959 1,688 tons of Dairy and Cattle concentrates, of which 398 tons were used or sold directly for use to the farmer and other such consumers. In other words, 1,171 tons moved into the hands of secondary manufacturers for further use in manufacturing complete feeds. In order to obtain the finished feeds resulting from the conversion of 1,290 tons of Dairy and Cattle concentrates, we make use of the conversion factor as follows:

1,290 x 6.0 = 7,740 tons of Dairy and Cattle Feeds.

Now turn to page 10 and you will see that the shipments of Dairy and Cattle Feeds in the province of Quebec in the same month amounted to 10,290 tons. The summary would appear as follows:

Total shipments = 10,290 tons

Shipments by secondary manufacturers (1) = 7,740 tons

Shipments by manufacturers (2) = 2,550 tons

In order to assess the proportion of total feed shipments, which your firm enjoys, the following instructions are important. In terms of concentrates, the concentrate manufacturer would divide the total Dairy and Cattle feeds shipped in the province of Quebec (10,290 tons) by 6.0 and add 398 tons of concentrates moving out of the industry thus:

$$\frac{10,290}{6.0} = 1,713 + 398 = 2,111 \text{ tons}$$

To the above he would relate his total shipments of Dairy and Cattle concentrates for the province of Quebec during the same period.

In terms of complete feeds, the complete feeds manufacturer (including franchise operators) would assess their share of the market by determining, in the following manner, the total supply of finished feeds:

Total commercial feeds shipped		10,290 tons	(see page 10)
Estimated feeds produced from concentrates sold outside the industry from which would be	398 x 6.0 =	2,388 tons	(see page 4)
Total supply of finished feeds used as finished feeds or in the form of concentrates		12,678 tons	

(1) Includes franchise operators and those secondary manufacturers who use concentrates to manufacture complete feeds.

(2) Includes manufacturers who produce finished feeds directly from raw materials.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

In October, 1947 the Dominion Bureau of Statistics, in co-operation with the National Council of the Canadian Feed Manufacturers' Association, commenced a survey on a sample basis of Shipments of Prepared Stock and Poultry Feeds, showing export shipments as well as provincial destinations in Canada.

By 1950 the monthly survey on Shipments assumed real value since it formed a basis of comparing current months with corresponding months of the previous year. Because it was still difficult to estimate certain individual commodities reliably, the coverage of the survey was increased to 200 firms in 1951 and became representative of about 76% of the total volume of the industry. This series was presented on an index basis up to the end of 1953.

During 1953 the feeds industry desired volume figures which would reveal the actual disappearance into the hands of ultimate consumers. The result is the current survey which is produced from monthly returns of all primary manufacturers of concentrates together with returns of a sample survey of manufacturers who use raw ingredients in their finished feeds.

The information presented in this report has been arranged as follows:

Table 1 presents the total annual production of Primary and Secondary or complete feeds in Canada for 1957 together with an estimate of production for the calendar year 1958 and as well the production for the current month in 1958 and 1959 with cumulative totals for 1958 and 1959.

Table 2 shows the 1959 shipments of primary or concentrated feeds by principal commodities, provincial destination and export. Column (a) gives the total shipments of all concentrates while column (b) gives the shipments of concentrates moving out of the Industry in their original form. The difference between column (a) and column (b) shows the amount of primary feeds used by the secondary feed manufacturers in producing complete feeds. Factor No. 2, which will convert concentrates to feeds is included respectively in brackets after the title of each concentrate. (See pages 4, 6 and 8). How to use these factors is explained on page 21.

Table 3 shows the volume of monthly shipments of secondary or complete feeds by principal commodities, provincial destination and export. Using conversion factors provided by all firms in the primary survey, the resulting volume of feeds has been added to those totals reported by firms which manufacture finished feeds from raw materials. The volume of feeds, shown in this section, therefore, represents the estimated total feeds shipped by all types of manufacturers including franchise operators and independent manufacturers who purchase concentrates from primary manufacturers. Factor No. 1, which will show the proportion of concentrates moving out of the Industry is shown on page 20.

Table 4 presents the volume of shipments by manufacturers of other types of stock feeds by principal commodities, provincial destination and export. In this section specialized feeds such as dog and cat foods, mineral mixtures, etc., are the result of 100% survey of the producing industry. Other commodities are estimated on a sample basis.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

CLASSIFICATION OF FEEDS

A complete feed is a formulated feed to be fed as is, and may be in the form of mash, pellets, crumbles, cubes, etc. For your assistance in classifying these commodities, the following explanation is offered:

1. Calf concentrates - Any concentrate or making a complete Calf Feed.

2. Dairy and Cattle concentrates - Any concentrate 24% protein or higher for Cattle or Dairy Cows.

3. Swine concentrates - Any concentrate 35% protein or higher for swine.

4. Poultry Concentrates:
   (a) Chick Starter Concentrates - Any concentrate for making a complete Chick Starter.
   (b) Broiler Concentrates - Any concentrate for making a complete Broiler Feed.
   (c) Growing Concentrates - Any concentrate for making a complete feed for growing chickens.
   (d) Laying and Hatching Concentrates - Any concentrate for making a complete feed for laying hens.
   (e) Fattening and Finishing Concentrates - Any concentrate for making a complete fattening feed for fowl other than Broilers or Turkeys.
   (f) Turkey Concentrates - Any concentrate for making a complete turkey feed.
   (g) Other Concentrates - Any concentrate for Poultry not covered by any other classification.

5. Calf feeds - Any complete feed for calves up to 5 months of age.

6. Dairy and Cattle Feeds - Any complete feed under 24% protein for Cattle or Dairy Cows but excluding Calf Feeds.

7. Swine Feeds - Any complete swine feed under 35% protein.

8. Poultry Feeds:
   (a) Chick Starter Feeds - Any complete feed for starting chickens other than Broilers.
   (b) Broilers Feeds - Any complete feed for starting, growing or finishing Broilers.
   (c) Growing Feeds - Any complete feed for growing chickens.
   (d) Laying and Hatching Feeds - Any complete feed for laying hens.
   (e) Fattening and Finishing Feeds - Any complete feed for fattening cockerels, capons or other fowl other than broilers and turkeys and excluding Scratch Grains.
   (f) Turkey Feeds - Any complete feed for starting, growing or finishing turkeys.
   (g) Other Complete Feeds - Any complete feed for pheasants, ducks or other poultry and not covered by any other classification.

11. Dog and Cat Foods:
   (b) Biscuits - Kibble and all baked products.
   (c) Meal - Pellets, cubes and other forms.

12. Scratch Grains - Any mixture of Whole or Cracked Grains only for Pultry.

13. Other Animal Feeds - Such as Horse Feed, Rabbit Feed. etc.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 1 - Shipments of Prepared Stock and Poultry Feeds in Canada 1957 together with estimated comparable data for 1958 Current monthly shipments accompanied by cumulative totals for 1958 and 1959 reported in columns (3), (4), (5), and (6) respectively.

(g) Other Poultry Concentrates	0	.246	.116	.596	.258	.429	.019	0	1.000	0	.333

In converting concentrates to finished feeds, the Bureau uses the above factors to establish the amounts of concentrates which moved into the secondary manufacturing industry, as such. These factors were established from the returns of all firms in the survey and reflect the weighted average above, which we use for a current 12 months reports. If you agree that changes should be made in any of these factors, you should advise us at once whether or not you think the factor is low or high.

From the above, you will notice that 86.8 per cent of the calf concentrates shipped in the province of Ontario in any month during 1954 moved into the hands of franchise operators and other manufacturers who make feeds from concentrates. The balance, or 13.2 per cent, moved out of the industry and was used by farmers and other similar consumers directly.

Factor No. 2, which will turn concentrates into finished feeds, is given on pages 4, 6 and 8 in brackets after the name of each commodity.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

HOW TO USE THE CONVERSION FACTORS

You will note on page 4 that the industry reported they had shipped in the province of Quebec for January, 1959 1,688 tons of Dairy and Cattle concentrates, of which 398 tons were used or sold directly for use to the farmer and other such consumers. In other words, 1,171 tons moved into the hands of secondary manufacturers for further use in manufacturing complete feeds. In order to obtain the finished feeds resulting from the conversion of 1,290 tons of Dairy and Cattle concentrates, we make use of the conversion factor as follows:

1,290 x 6.0 = 7,740 tons of Dairy and Cattle Feeds.

Now turn to page 10 and you will see that the shipments of Dairy and Cattle Feeds in the province of Quebec in the same month amounted to 10,290 tons. The summary would appear as follows:

Total shipments = 10,290 tons

Shipments by secondary manufacturers (1) = 7,740 tons

Shipments by manufacturers (2) = 2,550 tons

In order to assess the proportion of total feed shipments, which your firm enjoys, the following instructions are important. In terms of concentrates, the concentrate manufacturer would divide the total Dairy and Cattle feeds shipped in the province of Quebec (10,290 tons) by 6.0 and add 398 tons of concentrates moving out of the industry thus:

$$\frac{10,290}{6.0} = 1,713 + 398 = 2,111 \text{ tons}$$

To the above he would relate his total shipments of Dairy and Cattle concentrates for the province of Quebec during the same period.

In terms of complete feeds, the complete feeds manufacturer (including franchise operators) would assess their share of the market by determining, in the following manner, the total supply of finished feeds:

Total commercial feeds shipped		10,290 tons (see page 10)
Estimated feeds produced from concentrates sold outside the industry from which would be	398 x 6.0 =	2,388 tons (see page 4)
Total supply of finished feeds used as finished feeds or in the form of concentrates		12,678 tons

(1) Includes franchise operators and those secondary manufacturers who use concentrates to manufacture complete feeds.

(2) Includes manufacturers who produce finished feeds directly from raw materials.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

In October, 1947 the Dominion Bureau of Statistics, in co-operation with the National Council of the Canadian Feed Manufacturers' Association, commenced a survey on a sample basis of Shipments of Prepared Stock and Poultry Feeds, showing export shipments as well as provincial destinations in Canada.

By 1950 the monthly survey on Shipments assumed real value since it formed a basis of comparing current months with corresponding months of the previous year. Because it was still difficult to estimate certain individual commodities reliably, the coverage of the survey was increased to 200 firms in 1951 and became representative of about 76% of the total volume of the industry. This series was presented on an index basis up to the end of 1953.

During 1953 the feeds industry desired volume figures which would reveal the actual disappearance into the hands of ultimate consumers. The result is the current survey which is produced from monthly returns of all primary manufacturers of concentrates together with returns of a sample survey of manufacturers who use raw ingredients in their finished feeds.

The information presented in this report has been arranged as follows:

Table 1 presents the total annual production of Primary and Secondary or complete feeds in Canada for 1957 together with an estimate of production for the calendar year 1958 and as well the production for the current month in 1958 and 1959 with cumulative totals for 1958 and 1959.

Table 2 shows the 1959 shipments of primary or concentrated feeds by principal commodities, provincial destination and export. Column (a) gives the total shipments of all concentrates while column (b) gives the shipments of concentrates moving out of the Industry in their original form. The difference between column (a) and column (b) shows the amount of primary feeds used by the secondary feed manufacturers in producing complete feeds. Factor No. 2, which will convert concentrates to feeds is included respectively in brackets after the title of each concentrate. (See pages 4, 6 and 8). How to use these factors is explained on page 21.

Table 3 shows the volume of monthly shipments of secondary or complete feeds by principal commodities, provincial destination and export. Using conversion factors provided by all firms in the primary survey, the resulting volume of feeds has been added to those totals reported by firms which manufacture finished feeds from raw materials. The volume of feeds, shown in this section, therefore, represents the estimated total feeds shipped by all types of manufacturers including franchise operators and independent manufacturers who purchase concentrates from primary manufacturers. Factor No. 1, which will show the proportion of concentrates moving out of the Industry is shown on page 20.

Table 4 presents the volume of shipments by manufacturers of other types of stock feeds by principal commodities, provincial destination and export. In this section specialized feeds such as dog and cat foods, mineral mixtures, etc., are the result of 100% survey of the producing industry. Other commodities are estimated on a sample basis.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

CLASSIFICATION OF FEEDS

A complete feed is a formulated feed to be fed as is, and may be in the form of mash, pellets, crumbles, cubes, etc. For your assistance in classifying these commodities, the following explanation is offered:

1. Calf concentrates - Any concentrate or making a complete Calf Feed.

2. Dairy and Cattle concentrates - Any concentrate 24% protein or higher for Cattle or Dairy Cows.

3. Swine concentrates - Any concentrate 35% protein or higher for swine.

4. Poultry Concentrates:
   (a) Chick Starter Concentrates - Any concentrate for making a complete Chick Starter.
   (b) Broiler Concentrates - Any concentrate for making a complete Broiler Feed.
   (c) Growing Concentrates - Any concentrate for making a complete feed for growing chickens.
   (d) Laying and Hatching Concentrates - Any concentrate for making a complete feed for laying hens.
   (e) Fattening and Finishing Concentrates - Any concentrate for making a complete fattening feed for fowl other than Broilers or Turkeys.
   (f) Turkey Concentrates - Any concentrate for making a complete turkey feed.
   (g) Other Concentrates - Any concentrate for Poultry not covered by any other classification.

5. Calf feeds - Any complete feed for calves up to 5 months of age.

6. Dairy and Cattle Feeds - Any complete feed under 24% protein for Cattle or Dairy Cows but excluding Calf Feeds.

7. Swine Feeds - Any complete swine feed under 35% protein.

8. Poultry Feeds:
   (a) Chick Starter Feeds - Any complete feed for starting chickens other than Broilers.
   (b) Broilers Feeds - Any complete feed for starting, growing or finishing Broilers.
   (c) Growing Feeds - Any complete feed for growing chickens.
   (d) Laying and Hatching Feeds - Any complete feed for laying hens.
   (e) Fattening and Finishing Feeds - Any complete feed for fattening cockerels, capons or other fowl other than broilers and turkeys and excluding Scratch Grains.
   (f) Turkey Feeds - Any complete feed for starting, growing or finishing turkeys.
   (g) Other Complete Feeds - Any complete feed for pheasants, ducks or other poultry and not covered by any other classification.

11. Dog and Cat Foods:
   (b) Biscuits - Kibble and all baked products.
   (c) Meal - Pellets, cubes and other forms.

12. Scratch Grains - Any mixture of Whole or Cracked Grains only for Pultry.

13. Other Animal Feeds - Such as Horse Feed, Rabbit Feed. etc.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 1 - Shipments of Prepared Stock and Poultry Feeds in Canada 1957 together with estimated comparable data for 1958. Current monthly shipments accompanied by cumulative totals for 1958 and 1959 reported in columns (3), (4), (5), and (6) respectively.

(b) Broiler Concentrates	0	.607	.877	.019	.999	.968	.485	0	.861	1.000	.500
(c) Growing Concentrates	.500	.692	.674	.544	.797	.726	.217	.182	.260	.297	.712
(d) Laying and Hatching Concentrates	0	.741	.740	.581	.866	.562	.206	.089	.186	.098	.697
(e) Fattening & Finishing Concentrates	0	.882	.231	.412	.923	.673	.129	0	.338	.666	0
(f) Turkey Concentrates	0	1.000	.962	.395	.965	.887	.295	.342	.278	.361	0
(g) Other Poultry Concentrates	0	.246	.116	.596	.258	.429	.019	0	1.000	0	.333

In converting concentrates to finished feeds, the Bureau uses the above factors to establish the amounts of concentrates which moved into the secondary manufacturing industry, as such. These factors were established from the returns of all firms in the survey and reflect the weighted average above, which we use for a current 12 months reports. If you agree that changes should be made in any of these factors, you should advise us at once whether or not you think the factor is low or high.

From the above, you will notice that 86.8 per cent of the calf concentrates shipped in the province of Ontario in any month during 1954 moved into the hands of franchise operators and other manufacturers who make feeds from concentrates. The balance, or 13.2 per cent, moved out of the industry and was used by farmers and other similar consumers directly.

Factor No. 2, which will turn concentrates into finished feeds, is given on pages 4, 6 and 8 in brackets after the name of each commodity.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 4 - ALL OTHER ANIMAL FEEDS. Volume of monthly shipments of other prepared stock feeds by principal commodities, provincial destination and export, 1958 - 1959, shown in tons. (Concluded)

HOW TO USE THE CONVERSION FACTORS

You will note on page 4 that the industry reported they had shipped in the province of Quebec for January, 1959 1,688 tons of Dairy and Cattle concentrates, of which 398 tons were used or sold directly for use to the farmer and other such consumers. In other words, 1,171 tons moved into the hands of secondary manufacturers for further use in manufacturing complete feeds. In order to obtain the finished feeds resulting from the conversion of 1,290 tons of Dairy and Cattle concentrates, we make use of the conversion factor as follows:

1,290 x 6.0 = 7,740 tons of Dairy and Cattle Feeds.

Now turn to page 10 and you will see that the shipments of Dairy and Cattle Feeds in the province of Quebec in the same month amounted to 10,290 tons. The summary would appear as follows:

Total shipments = 10,290 tons

Shipments by secondary manufacturers (1) = 7,740 tons

Shipments by manufacturers (2) = 2,550 tons

In order to assess the proportion of total feed shipments, which your firm enjoys, the following instructions are important. In terms of concentrates, the concentrate manufacturer would divide the total Dairy and Cattle feeds shipped in the province of Quebec (10,290 tons) by 6.0 and add 398 tons of concentrates moving out of the industry thus:

$$\frac{10,290}{6.0} = 1,713 + 398 = 2,111 \text{ tons}$$

To the above he would relate his total shipments of Dairy and Cattle concentrates for the province of Quebec during the same period.

In terms of complete feeds, the complete feeds manufacturer (including franchise operators) would assess their share of the market by determining, in the following manner, the total supply of finished feeds:

Total commercial feeds shipped		10,290 tons (see page 10)
Estimated feeds produced from concentrates sold outside the industry from which would be	398 x 6.0 =	2,388 tons (see page 4)
Total supply of finished feeds used as finished feeds or in the form of concentrates		12,678 tons

(1) Includes franchise operators and those secondary manufacturers who use concentrates to manufacture complete feeds.

(2) Includes manufacturers who produce finished feeds directly from raw materials.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

In October, 1947 the Dominion Bureau of Statistics, in co-operation with the National Council of the Canadian Feed Manufacturers' Association, commenced a survey on a sample basis of Shipments of Prepared Stock and Poultry Feeds, showing export shipments as well as provincial destinations in Canada.

By 1950 the monthly survey on Shipments assumed real value since it formed a basis of comparing current months with corresponding months of the previous year. Because it was still difficult to estimate certain individual commodities reliably, the coverage of the survey was increased to 200 firms in 1951 and became representative of about 76% of the total volume of the industry. This series was presented on an index basis up to the end of 1953.

During 1953 the feeds industry desired volume figures which would reveal the actual disappearance into the hands of ultimate consumers. The result is the current survey which is produced from monthly returns of all primary manufacturers of concentrates together with returns of a sample survey of manufacturers who use raw ingredients in their finished feeds.

The information presented in this report has been arranged as follows:

Table 1 presents the total annual production of Primary and Secondary or complete feeds in Canada for 1957 together with an estimate of production for the calendar year 1958 and as well the production for the current month in 1958 and 1959 with cumulative totals for 1958 and 1959.

Table 2 shows the 1959 shipments of primary or concentrated feeds by principal commodities, provincial destination and export. Column (a) gives the total shipments of all concentrates while column (b) gives the shipments of concentrates moving out of the Industry in their original form. The difference between column (a) and column (b) shows the amount of primary feeds used by the secondary feed manufacturers in producing complete feeds. Factor No. 2, which will convert concentrates to feeds is included respectively in brackets after the title of each concentrate. (See pages 4, 6 and 8). How to use these factors is explained on page 21.

Table 3 shows the volume of monthly shipments of secondary or complete feeds by principal commodities, provincial destination and export. Using conversion factors provided by all firms in the primary survey, the resulting volume of feeds has been added to those totals reported by firms which manufacture finished feeds from raw materials. The volume of feeds, shown in this section, therefore, represents the estimated total feeds shipped by all types of manufacturers including franchise operators and independent manufacturers who purchase concentrates from primary manufacturers. Factor No. 1, which will show the proportion of concentrates moving out of the Industry is shown on page 20.

Table 4 presents the volume of shipments by manufacturers of other types of stock feeds by principal commodities, provincial destination and export. In this section specialized feeds such as dog and cat foods, mineral mixtures, etc., are the result of 100% survey of the producing industry. Other commodities are estimated on a sample basis.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

CLASSIFICATION OF FEEDS

A complete feed is a formulated feed to be fed as is, and may be in the form of mash, pellets, crumbles, cubes, etc. For your assistance in classifying these commodities, the following explanation is offered:

1. Calf concentrates - Any concentrate or making a complete Calf Feed.

2. Dairy and Cattle concentrates - Any concentrate 24% protein or higher for Cattle or Dairy Cows.

3. Swine concentrates - Any concentrate 35% protein or higher for swine.

4. Poultry Concentrates:
   (a) Chick Starter Concentrates - Any concentrate for making a complete Chick Starter.
   (b) Broiler Concentrates - Any concentrate for making a complete Broiler Feed.
   (c) Growing Concentrates - Any concentrate for making a complete feed for growing chickens.
   (d) Laying and Hatching Concentrates - Any concentrate for making a complete feed for laying hens.
   (e) Fattening and Finishing Concentrates - Any concentrate for making a complete fattening feed for fowl other than Broilers or Turkeys.
   (f) Turkey Concentrates - Any concentrate for making a complete turkey feed.
   (g) Other Concentrates - Any concentrate for Poultry not covered by any other classification.

5. Calf feeds - Any complete feed for calves up to 5 months of age.

6. Dairy and Cattle Feeds - Any complete feed under 24% protein for Cattle or Dairy Cows but excluding Calf Feeds.

7. Swine Feeds - Any complete swine feed under 35% protein.

8. Poultry Feeds:
   (a) Chick Starter Feeds - Any complete feed for starting chickens other than Broilers.
   (b) Broilers Feeds - Any complete feed for starting, growing or finishing Broilers.
   (c) Growing Feeds - Any complete feed for growing chickens.
   (d) Laying and Hatching Feeds - Any complete feed for laying hens.
   (e) Fattening and Finishing Feeds - Any complete feed for fattening cockerels, capons or other fowl other than broilers and turkeys and excluding Scratch Grains.
   (f) Turkey Feeds - Any complete feed for starting, growing or finishing turkeys
   (g) Other Complete Feeds - Any complete feed for pheasants, ducks or other poultry and not covered by any other classification.

11. Dog and Cat Foods:
   (b) Biscuits - Kibble and all baked products.
   (c) Meal - Pellets, cubes and other forms.

12. Scratch Grains - Any mixture of Whole or Cracked Grains only for Pultry.

13. Other Animal Feeds - Such as Horse Feed, Rabbit Feed. etc.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 1 - Shipments of Prepared Stock and Poultry Feeds in Canada 1957 together with estimated comparable data for 1958. Current monthly shipments accompanied by cumulative totals for 1958 and 1959 reported in columns (3), (4), (5), and (6) respectively.

(f) Turkey Concentrates	0	1.000	.962	.395	.965	.887	.295	.342	.278	.361	0
(g) Other Poultry Concentrates	0	.246	.116	.596	.258	.429	.019	0	1.000	0	.333

In converting concentrates to finished feeds, the Bureau uses the above factors to establish the amounts of concentrates which moved into the secondary manufacturing industry, as such. These factors were established from the returns of all firms in the survey and reflect the weighted average above, which we use for a current 12 months reports. If you agree that changes should be made in any of these factors, you should advise us at once whether or not you think the factor is low or high.

From the above, you will notice that 86.8 per cent of the calf concentrates shipped in the province of Ontario in any month during 1954 moved into the hands of franchise operators and other manufacturers who make feeds from concentrates. The balance, or 13.2 per cent, moved out of the industry and was used by farmers and other similar consumers directly.

Factor No. 2, which will turn concentrates into finished feeds, is given on pages 4, 6 and 8 in brackets after the name of each commodity.

HOW TO USE THE CONVERSION FACTORS

You will note on page 4 that the industry reported they had shipped in the province of Quebec for January, 1959 1,688 tons of Dairy and Cattle concentrates, of which 398 tons were used or sold directly for use to the farmer and other such consumers. In other words, 1,171 tons moved into the hands of secondary manufacturers for further use in manufacturing complete feeds. In order to obtain the finished feeds resulting from the conversion of 1,290 tons of Dairy and Cattle concentrates, we make use of the conversion factor as follows:

1,290 x 6.0 = 7,740 tons of Dairy and Cattle Feeds.

Now turn to page 10 and you will see that the shipments of Dairy and Cattle Feeds in the province of Quebec in the same month amounted to 10,290 tons. The summary would appear as follows:

Total shipments = 10,290 tons

Shipments by secondary manufacturers (1) = 7,740 tons

Shipments by manufacturers (2) = 2,550 tons

In order to assess the proportion of total feed shipments, which your firm enjoys, the following instructions are important. In terms of concentrates, the concentrate manufacturer would divide the total Dairy and Cattle feeds shipped in the province of Quebec (10,290 tons) by 6.0 and add 398 tons of concentrates moving out of the industry thus:

$$\frac{10,290}{6.0} = 1,713 + 398 = 2,111 \text{ tons}$$

To the above he would relate his total shipments of Dairy and Cattle concentrates for the province of Quebec during the same period.

In terms of complete feeds, the complete feeds manufacturer (including franchise operators) would assess their share of the market by determining, in the following manner, the total supply of finished feeds:

Total commercial feeds shipped		10,290 tons (see page 10)
Estimated feeds produced from concentrates sold outside the industry from which would be	398 x 6.0 =	2,388 tons (see page 4)
Total supply of finished feeds used as finished feeds or in the form of concentrates		12,678 tons

(1) Includes franchise operators and those secondary manufacturers who use concentrates to manufacture complete feeds.

(2) Includes manufacturers who produce finished feeds directly from raw materials.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

In October, 1947 the Dominion Bureau of Statistics, in co-operation with the National Council of the Canadian Feed Manufacturers' Association, commenced a survey on a sample basis of Shipments of Prepared Stock and Poultry Feeds, showing export shipments as well as provincial destinations in Canada.

By 1950 the monthly survey on Shipments assumed real value since it formed a basis of comparing current months with corresponding months of the previous year. Because it was still difficult to estimate certain individual commodities reliably, the coverage of the survey was increased to 200 firms in 1951 and became representative of about 76% of the total volume of the industry. This series was presented on an index basis up to the end of 1953.

During 1953 the feeds industry desired volume figures which would reveal the actual disappearance into the hands of ultimate consumers. The result is the current survey which is produced from monthly returns of all primary manufacturers of concentrates together with returns of a sample survey of manufacturers who use raw ingredients in their finished feeds.

The information presented in this report has been arranged as follows:

Table 1 presents the total annual production of Primary and Secondary or complete feeds in Canada for 1957 together with an estimate of production for the calendar year 1958 and as well the production for the current month in 1958 and 1959 with cumulative totals for 1958 and 1959.

Table 2 shows the 1959 shipments of primary or concentrated feeds by principal commodities, provincial destination and export. Column (a) gives the total shipments of all concentrates while column (b) gives the shipments of concentrates moving out of the Industry in their original form. The difference between column (a) and column (b) shows the amount of primary feeds used by the secondary feed manufacturers in producing complete feeds. Factor No. 2, which will convert concentrates to feeds is included respectively in brackets after the title of each concentrate. (See pages 4, 6 and 8). How to use these factors is explained on page 21.

Table 3 shows the volume of monthly shipments of secondary or complete feeds by principal commodities, provincial destination and export. Using conversion factors provided by all firms in the primary survey, the resulting volume of feeds has been added to those totals reported by firms which manufacture finished feeds from raw materials. The volume of feeds, shown in this section, therefore, represents the estimated total feeds shipped by all types of manufacturers including franchise operators and independent manufacturers who purchase concentrates from primary manufacturers. Factor No. 1, which will show the proportion of concentrates moving out of the Industry is shown on page 20.

Table 4 presents the volume of shipments by manufacturers of other types of stock feeds by principal commodities, provincial destination and export. In this section specialized feeds such as dog and cat foods, mineral mixtures, etc., are the result of 100% survey of the producing industry. Other commodities are estimated on a sample basis.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

CLASSIFICATION OF FEEDS

A complete feed is a formulated feed to be fed as is, and may be in the form of mash, pellets, crumbles, cubes, etc. For your assistance in classifying these commodities, the following explanation is offered:

1. Calf concentrates - Any concentrate or making a complete Calf Feed.

2. Dairy and Cattle concentrates - Any concentrate 24% protein or higher for Cattle or Dairy Cows.

3. Swine concentrates - Any concentrate 35% protein or higher for swine.

4. Poultry Concentrates:
   (a) Chick Starter Concentrates - Any concentrate for making a complete Chick Starter.
   (b) Broiler Concentrates - Any concentrate for making a complete Broiler Feed.
   (c) Growing Concentrates - Any concentrate for making a complete feed for growing chickens.
   (d) Laying and Hatching Concentrates - Any concentrate for making a complete feed for laying hens.
   (e) Fattening and Finishing Concentrates - Any concentrate for making a complete fattening feed for fowl other than Broilers or Turkeys.
   (f) Turkey Concentrates - Any concentrate for making a complete turkey feed.
   (g) Other Concentrates - Any concentrate for Poultry not covered by any other classification.

5. Calf feeds - Any complete feed for calves up to 5 months of age.

6. Dairy and Cattle Feeds - Any complete feed under 24% protein for Cattle or Dairy Cows but excluding Calf Feeds.

7. Swine Feeds - Any complete swine feed under 35% protein.

8. Poultry Feeds:
   (a) Chick Starter Feeds - Any complete feed for starting chickens other than Broilers.
   (b) Broilers Feeds - Any complete feed for starting, growing or finishing Broilers.
   (c) Growing Feeds - Any complete feed for growing chickens.
   (d) Laying and Hatching Feeds - Any complete feed for laying hens.
   (e) Fattening and Finishing Feeds - Any complete feed for fattening cockerels, capons or other fowl other than broilers and turkeys and excluding Scratch Grains.
   (f) Turkey Feeds - Any complete feed for starting, growing or finishing turkeys.
   (g) Other Complete Feeds - Any complete feed for pheasants, ducks or other poultry and not covered by any other classification.

11. Dog and Cat Foods:
   (b) Biscuits - Kibble and all baked products.
   (c) Meal - Pellets, cubes and other forms.

12. Scratch Grains - Any mixture of Whole or Cracked Grains only for Pultry.

13. Other Animal Feeds - Such as Horse Feed, Rabbit Feed. etc.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 1 - Shipments of Prepared Stock and Poultry Feeds in Canada 1957 together with estimated comparable data for 1958. Current monthly shipments accompanied by cumulative totals for 1958 and 1959 reported in columns (3), (4), (5), and (6) respectively.

(f) Turkey Concentrates	0	1.000	.962	.395	.965	.887	.295	.342	.278	.361	0
(g) Other Poultry Concentrates	0	.246	.116	.596	.258	.429	.019	0	1.000	0	.333

In converting concentrates to finished feeds, the Bureau uses the above factors to establish the amounts of concentrates which moved into the secondary manufacturing industry, as such. These factors were established from the returns of all firms in the survey and reflect the weighted average above, which we use for a current 12 months reports. If you agree that changes should be made in any of these factors, you should advise us at once whether or not you think the factor is low or high.

From the above, you will notice that 86.8 per cent of the calf concentrates shipped in the province of Ontario in any month during 1954 moved into the hands of franchise operators and other manufacturers who make feeds from concentrates. The balance, or 13.2 per cent, moved out of the industry and was used by farmers and other similar consumers directly.

Factor No. 2, which will turn concentrates into finished feeds, is given on pages 4, 6 and 8 in brackets after the name of each commodity.

HOW TO USE THE CONVERSION FACTORS

You will note on page 4 that the industry reported they had shipped in the province of Quebec for January, 1959 1,688 tons of Dairy and Cattle concentrates, of which 398 tons were used or sold directly for use to the farmer and other such consumers. In other words, 1,171 tons moved into the hands of secondary manufacturers for further use in manufacturing complete feeds. In order to obtain the finished feeds resulting from the conversion of 1,290 tons of Dairy and Cattle concentrates, we make use of the conversion factor as follows:

1,290 x 6.0 = 7,740 tons of Dairy and Cattle Feeds.

Now turn to page 10 and you will see that the shipments of Dairy and Cattle Feeds in the province of Quebec in the same month amounted to 10,290 tons. The summary would appear as follows:

Total shipments = 10,290 tons

Shipments by secondary manufacturers (1) = 7,740 tons

Shipments by manufacturers (2) = 2,550 tons

In order to assess the proportion of total feed shipments, which your firm enjoys, the following instructions are important. In terms of concentrates, the concentrate manufacturer would divide the total Dairy and Cattle feeds shipped in the province of Quebec (10,290 tons) by 6.0 and add 398 tons of concentrates moving out of the industry thus:

$$\frac{10,290}{6.0} = 1,713 + 398 = 2,111 \text{ tons}$$

To the above he would relate his total shipments of Dairy and Cattle concentrates for the province of Quebec during the same period.

In terms of complete feeds, the complete feeds manufacturer (including franchise operators) would assess their share of the market by determining, in the following manner, the total supply of finished feeds:

Total commercial feeds shipped		10,290 tons (see page 10)
Estimated feeds produced from concentrates sold outside the industry from which would be	398 x 6.0 =	2,388 tons (see page 4)
Total supply of finished feeds used as finished feeds or in the form of concentrates		12,678 tons

(1) Includes franchise operators and those secondary manufacturers who use concentrates to manufacture complete feeds.

(2) Includes manufacturers who produce finished feeds directly from raw materials.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

In October, 1947 the Dominion Bureau of Statistics, in co-operation with the National Council of the Canadian Feed Manufacturers' Association, commenced a survey on a sample basis of Shipments of Prepared Stock and Poultry Feeds, showing export shipments as well as provincial destinations in Canada.

By 1950 the monthly survey on Shipments assumed real value since it formed a basis of comparing current months with corresponding months of the previous year. Because it was still difficult to estimate certain individual commodities reliably, the coverage of the survey was increased to 200 firms in 1951 and became representative of about 76% of the total volume of the industry. This series was presented on an index basis up to the end of 1953.

During 1953 the feeds industry desired volume figures which would reveal the actual disappearance into the hands of ultimate consumers. The result is the current survey which is produced from monthly returns of all primary manufacturers of concentrates together with returns of a sample survey of manufacturers who use raw ingredients in their finished feeds.

The information presented in this report has been arranged as follows:

Table 1 presents the total annual production of Primary and Secondary or complete feeds in Canada for 1957 together with an estimate of production for the calendar year 1958 and as well the production for the current month in 1958 and 1959 with cumulative totals for 1958 and 1959.

Table 2 shows the 1959 shipments of primary or concentrated feeds by principal commodities, provincial destination and export. Column (a) gives the total shipments of all concentrates while column (b) gives the shipments of concentrates moving out of the Industry in their original form. The difference between column (a) and column (b) shows the amount of primary feeds used by the secondary feed manufacturers in producing complete feeds. Factor No. 2, which will convert concentrates to feeds is included respectively in brackets after the title of each concentrate. (See pages 4, 6 and 8). How to use these factors is explained on page 21.

Table 3 shows the volume of monthly shipments of secondary or complete feeds by principal commodities, provincial destination and export. Using conversion factors provided by all firms in the primary survey, the resulting volume of feeds has been added to those totals reported by firms which manufacture finished feeds from raw materials. The volume of feeds, shown in this section, therefore, represents the estimated total feeds shipped by all types of manufacturers including franchise operators and independent manufacturers who purchase concentrates from primary manufacturers. Factor No. 1, which will show the proportion of concentrates moving out of the Industry is shown on page 20.

Table 4 presents the volume of shipments by manufacturers of other types of stock feeds by principal commodities, provincial destination and export. In this section specialized feeds such as dog and cat foods, mineral mixtures, etc., are the result of 100% survey of the producing industry. Other commodities are estimated on a sample basis.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

CLASSIFICATION OF FEEDS

A complete feed is a formulated feed to be fed as is, and may be in the form of mash, pellets, crumbles, cubes, etc. For your assistance in classifying these commodities, the following explanation is offered:

1. Calf concentrates - Any concentrate or making a complete Calf Feed.

2. Dairy and Cattle concentrates - Any concentrate 24% protein or higher for Cattle or Dairy Cows.

3. Swine concentrates - Any concentrate 35% protein or higher for swine.

4. Poultry Concentrates:
   (a) Chick Starter Concentrates - Any concentrate for making a complete Chick Starter.
   (b) Broiler Concentrates - Any concentrate for making a complete Broiler Feed.
   (c) Growing Concentrates - Any concentrate for making a complete feed for growing chickens.
   (d) Laying and Hatching Concentrates - Any concentrate for making a complete feed for laying hens.
   (e) Fattening and Finishing Concentrates - Any concentrate for making a complete fattening feed for fowl other than Broilers or Turkeys.
   (f) Turkey Concentrates - Any concentrate for making a complete turkey feed.
   (g) Other Concentrates - Any concentrate for Poultry not covered by any other classification.

5. Calf feeds - Any complete feed for calves up to 5 months of age.

6. Dairy and Cattle Feeds - Any complete feed under 24% protein for Cattle or Dairy Cows but excluding Calf Feeds.

7. Swine Feeds - Any complete swine feed under 35% protein.

8. Poultry Feeds:
   (a) Chick Starter Feeds - Any complete feed for starting chickens other than Broilers.
   (b) Broilers Feeds - Any complete feed for starting, growing or finishing Broilers.
   (c) Growing Feeds - Any complete feed for growing chickens.
   (d) Laying and Hatching Feeds - Any complete feed for laying hens.
   (e) Fattening and Finishing Feeds - Any complete feed for fattening cockerels, capons or other fowl other than broilers and turkeys and excluding Scratch Grains.
   (f) Turkey Feeds - Any complete feed for starting, growing or finishing turkeys.
   (g) Other Complete Feeds - Any complete feed for pheasants, ducks or other poultry and not covered by any other classification.

11. Dog and Cat Foods:
   (b) Biscuits - Kibble and all baked products.
   (c) Meal - Pellets, cubes and other forms.

12. Scratch Grains - Any mixture of Whole or Cracked Grains only for Pultry.

13. Other Animal Feeds - Such as Horse Feed, Rabbit Feed. etc.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 1 - Shipments of Prepared Stock and Poultry Feeds in Canada 1957 together with estimated comparable data for 1958. Current monthly shipments accompanied by cumulative totals for 1958 and 1959 reported in columns (3), (4), (5), and (6) respectively.

3. Swine Concentrates	.647	.598	.536	.546	.821	.480	.233	.250	.270	.280	.700
4. Poultry Concentrates											
(a) Chick Starter Concentrates	0	1.000	.750	.670	.919	.904	.725	.868	.969	1.000	1.000
(b) Broiler Concentrates	0	.607	.877	.019	.999	.968	.485	0	.861	1.000	.500
(c) Growing Concentrates	.500	.692	.674	.544	.797	.726	.217	.182	.260	.297	.712
(d) Laying and Hatching Concentrates	0	.741	.740	.581	.866	.562	.206	.089	.186	.098	.697
(e) Fattening & Finishing Concentrates	0	.882	.231	.412	.923	.673	.129	0	.338	.666	0
(f) Turkey Concentrates	0	1.000	.962	.395	.965	.887	.295	.342	.278	.361	0
(g) Other Poultry Concentrates	0	.246	.116	.596	.258	.429	.019	0	1.000	0	.333

In converting concentrates to finished feeds, the Bureau uses the above factors to establish the amounts of concentrates which moved into the secondary manufacturing industry, as such. These factors were established from the returns of all firms in the survey and reflect the weighted average above, which we use for a current 12 months reports. If you agree that changes should be made in any of these factors, you should advise us at once whether or not you think the factor is low or high.

From the above, you will notice that 86.8 per cent of the calf concentrates shipped in the province of Ontario in any month during 1954 moved into the hands of franchise operators and other manufacturers who make feeds from concentrates. The balance, or 13.2 per cent, moved out of the industry and was used by farmers and other similar consumers directly.

Factor No. 2, which will turn concentrates into finished feeds, is given on pages 4, 6 and 8 in brackets after the name of each commodity.

HOW TO USE THE CONVERSION FACTORS

You will note on page 4 that the industry reported they had shipped in the province of Quebec for January, 1959 1,688 tons of Dairy and Cattle concentrates, of which 398 tons were used or sold directly for use to the farmer and other such consumers. In other words, 1,171 tons moved into the hands of secondary manufacturers for further use in manufacturing complete feeds. In order to obtain the finished feeds resulting from the conversion of 1,290 tons of Dairy and Cattle concentrates, we make use of the conversion factor as follows:

1,290 x 6.0 = 7,740 tons of Dairy and Cattle Feeds.

Now turn to page 10 and you will see that the shipments of Dairy and Cattle Feeds in the province of Quebec in the same month amounted to 10,290 tons. The summary would appear as follows:

Total shipments = 10,290 tons

Shipments by secondary manufacturers (1) = 7,740 tons

Shipments by manufacturers (2) = 2,550 tons

In order to assess the proportion of total feed shipments, which your firm enjoys, the following instructions are important. In terms of concentrates, the concentrate manufacturer would divide the total Dairy and Cattle feeds shipped in the province of Quebec (10,290 tons) by 6.0 and add 398 tons of concentrates moving out of the industry thus:

$$\frac{10,290}{6.0} = 1,713 + 398 = 2,111 \text{ tons}$$

To the above he would relate his total shipments of Dairy and Cattle concentrates for the province of Quebec during the same period.

In terms of complete feeds, the complete feeds manufacturer (including franchise operators) would assess their share of the market by determining, in the following manner, the total supply of finished feeds:

Total commercial feeds shipped		10,290 tons (see page 10)
Estimated feeds produced from concentrates sold outside the industry from which would be	398 x 6.0 =	2,388 tons (see page 4)
Total supply of finished feeds used as finished feeds or in the form of concentrates		12,678 tons

(1) Includes franchise operators and those secondary manufacturers who use concentrates to manufacture complete feeds.

(2) Includes manufacturers who produce finished feeds directly from raw materials.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

In October, 1947 the Dominion Bureau of Statistics, in co-operation with the National Council of the Canadian Feed Manufacturers' Association, commenced a survey on a sample basis of Shipments of Prepared Stock and Poultry Feeds, showing export shipments as well as provincial destinations in Canada.

By 1950 the monthly survey on Shipments assumed real value since it formed a basis of comparing current months with corresponding months of the previous year. Because it was still difficult to estimate certain individual commodities reliably, the coverage of the survey was increased to 200 firms in 1951 and became representative of about 76% of the total volume of the industry. This series was presented on an index basis up to the end of 1953.

During 1953 the feeds industry desired volume figures which would reveal the actual disappearance into the hands of ultimate consumers. The result is the current survey which is produced from monthly returns of all primary manufacturers of concentrates together with returns of a sample survey of manufacturers who use raw ingredients in their finished feeds.

The information presented in this report has been arranged as follows:

Table 1 presents the total annual production of Primary and Secondary or complete feeds in Canada for 1957 together with an estimate of production for the calendar year 1958 and as well the production for the current month in 1958 and 1959 with cumulative totals for 1958 and 1959.

Table 2 shows the 1959 shipments of primary or concentrated feeds by principal commodities, provincial destination and export. Column (a) gives the total shipments of all concentrates while column (b) gives the shipments of concentrates moving out of the Industry in their original form. The difference between column (a) and column (b) shows the amount of primary feeds used by the secondary feed manufacturers in producing complete feeds. Factor No. 2, which will convert concentrates to feeds is included respectively in brackets after the title of each concentrate. (See pages 4, 6 and 8). How to use these factors is explained on page 21.

Table 3 shows the volume of monthly shipments of secondary or complete feeds by principal commodities, provincial destination and export. Using conversion factors provided by all firms in the primary survey, the resulting volume of feeds has been added to those totals reported by firms which manufacture finished feeds from raw materials. The volume of feeds, shown in this section, therefore, represents the estimated total feeds shipped by all types of manufacturers including franchise operators and independent manufacturers who purchase concentrates from primary manufacturers. Factor No. 1, which will show the proportion of concentrates moving out of the Industry is shown on page 20.

Table 4 presents the volume of shipments by manufacturers of other types of stock feeds by principal commodities, provincial destination and export. In this section specialized feeds such as dog and cat foods, mineral mixtures, etc., are the result of 100% survey of the producing industry. Other commodities are estimated on a sample basis.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

CLASSIFICATION OF FEEDS

A complete feed is a formulated feed to be fed as is, and may be in the form of mash, pellets, crumbles, cubes, etc. For your assistance in classifying these commodities, the following explanation is offered:

1. Calf concentrates - Any concentrate or making a complete Calf Feed.

2. Dairy and Cattle concentrates - Any concentrate 24% protein or higher for Cattle or Dairy Cows.

3. Swine concentrates - Any concentrate 35% protein or higher for swine.

4. Poultry Concentrates:
   (a) Chick Starter Concentrates - Any concentrate for making a complete Chick Starter.
   (b) Broiler Concentrates - Any concentrate for making a complete Broiler Feed.
   (c) Growing Concentrates - Any concentrate for making a complete feed for growing chickens.
   (d) Laying and Hatching Concentrates - Any concentrate for making a complete feed for laying hens.
   (e) Fattening and Finishing Concentrates - Any concentrate for making a complete fattening feed for fowl other than Broilers or Turkeys.
   (f) Turkey Concentrates - Any concentrate for making a complete turkey feed.
   (g) Other Concentrates - Any concentrate for Poultry not covered by any other classification.

5. Calf feeds - Any complete feed for calves up to 5 months of age.

6. Dairy and Cattle Feeds - Any complete feed under 24% protein for Cattle or Dairy Cows but excluding Calf Feeds.

7. Swine Feeds - Any complete swine feed under 35% protein.

8. Poultry Feeds:
   (a) Chick Starter Feeds - Any complete feed for starting chickens other than Broilers.
   (b) Broilers Feeds - Any complete feed for starting, growing or finishing Broilers.
   (c) Growing Feeds - Any complete feed for growing chickens.
   (d) Laying and Hatching Feeds - Any complete feed for laying hens.
   (e) Fattening and Finishing Feeds - Any complete feed for fattening cockerels, capons or other fowl other than broilers and turkeys and excluding Scratch Grains.
   (f) Turkey Feeds - Any complete feed for starting, growing or finishing turkeys.
   (g) Other Complete Feeds - Any complete feed for pheasants, ducks or other poultry and not covered by any other classification.

11. Dog and Cat Foods:
   (b) Biscuits - Kibble and all baked products.
   (c) Meal - Pellets, cubes and other forms.

12. Scratch Grains - Any mixture of Whole or Cracked Grains only for Pultry.

13. Other Animal Feeds - Such as Horse Feed, Rabbit Feed. etc.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 1 - Shipments of Prepared Stock and Poultry Feeds in Canada 1957 together with estimated comparable data for 1958. Current monthly shipments accompanied by cumulative totals for 1958 and 1959 reported in columns (3), (4), (5), and (6) respectively.

FACTORS USED IN DETERMINING QUANTITIES OF CONCENTRATES MOVING INTO SECONDARY INDUSTRY

	Shipped to or sold in										
	Newfound-land	Prince Edward Island	Nova Scotia	New Brunswick	Quebec	Ontario	Manitoba	Saskat-chewan	Alberta	British Columbia	Export
Primary or Concentrated Feeds											
1. Calf Concentrates	0	.914	.769	.538	.849	.868	.809	.750	.707	.666	0
2. Dairy and Cattle Concentrates	1.000	.592	.648	.460	.764	.415	.268	.215	.296	.041	.190
3. Swine Concentrates	.647	.598	.536	.546	.821	.480	.233	.250	.270	.280	.700
4. Poultry Concentrates											
(a) Chick Starter Concentrates	0	1.000	.750	.670	.919	.904	.725	.868	.969	1.000	1.000
(b) Broiler Concentrates	0	.607	.877	.019	.999	.968	.485	0	.861	1.000	.500
(c) Growing Concentrates	.500	.692	.674	.544	.797	.726	.217	.182	.260	.297	.712
(d) Laying and Hatching Concentrates	0	.741	.740	.581	.866	.562	.206	.089	.186	.098	.697
(e) Fattening & Finishing Concentrates	0	.882	.231	.412	.923	.673	.129	0	.338	.666	0
(f) Turkey Concentrates	0	1.000	.962	.395	.965	.887	.295	.342	.278	.361	0
(g) Other Poultry Concentrates	0	.246	.116	.596	.258	.429	.019	0	1.000	0	.333

In converting concentrates to finished feeds, the Bureau uses the above factors to establish the amounts of concentrates which moved into the secondary manufacturing industry, as such. These factors were established from the returns of all firms in the survey and reflect the weighted average above, which we use for a current 12 months reports. If you agree that changes should be made in any of these factors, you should advise us at once whether or not you think the factor is low or high.

From the above, you will notice that 86.8 per cent of the calf concentrates shipped in the province of Ontario in any month during 1954 moved into the hands of franchise operators and other manufacturers who make feeds from concentrates. The balance, or 13.2 per cent, moved out of the industry and was used by farmers and other similar consumers directly.

Factor No. 2, which will turn concentrates into finished feeds, is given on pages 4, 6 and 8 in brackets after the name of each commodity.

HOW TO USE THE CONVERSION FACTORS

You will note on page 4 that the industry reported they had shipped in the province of Quebec for January, 1959 1,688 tons of Dairy and Cattle concentrates, of which 398 tons were used or sold directly for use to the farmer and other such consumers. In other words, 1,171 tons moved into the hands of secondary manufacturers for further use in manufacturing complete feeds. In order to obtain the finished feeds resulting from the conversion of 1,290 tons of Dairy and Cattle concentrates, we make use of the conversion factor as follows:

1,290 x 6.0 = 7,740 tons of Dairy and Cattle Feeds.

Now turn to page 10 and you will see that the shipments of Dairy and Cattle Feeds in the province of Quebec in the same month amounted to 10,290 tons. The summary would appear as follows:

Total shipments = 10,290 tons

Shipments by secondary manufacturers (1) = 7,740 tons

Shipments by manufacturers (2) = 2,550 tons

In order to assess the proportion of total feed shipments, which your firm enjoys, the following instructions are important. In terms of concentrates, the concentrate manufacturer would divide the total Dairy and Cattle feeds shipped in the province of Quebec (10,290 tons) by 6.0 and add 398 tons of concentrates moving out of the industry thus:

$$\frac{10,290}{6.0} = 1,713 + 398 = 2,111 \text{ tons}$$

To the above he would relate his total shipments of Dairy and Cattle concentrates for the province of Quebec during the same period.

In terms of complete feeds, the complete feeds manufacturer (including franchise operators) would assess their share of the market by determining, in the following manner, the total supply of finished feeds:

Total commercial feeds shipped		10,290 tons (see page 10)
Estimated feeds produced from concentrates sold outside the industry from which would be	398 x 6.0 =	2,388 tons (see page 4)
Total supply of finished feeds used as finished feeds or in the form of concentrates		12,678 tons

(1) Includes franchise operators and those secondary manufacturers who use concentrates to manufacture complete feeds.

(2) Includes manufacturers who produce finished feeds directly from raw materials.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

In October, 1947 the Dominion Bureau of Statistics, in co-operation with the National Council of the Canadian Feed Manufacturers' Association, commenced a survey on a sample basis of Shipments of Prepared Stock and Poultry Feeds, showing export shipments as well as provincial destinations in Canada.

By 1950 the monthly survey on Shipments assumed real value since it formed a basis of comparing current months with corresponding months of the previous year. Because it was still difficult to estimate certain individual commodities reliably, the coverage of the survey was increased to 200 firms in 1951 and became representative of about 76% of the total volume of the industry. This series was presented on an index basis up to the end of 1953.

During 1953 the feeds industry desired volume figures which would reveal the actual disappearance into the hands of ultimate consumers. The result is the current survey which is produced from monthly returns of all primary manufacturers of concentrates together with returns of a sample survey of manufacturers who use raw ingredients in their finished feeds.

The information presented in this report has been arranged as follows:

Table 1 presents the total annual production of Primary and Secondary or complete feeds in Canada for 1957 together with an estimate of production for the calendar year 1958 and as well the production for the current month in 1958 and 1959 with cumulative totals for 1958 and 1959.

Table 2 shows the 1959 shipments of primary or concentrated feeds by principal commodities, provincial destination and export. Column (a) gives the total shipments of all concentrates while column (b) gives the shipments of concentrates moving out of the Industry in their original form. The difference between column (a) and column (b) shows the amount of primary feeds used by the secondary feed manufacturers in producing complete feeds. Factor No. 2, which will convert concentrates to feeds is included respectively in brackets after the title of each concentrate. (See pages 4, 6 and 8). How to use these factors is explained on page 21.

Table 3 shows the volume of monthly shipments of secondary or complete feeds by principal commodities, provincial destination and export. Using conversion factors provided by all firms in the primary survey, the resulting volume of feeds has been added to those totals reported by firms which manufacture finished feeds from raw materials. The volume of feeds, shown in this section, therefore, represents the estimated total feeds shipped by all types of manufacturers including franchise operators and independent manufacturers who purchase concentrates from primary manufacturers. Factor No. 1, which will show the proportion of concentrates moving out of the Industry is shown on page 20.

Table 4 presents the volume of shipments by manufacturers of other types of stock feeds by principal commodities, provincial destination and export. In this section specialized feeds such as dog and cat foods, mineral mixtures, etc., are the result of 100% survey of the producing industry. Other commodities are estimated on a sample basis.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

CLASSIFICATION OF FEEDS

A complete feed is a formulated feed to be fed as is, and may be in the form of mash, pellets, crumbles, cubes, etc. For your assistance in classifying these commodities, the following explanation is offered:

1. Calf concentrates - Any concentrate or making a complete Calf Feed.

2. Dairy and Cattle concentrates - Any concentrate 24% protein or higher for Cattle or Dairy Cows.

3. Swine concentrates - Any concentrate 35% protein or higher for swine.

4. Poultry Concentrates:
   (a) Chick Starter Concentrates - Any concentrate for making a complete Chick Starter.
   (b) Broiler Concentrates - Any concentrate for making a complete Broiler Feed.
   (c) Growing Concentrates - Any concentrate for making a complete feed for growing chickens.
   (d) Laying and Hatching Concentrates - Any concentrate for making a complete feed for laying hens.
   (e) Fattening and Finishing Concentrates - Any concentrate for making a complete fattening feed for fowl other than Broilers or Turkeys.
   (f) Turkey Concentrates - Any concentrate for making a complete turkey feed.
   (g) Other Concentrates - Any concentrate for Poultry not covered by any other classification.

5. Calf feeds - Any complete feed for calves up to 5 months of age.

6. Dairy and Cattle Feeds - Any complete feed under 24% protein for Cattle or Dairy Cows but excluding Calf Feeds.

7. Swine Feeds - Any complete swine feed under 35% protein.

8. Poultry Feeds:
   (a) Chick Starter Feeds - Any complete feed for starting chickens other than Broilers.
   (b) Broilers Feeds - Any complete feed for starting, growing or finishing Broilers.
   (c) Growing Feeds - Any complete feed for growing chickens.
   (d) Laying and Hatching Feeds - Any complete feed for laying hens.
   (e) Fattening and Finishing Feeds - Any complete feed for fattening cockerels, capons or other fowl other than broilers and turkeys and excluding Scratch Grains.
   (f) Turkey Feeds - Any complete feed for starting, growing or finishing turkeys.
   (g) Other Complete Feeds - Any complete feed for pheasants, ducks or other poultry and not covered by any other classification.

11. Dog and Cat Foods:
   (b) Biscuits - Kibble and all baked products.
   (c) Meal - Pellets, cubes and other forms.

12. Scratch Grains - Any mixture of Whole or Cracked Grains only for Pultry.

13. Other Animal Feeds - Such as Horse Feed, Rabbit Feed. etc.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 1 - Shipments of Prepared Stock and Poultry Feeds in Canada 1957 together with estimated comparable data for 1958. Current monthly shipments accompanied by cumulative totals for 1958 and 1959 reported in columns (3), (4), (5), and (6) respectively.

In converting concentrates to finished feeds, the Bureau uses the above factors to establish the amounts of concentrates which moved into the secondary manufacturing industry, as such. These factors were established from the returns of all firms in the survey and reflect the weighted average above, which we use for a current 12 months reports. If you agree that changes should be made in any of these factors, you should advise us at once whether or not you think the factor is low or high.

From the above, you will notice that 86.8 per cent of the calf concentrates shipped in the province of Ontario in any month during 1954 moved into the hands of franchise operators and other manufacturers who make feeds from concentrates. The balance, or 13.2 per cent, moved out of the industry and was used by farmers and other similar consumers directly.

Factor No. 2, which will turn concentrates into finished feeds, is given on pages 4, 6 and 8 in brackets after the name of each commodity.

HOW TO USE THE CONVERSION FACTORS

You will note on page 4 that the industry reported they had shipped in the province of Quebec for January, 1959 1,688 tons of Dairy and Cattle concentrates, of which 398 tons were used or sold directly for use to the farmer and other such consumers. In other words, 1,171 tons moved into the hands of secondary manufacturers for further use in manufacturing complete feeds. In order to obtain the finished feeds resulting from the conversion of 1,290 tons of Dairy and Cattle concentrates, we make use of the conversion factor as follows:

1,290 x 6.0 = 7,740 tons of Dairy and Cattle Feeds.

Now turn to page 10 and you will see that the shipments of Dairy and Cattle Feeds in the province of Quebec in the same month amounted to 10,290 tons. The summary would appear as follows:

Total shipments = 10,290 tons

Shipments by secondary manufacturers (1) = 7,740 tons

Shipments by manufacturers (2) = 2,550 tons

In order to assess the proportion of total feed shipments, which your firm enjoys, the following instructions are important. In terms of concentrates, the concentrate manufacturer would divide the total Dairy and Cattle feeds shipped in the province of Quebec (10,290 tons) by 6.0 and add 398 tons of concentrates moving out of the industry thus:

$$\frac{10,290}{6.0} = 1,713 + 398 = 2,111 \text{ tons}$$

To the above he would relate his total shipments of Dairy and Cattle concentrates for the province of Quebec during the same period.

In terms of complete feeds, the complete feeds manufacturer (including franchise operators) would assess their share of the market by determining, in the following manner, the total supply of finished feeds:

Total commercial feeds shipped		10,290 tons (see page 10)
Estimated feeds produced from concentrates sold outside the industry from which would be	398 x 6.0 =	2,388 tons (see page 4)
Total supply of finished feeds used as finished feeds or in the form of concentrates		12,678 tons

(1) Includes franchise operators and those secondary manufacturers who use concentrates to manufacture complete feeds.

(2) Includes manufacturers who produce finished feeds directly from raw materials.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

In October, 1947 the Dominion Bureau of Statistics, in co-operation with the National Council of the Canadian Feed Manufacturers' Association, commenced a survey on a sample basis of Shipments of Prepared Stock and Poultry Feeds, showing export shipments as well as provincial destinations in Canada.

By 1950 the monthly survey on Shipments assumed real value since it formed a basis of comparing current months with corresponding months of the previous year. Because it was still difficult to estimate certain individual commodities reliably, the coverage of the survey was increased to 200 firms in 1951 and became representative of about 76% of the total volume of the industry. This series was presented on an index basis up to the end of 1953.

During 1953 the feeds industry desired volume figures which would reveal the actual disappearance into the hands of ultimate consumers. The result is the current survey which is produced from monthly returns of all primary manufacturers of concentrates together with returns of a sample survey of manufacturers who use raw ingredients in their finished feeds.

The information presented in this report has been arranged as follows:

Table 1 presents the total annual production of Primary and Secondary or complete feeds in Canada for 1957 together with an estimate of production for the calendar year 1958 and as well the production for the current month in 1958 and 1959 with cumulative totals for 1958 and 1959.

Table 2 shows the 1959 shipments of primary or concentrated feeds by principal commodities, provincial destination and export. Column (a) gives the total shipments of all concentrates while column (b) gives the shipments of concentrates moving out of the Industry in their original form. The difference between column (a) and column (b) shows the amount of primary feeds used by the secondary feed manufacturers in producing complete feeds. Factor No. 2, which will convert concentrates to feeds is included respectively in brackets after the title of each concentrate. (See pages 4, 6 and 8). How to use these factors is explained on page 21.

Table 3 shows the volume of monthly shipments of secondary or complete feeds by principal commodities, provincial destination and export. Using conversion factors provided by all firms in the primary survey, the resulting volume of feeds has been added to those totals reported by firms which manufacture finished feeds from raw materials. The volume of feeds, shown in this section, therefore, represents the estimated total feeds shipped by all types of manufacturers including franchise operators and independent manufacturers who purchase concentrates from primary manufacturers. Factor No. 1, which will show the proportion of concentrates moving out of the Industry is shown on page 20.

Table 4 presents the volume of shipments by manufacturers of other types of stock feeds by principal commodities, provincial destination and export. In this section specialized feeds such as dog and cat foods, mineral mixtures, etc., are the result of 100% survey of the producing industry. Other commodities are estimated on a sample basis.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

CLASSIFICATION OF FEEDS

A complete feed is a formulated feed to be fed as is, and may be in the form of mash, pellets, crumbles, cubes, etc. For your assistance in classifying these commodities, the following explanation is offered:

1. Calf concentrates - Any concentrate or making a complete Calf Feed.

2. Dairy and Cattle concentrates - Any concentrate 24% protein or higher for Cattle or Dairy Cows.

3. Swine concentrates - Any concentrate 35% protein or higher for swine.

4. Poultry Concentrates:
   (a) Chick Starter Concentrates - Any concentrate for making a complete Chick Starter.
   (b) Broiler Concentrates - Any concentrate for making a complete Broiler Feed.
   (c) Growing Concentrates - Any concentrate for making a complete feed for growing chickens.
   (d) Laying and Hatching Concentrates - Any concentrate for making a complete feed for laying hens.
   (e) Fattening and Finishing Concentrates - Any concentrate for making a complete fattening feed for fowl other than Broilers or Turkeys.
   (f) Turkey Concentrates - Any concentrate for making a complete turkey feed.
   (g) Other Concentrates - Any concentrate for Poultry not covered by any other classification.

5. Calf feeds - Any complete feed for calves up to 5 months of age.

6. Dairy and Cattle Feeds - Any complete feed under 24% protein for Cattle or Dairy Cows but excluding Calf Feeds.

7. Swine Feeds - Any complete swine feed under 35% protein.

8. Poultry Feeds:
   (a) Chick Starter Feeds - Any complete feed for starting chickens other than Broilers.
   (b) Broilers Feeds - Any complete feed for starting, growing or finishing Broilers.
   (c) Growing Feeds - Any complete feed for growing chickens.
   (d) Laying and Hatching Feeds - Any complete feed for laying hens.
   (e) Fattening and Finishing Feeds - Any complete feed for fattening cockerels, capons or other fowl other than broilers and turkeys and excluding Scratch Grains.
   (f) Turkey Feeds - Any complete feed for starting, growing or finishing turkeys.
   (g) Other Complete Feeds - Any complete feed for pheasants, ducks or other poultry and not covered by any other classification.

11. Dog and Cat Foods:
   (b) Biscuits - Kibble and all baked products.
   (c) Meal - Pellets, cubes and other forms.

12. Scratch Grains - Any mixture of Whole or Cracked Grains only for Pultry.

13. Other Animal Feeds - Such as Horse Feed, Rabbit Feed. etc.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 1 - Shipments of Prepared Stock and Poultry Feeds in Canada 1957 together with estimated comparable data for 1958. Current monthly shipments accompanied by cumulative totals for 1958 and 1959 reported in columns (3), (4), (5), and (6) respectively.

FACTORS USED IN DETERMINING QUANTITIES OF CONCENTRATES MOVING INTO SECONDARY INDUSTRY

	Shipped to or sold in										
	Newfound-land	Prince Edward Island	Nova Scotia	New Brunswick	Quebec	Ontario	Manitoba	Saskat-chewan	Alberta	British Columbia	Export
Primary or Concentrated Feeds											
1. Calf Concentrates	0	.914	.769	.538	.849	.868	.809	.750	.707	.666	0
2. Dairy and Cattle Concentrates	1.000	.592	.648	.460	.764	.415	.268	.215	.296	.041	.190
3. Swine Concentrates	.647	.598	.536	.546	.821	.480	.233	.250	.270	.280	.700
4. Poultry Concentrates											
(a) Chick Starter Concentrates	0	1.000	.750	.670	.919	.904	.725	.868	.969	1.000	1.000
(b) Broiler Concentrates	0	.607	.877	.019	.999	.968	.485	0	.861	1.000	.500
(c) Growing Concentrates	.500	.692	.674	.544	.797	.726	.217	.182	.260	.297	.712
(d) Laying and Hatching Concentrates	0	.741	.740	.581	.866	.562	.206	.089	.186	.098	.697
(e) Fattening & Finishing Concentrates	0	.882	.231	.412	.923	.673	.129	0	.338	.666	0
(f) Turkey Concentrates	0	1.000	.962	.395	.965	.887	.295	.342	.278	.361	0
(g) Other Poultry Concentrates	0	.246	.116	.596	.258	.429	.019	0	1.000	0	.333

In converting concentrates to finished feeds, the Bureau uses the above factors to establish the amounts of concentrates which moved into the secondary manufacturing industry, as such. These factors were established from the returns of all firms in the survey and reflect the weighted average above, which we use for a current 12 months reports. If you agree that changes should be made in any of these factors, you should advise us at once whether or not you think the factor is low or high.

From the above, you will notice that 86.8 per cent of the calf concentrates shipped in the province of Ontario in any month during 1954 moved into the hands of franchise operators and other manufacturers who make feeds from concentrates. The balance, or 13.2 per cent, moved out of the industry and was used by farmers and other similar consumers directly.

Factor No. 2, which will turn concentrates into finished feeds, is given on pages 4, 6 and 8 in brackets after the name of each commodity.

HOW TO USE THE CONVERSION FACTORS

You will note on page 4 that the industry reported they had shipped in the province of Quebec for January, 1959 1,688 tons of Dairy and Cattle concentrates, of which 398 tons were used or sold directly for use to the farmer and other such consumers. In other words, 1,171 tons moved into the hands of secondary manufacturers for further use in manufacturing complete feeds. In order to obtain the finished feeds resulting from the conversion of 1,290 tons of Dairy and Cattle concentrates, we make use of the conversion factor as follows:

1,290 x 6.0 = 7,740 tons of Dairy and Cattle Feeds.

Now turn to page 10 and you will see that the shipments of Dairy and Cattle Feeds in the province of Quebec in the same month amounted to 10,290 tons. The summary would appear as follows:

Total shipments = 10,290 tons

Shipments by secondary manufacturers (1) = 7,740 tons

Shipments by manufacturers (2) = 2,550 tons

In order to assess the proportion of total feed shipments, which your firm enjoys, the following instructions are important. In terms of concentrates, the concentrate manufacturer would divide the total Dairy and Cattle feeds shipped in the province of Quebec (10,290 tons) by 6.0 and add 398 tons of concentrates moving out of the industry thus:

$$\frac{10,290}{6.0} = 1,713 + 398 = 2,111 \text{ tons}$$

To the above he would relate his total shipments of Dairy and Cattle concentrates for the province of Quebec during the same period.

In terms of complete feeds, the complete feeds manufacturer (including franchise operators) would assess their share of the market by determining, in the following manner, the total supply of finished feeds:

Total commercial feeds shipped		10,290 tons (see page 10)
Estimated feeds produced from concentrates sold outside the industry from which would be	398 x 6.0 =	2,388 tons (see page 4)
Total supply of finished feeds used as finished feeds or in the form of concentrates		12,678 tons

(1) Includes franchise operators and those secondary manufacturers who use concentrates to manufacture complete feeds.

(2) Includes manufacturers who produce finished feeds directly from raw materials.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

In October, 1947 the Dominion Bureau of Statistics, in co-operation with the National Council of the Canadian Feed Manufacturers' Association, commenced a survey on a sample basis of Shipments of Prepared Stock and Poultry Feeds, showing export shipments as well as provincial destinations in Canada.

By 1950 the monthly survey on Shipments assumed real value since it formed a basis of comparing current months with corresponding months of the previous year. Because it was still difficult to estimate certain individual commodities reliably, the coverage of the survey was increased to 200 firms in 1951 and became representative of about 76% of the total volume of the industry. This series was presented on an index basis up to the end of 1953.

During 1953 the feeds industry desired volume figures which would reveal the actual disappearance into the hands of ultimate consumers. The result is the current survey which is produced from monthly returns of all primary manufacturers of concentrates together with returns of a sample survey of manufacturers who use raw ingredients in their finished feeds.

The information presented in this report has been arranged as follows:

Table 1 presents the total annual production of Primary and Secondary or complete feeds in Canada for 1957 together with an estimate of production for the calendar year 1958 and as well the production for the current month in 1958 and 1959 with cumulative totals for 1958 and 1959.

Table 2 shows the 1959 shipments of primary or concentrated feeds by principal commodities, provincial destination and export. Column (a) gives the total shipments of all concentrates while column (b) gives the shipments of concentrates moving out of the Industry in their original form. The difference between column (a) and column (b) shows the amount of primary feeds used by the secondary feed manufacturers in producing complete feeds. Factor No. 2, which will convert concentrates to feeds is included respectively in brackets after the title of each concentrate. (See pages 4, 6 and 8). How to use these factors is explained on page 21.

Table 3 shows the volume of monthly shipments of secondary or complete feeds by principal commodities, provincial destination and export. Using conversion factors provided by all firms in the primary survey, the resulting volume of feeds has been added to those totals reported by firms which manufacture finished feeds from raw materials. The volume of feeds, shown in this section, therefore, represents the estimated total feeds shipped by all types of manufacturers including franchise operators and independent manufacturers who purchase concentrates from primary manufacturers. Factor No. 1, which will show the proportion of concentrates moving out of the Industry is shown on page 20.

Table 4 presents the volume of shipments by manufacturers of other types of stock feeds by principal commodities, provincial destination and export. In this section specialized feeds such as dog and cat foods, mineral mixtures, etc., are the result of 100% survey of the producing industry. Other commodities are estimated on a sample basis.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

CLASSIFICATION OF FEEDS

A complete feed is a formulated feed to be fed as is, and may be in the form of mash, pellets, crumbles, cubes, etc. For your assistance in classifying these commodities, the following explanation is offered:

1. Calf concentrates - Any concentrate or making a complete Calf Feed.

2. Dairy and Cattle concentrates - Any concentrate 24% protein or higher for Cattle or Dairy Cows.

3. Swine concentrates - Any concentrate 35% protein or higher for swine.

4. Poultry Concentrates:
   (a) Chick Starter Concentrates - Any concentrate for making a complete Chick Starter.
   (b) Broiler Concentrates - Any concentrate for making a complete Broiler Feed.
   (c) Growing Concentrates - Any concentrate for making a complete feed for growing chickens.
   (d) Laying and Hatching Concentrates - Any concentrate for making a complete feed for laying hens.
   (e) Fattening and Finishing Concentrates - Any concentrate for making a complete fattening feed for fowl other than Broilers or Turkeys.
   (f) Turkey Concentrates - Any concentrate for making a complete turkey feed.
   (g) Other Concentrates - Any concentrate for Poultry not covered by any other classification.

5. Calf feeds - Any complete feed for calves up to 5 months of age.

6. Dairy and Cattle Feeds - Any complete feed under 24% protein for Cattle or Dairy Cows but excluding Calf Feeds.

7. Swine Feeds - Any complete swine feed under 35% protein.

8. Poultry Feeds:
   (a) Chick Starter Feeds - Any complete feed for starting chickens other than Broilers.
   (b) Broilers Feeds - Any complete feed for starting, growing or finishing Broilers.
   (c) Growing Feeds - Any complete feed for growing chickens.
   (d) Laying and Hatching Feeds - Any complete feed for laying hens.
   (e) Fattening and Finishing Feeds - Any complete feed for fattening cockerels, capons or other fowl other than broilers and turkeys and excluding Scratch Grains.
   (f) Turkey Feeds - Any complete feed for starting, growing or finishing turkeys.
   (g) Other Complete Feeds - Any complete feed for pheasants, ducks or other poultry and not covered by any other classification.

11. Dog and Cat Foods:
   (b) Biscuits - Kibble and all baked products.
   (c) Meal - Pellets, cubes and other forms.

12. Scratch Grains - Any mixture of Whole or Cracked Grains only for Poultry

13. Other Animal Feeds - Such as Horse Feed, Rabbit Feed. etc.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 1 - Shipments of Prepared Stock and Poultry Feeds in Canada 1957 together with estimated comparable data for 1958. Current monthly shipments accompanied by cumulative totals for 1958 and 1959 reported in columns (3), (4), (5), and (6) respectively.

Primary or Concentrated Feeds											
1. Calf Concentrates	0	.914	.769	.538	.849	.868	.809	.750	.707	.666	0
2. Dairy and Cattle Concentrates	1.000	.592	.648	.460	.764	.415	.268	.215	.296	.041	.190
3. Swine Concentrates	.647	.598	.536	.546	.821	.480	.233	.250	.270	.280	.700
4. Poultry Concentrates											
(a) Chick Starter Concentrates	0	1.000	.750	.670	.919	.904	.725	.868	.969	1.000	1.000
(b) Broiler Concentrates	0	.607	.877	.019	.999	.968	.485	0	.861	1.000	.500
(c) Growing Concentrates	.500	.692	.674	.544	.797	.726	.217	.182	.260	.297	.712
(d) Laying and Hatching Concentrates	0	.741	.740	.581	.866	.562	.206	.089	.186	.098	.697
(e) Fattening & Finishing Concentrates	0	.882	.231	.412	.923	.673	.129	0	.338	.666	0
(f) Turkey Concentrates	0	1.000	.962	.395	.965	.887	.295	.342	.278	.361	0
(g) Other Poultry Concentrates	0	.246	.116	.596	.258	.429	.019	0	1.000	0	.333

In converting concentrates to finished feeds, the Bureau uses the above factors to establish the amounts of concentrates which moved into the secondary manufacturing industry, as such. These factors were established from the returns of all firms in the survey and reflect the weighted average above, which we use for a current 12 months reports. If you agree that changes should be made in any of these factors, you should advise us at once whether or not you think the factor is low or high.

From the above, you will notice that 86.8 per cent of the calf concentrates shipped in the province of Ontario in any month during 1954 moved into the hands of franchise operators and other manufacturers who make feeds from concentrates. The balance, or 13.2 per cent, moved out of the industry and was used by farmers and other similar consumers directly.

Factor No. 2, which will turn concentrates into finished feeds, is given on pages 4, 6 and 8 in brackets after the name of each commodity.

HOW TO USE THE CONVERSION FACTORS

You will note on page 4 that the industry reported they had shipped in the province of Quebec for January, 1959 1,688 tons of Dairy and Cattle concentrates, of which 398 tons were used or sold directly for use to the farmer and other such consumers. In other words, 1,171 tons moved into the hands of secondary manufacturers for further use in manufacturing complete feeds. In order to obtain the finished feeds resulting from the conversion of 1,290 tons of Dairy and Cattle concentrates, we make use of the conversion factor as follows:

1,290 x 6.0 = 7,740 tons of Dairy and Cattle Feeds.

Now turn to page 10 and you will see that the shipments of Dairy and Cattle Feeds in the province of Quebec in the same month amounted to 10,290 tons. The summary would appear as follows:

Total shipments = 10,290 tons

Shipments by secondary manufacturers (1) = 7,740 tons

Shipments by manufacturers (2) = 2,550 tons

In order to assess the proportion of total feed shipments, which your firm enjoys, the following instructions are important. In terms of concentrates, the concentrate manufacturer would divide the total Dairy and Cattle feeds shipped in the province of Quebec (10,290 tons) by 6.0 and add 398 tons of concentrates moving out of the industry thus:

$$\frac{10,290}{6.0} = 1,713 + 398 = 2,111 \text{ tons}$$

To the above he would relate his total shipments of Dairy and Cattle concentrates for the province of Quebec during the same period.

In terms of complete feeds, the complete feeds manufacturer (including franchise operators) would assess their share of the market by determining, in the following manner, the total supply of finished feeds:

Total commercial feeds shipped		10,290 tons (see page 10)
Estimated feeds produced from concentrates sold outside the industry from which would be	398 x 6.0 =	2,388 tons (see page 4)
Total supply of finished feeds used as finished feeds or in the form of concentrates		12,678 tons

(1) Includes franchise operators and those secondary manufacturers who use concentrates to manufacture complete feeds.

(2) Includes manufacturers who produce finished feeds directly from raw materials.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

In October, 1947 the Dominion Bureau of Statistics, in co-operation with the National Council of the Canadian Feed Manufacturers' Association, commenced a survey on a sample basis of Shipments of Prepared Stock and Poultry Feeds, showing export shipments as well as provincial destinations in Canada.

By 1950 the monthly survey on Shipments assumed real value since it formed a basis of comparing current months with corresponding months of the previous year. Because it was still difficult to estimate certain individual commodities reliably, the coverage of the survey was increased to 200 firms in 1951 and became representative of about 76% of the total volume of the industry. This series was presented on an index basis up to the end of 1953.

During 1953 the feeds industry desired volume figures which would reveal the actual disappearance into the hands of ultimate consumers. The result is the current survey which is produced from monthly returns of all primary manufacturers of concentrates together with returns of a sample survey of manufacturers who use raw ingredients in their finished feeds.

The information presented in this report has been arranged as follows:

Table 1 presents the total annual production of Primary and Secondary or complete feeds in Canada for 1957 together with an estimate of production for the calendar year 1958 and as well the production for the current month in 1958 and 1959 with cumulative totals for 1958 and 1959.

Table 2 shows the 1959 shipments of primary or concentrated feeds by principal commodities, provincial destination and export. Column (a) gives the total shipments of all concentrates while column (b) gives the shipments of concentrates moving out of the Industry in their original form. The difference between column (a) and column (b) shows the amount of primary feeds used by the secondary feed manufacturers in producing complete feeds. Factor No. 2, which will convert concentrates to feeds is included respectively in brackets after the title of each concentrate. (See pages 4, 6 and 8). How to use these factors is explained on page 21.

Table 3 shows the volume of monthly shipments of secondary or complete feeds by principal commodities, provincial destination and export. Using conversion factors provided by all firms in the primary survey, the resulting volume of feeds has been added to those totals reported by firms which manufacture finished feeds from raw materials. The volume of feeds, shown in this section, therefore, represents the estimated total feeds shipped by all types of manufacturers including franchise operators and independent manufacturers who purchase concentrates from primary manufacturers. Factor No. 1, which will show the proportion of concentrates moving out of the Industry is shown on page 20.

Table 4 presents the volume of shipments by manufacturers of other types of stock feeds by principal commodities, provincial destination and export. In this section specialized feeds such as dog and cat foods, mineral mixtures, etc., are the result of 100% survey of the producing industry. Other commodities are estimated on a sample basis.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

CLASSIFICATION OF FEEDS

A complete feed is a formulated feed to be fed as is, and may be in the form of mash, pellets, crumbles, cubes, etc. For your assistance in classifying these commodities, the following explanation is offered:

1. Calf concentrates - Any concentrate or making a complete Calf Feed.

2. Dairy and Cattle concentrates - Any concentrate 24% protein or higher for Cattle or Dairy Cows.

3. Swine concentrates - Any concentrate 35% protein or higher for swine.

4. Poultry Concentrates:
   (a) Chick Starter Concentrates - Any concentrate for making a complete Chick Starter.
   (b) Broiler Concentrates - Any concentrate for making a complete Broiler Feed.
   (c) Growing Concentrates - Any concentrate for making a complete feed for growing chickens.
   (d) Laying and Hatching Concentrates - Any concentrate for making a complete feed for laying hens.
   (e) Fattening and Finishing Concentrates - Any concentrate for making a complete fattening feed for fowl other than Broilers or Turkeys.
   (f) Turkey Concentrates - Any concentrate for making a complete turkey feed.
   (g) Other Concentrates - Any concentrate for Poultry not covered by any other classification.

5. Calf feeds - Any complete feed for calves up to 5 months of age.

6. Dairy and Cattle Feeds - Any complete feed under 24% protein for Cattle or Dairy Cows but excluding Calf Feeds.

7. Swine Feeds - Any complete swine feed under 35% protein.

8. Poultry Feeds:
   (a) Chick Starter Feeds - Any complete feed for starting chickens other than Broilers.
   (b) Broilers Feeds - Any complete feed for starting, growing or finishing Broilers.
   (c) Growing Feeds - Any complete feed for growing chickens.
   (d) Laying and Hatching Feeds - Any complete feed for laying hens.
   (e) Fattening and Finishing Feeds - Any complete feed for fattening cockerels, capons or other fowl other than broilers and turkeys and excluding Scratch Grains.
   (f) Turkey Feeds - Any complete feed for starting, growing or finishing turkeys.
   (g) Other Complete Feeds - Any complete feed for pheasants, ducks or other poultry and not covered by any other classification.

11. Dog and Cat Foods:
   (b) Biscuits - Kibble and all baked products.
   (c) Meal - Pellets, cubes and other forms.

12. Scratch Grains - Any mixture of Whole or Cracked Grains only for Poultry

13. Other Animal Feeds - Such as Horse Feed, Rabbit Feed. etc.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 1 - Shipments of Prepared Stock and Poultry Feeds in Canada 1957 together with estimated comparable data for 1958. Current monthly shipments accompanied by cumulative totals for 1958 and 1959 reported in columns (3), (4), (5), and (6) respectively.

FACTORS USED IN DETERMINING QUANTITIES OF CONCENTRATES MOVING INTO SECONDARY INDUSTRY

	Shipped to or sold in									
	Newfound-land	Prince Edward Island	Nova Scotia	New Brunswick	Quebec	Ontario	Manitoba	Saskat-chewan	Alberta	British Columbia	Export
Primary or Concentrated Feeds											
1. Calf Concentrates	0	.914	.769	.538	.849	.868	.809	.750	.707	.666	0
2. Dairy and Cattle Concentrates	1.000	.592	.648	.460	.764	.415	.268	.215	.296	.041	.190
3. Swine Concentrates	.647	.598	.536	.546	.821	.480	.233	.250	.270	.280	.700
4. Poultry Concentrates											
(a) Chick Starter Concentrates	0	1.000	.750	.670	.919	.904	.725	.868	.969	1.000	1.000
(b) Broiler Concentrates	0	.607	.877	.019	.999	.968	.485	0	.861	1.000	.500
(c) Growing Concentrates	.500	.692	.674	.544	.797	.726	.217	.182	.260	.297	.712
(d) Laying and Hatching Concentrates	0	.741	.740	.581	.866	.562	.206	.089	.186	.098	.697
(e) Fattening & Finishing Concentrates	0	.882	.231	.412	.923	.673	.129	0	.338	.666	0
(f) Turkey Concentrates	0	1.000	.962	.395	.965	.887	.295	.342	.278	.361	0
(g) Other Poultry Concentrates	0	.246	.116	.596	.258	.429	.019	0	1.000	0	.333

In converting concentrates to finished feeds, the Bureau uses the above factors to establish the amounts of concentrates which moved into the secondary manufacturing industry, as such. These factors were established from the returns of all firms in the survey and reflect the weighted average above, which we use for a current 12 months reports. If you agree that changes should be made in any of these factors, you should advise us at once whether or not you think the factor is low or high.

From the above, you will notice that 86.8 per cent of the calf concentrates shipped in the province of Ontario in any month during 1954 moved into the hands of franchise operators and other manufacturers who make feeds from concentrates. The balance, or 13.2 per cent, moved out of the industry and was used by farmers and other similar consumers directly.

Factor No. 2, which will turn concentrates into finished feeds, is given on pages 4, 6 and 8 in brackets after the name of each commodity.

HOW TO USE THE CONVERSION FACTORS

You will note on page 4 that the industry reported they had shipped in the province of Quebec for January, 1959 1,688 tons of Dairy and Cattle concentrates, of which 398 tons were used or sold directly for use to the farmer and other such consumers. In other words, 1,171 tons moved into the hands of secondary manufacturers for further use in manufacturing complete feeds. In order to obtain the finished feeds resulting from the conversion of 1,290 tons of Dairy and Cattle concentrates, we make use of the conversion factor as follows:

1,290 x 6.0 = 7,740 tons of Dairy and Cattle Feeds.

Now turn to page 10 and you will see that the shipments of Dairy and Cattle Feeds in the province of Quebec in the same month amounted to 10,290 tons. The summary would appear as follows:

Total shipments = 10,290 tons

Shipments by secondary manufacturers (1) = 7,740 tons

Shipments by manufacturers (2) = 2,550 tons

In order to assess the proportion of total feed shipments, which your firm enjoys, the following instructions are important. In terms of concentrates, the concentrate manufacturer would divide the total Dairy and Cattle feeds shipped in the province of Quebec (10,290 tons) by 6.0 and add 398 tons of concentrates moving out of the industry thus:

$$\frac{10,290}{6.0} = 1,713 + 398 = 2,111 \text{ tons}$$

To the above he would relate his total shipments of Dairy and Cattle concentrates for the province of Quebec during the same period.

In terms of complete feeds, the complete feeds manufacturer (including franchise operators) would assess their share of the market by determining, in the following manner, the total supply of finished feeds:

Total commercial feeds shipped		10,290 tons (see page 10)
Estimated feeds produced from concentrates sold outside the industry from which would be	398 x 6.0 =	2,388 tons (see page 4)
Total supply of finished feeds used as finished feeds or in the form of concentrates		12,678 tons

(1) Includes franchise operators and those secondary manufacturers who use concentrates to manufacture complete feeds.

(2) Includes manufacturers who produce finished feeds directly from raw materials.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

In October, 1947 the Dominion Bureau of Statistics, in co-operation with the National Council of the Canadian Feed Manufacturers' Association, commenced a survey on a sample basis of Shipments of Prepared Stock and Poultry Feeds, showing export shipments as well as provincial destinations in Canada.

By 1950 the monthly survey on Shipments assumed real value since it formed a basis of comparing current months with corresponding months of the previous year. Because it was still difficult to estimate certain individual commodities reliably, the coverage of the survey was increased to 200 firms in 1951 and became representative of about 76% of the total volume of the industry. This series was presented on an index basis up to the end of 1953.

During 1953 the feeds industry desired volume figures which would reveal the actual disappearance into the hands of ultimate consumers. The result is the current survey which is produced from monthly returns of all primary manufacturers of concentrates together with returns of a sample survey of manufacturers who use raw ingredients in their finished feeds.

The information presented in this report has been arranged as follows:

Table 1 presents the total annual production of Primary and Secondary or complete feeds in Canada for 1957 together with an estimate of production for the calendar year 1958 and as well the production for the current month in 1958 and 1959 with cumulative totals for 1958 and 1959.

Table 2 shows the 1959 shipments of primary or concentrated feeds by principal commodities, provincial destination and export. Column (a) gives the total shipments of all concentrates while column (b) gives the shipments of concentrates moving out of the Industry in their original form. The difference between column (a) and column (b) shows the amount of primary feeds used by the secondary feed manufacturers in producing complete feeds. Factor No. 2, which will convert concentrates to feeds is included respectively in brackets after the title of each concentrate. (See pages 4, 6 and 8). How to use these factors is explained on page 21.

Table 3 shows the volume of monthly shipments of secondary or complete feeds by principal commodities, provincial destination and export. Using conversion factors provided by all firms in the primary survey, the resulting volume of feeds has been added to those totals reported by firms which manufacture finished feeds from raw materials. The volume of feeds, shown in this section, therefore, represents the estimated total feeds shipped by all types of manufacturers including franchise operators and independent manufacturers who purchase concentrates from primary manufacturers. Factor No. 1, which will show the proportion of concentrates moving out of the Industry is shown on page 20.

Table 4 presents the volume of shipments by manufacturers of other types of stock feeds by principal commodities, provincial destination and export. In this section specialized feeds such as dog and cat foods, mineral mixtures, etc., are the result of 100% survey of the producing industry. Other commodities are estimated on a sample basis.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

CLASSIFICATION OF FEEDS

A complete feed is a formulated feed to be fed as is, and may be in the form of mash, pellets, crumbles, cubes, etc. For your assistance in classifying these commodities, the following explanation is offered:

1. Calf concentrates - Any concentrate or making a complete Calf Feed.

2. Dairy and Cattle concentrates - Any concentrate 24% protein or higher for Cattle or Dairy Cows.

3. Swine concentrates - Any concentrate 35% protein or higher for swine.

4. Poultry Concentrates:
   (a) Chick Starter Concentrates - Any concentrate for making a complete Chick Starter.
   (b) Broiler Concentrates - Any concentrate for making a complete Broiler Feed.
   (c) Growing Concentrates - Any concentrate for making a complete feed for growing chickens.
   (d) Laying and Hatching Concentrates - Any concentrate for making a complete feed for laying hens.
   (e) Fattening and Finishing Concentrates - Any concentrate for making a complete fattening feed for fowl other than Broilers or Turkeys.
   (f) Turkey Concentrates - Any concentrate for making a complete turkey feed.
   (g) Other Concentrates - Any concentrate for Poultry not covered by any other classification.

5. Calf feeds - Any complete feed for calves up to 5 months of age.

6. Dairy and Cattle Feeds - Any complete feed under 24% protein for Cattle or Dairy Cows but excluding Calf Feeds.

7. Swine Feeds - Any complete swine feed under 35% protein.

8. Poultry Feeds:
   (a) Chick Starter Feeds - Any complete feed for starting chickens other than Broilers.
   (b) Broilers Feeds - Any complete feed for starting, growing or finishing Broilers.
   (c) Growing Feeds - Any complete feed for growing chickens.
   (d) Laying and Hatching Feeds - Any complete feed for laying hens.
   (e) Fattening and Finishing Feeds - Any complete feed for fattening cockerels, capons or other fowl other than broilers and turkeys and excluding Scratch Grains.
   (f) Turkey Feeds - Any complete feed for starting, growing or finishing turkeys.
   (g) Other Complete Feeds - Any complete feed for pheasants, ducks or other poultry and not covered by any other classification.

11. Dog and Cat Foods:
   (b) Biscuits - Kibble and all baked products.
   (c) Meal - Pellets, cubes and other forms.

12. Scratch Grains - Any mixture of Whole or Cracked Grains only for Poultry

13. Other Animal Feeds - Such as Horse Feed, Rabbit Feed. etc.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Table 1 - Shipments of Prepared Stock and Poultry Feeds in Canada 1957 together with estimated comparable data for 1958. Current monthly shipments accompanied by cumulative totals for 1958 and 1959 reported in columns (3), (4), (5), and (6) respectively.

(e) Fattening & Finishing Concentrates	0	.882	.231	.412	.923	.673	.129	0	.338	.666	0
(f) Turkey Concentrates	0	1.000	.962	.395	.965	.887	.295	.342	.278	.361	0
(g) Other Poultry Concentrates	0	.246	.116	.596	.258	.429	.019	0	1.000	0	.333

In converting concentrates to finished feeds, the Bureau uses the above factors to establish the amounts of concentrates which moved into the secondary manufacturing industry, as such. These factors were established from the returns of all firms in the survey and reflect the weighted average above, which we use for a current 12 months reports. If you agree that changes should be made in any of these factors, you should advise us at once whether or not you think the factor is low or high.

From the above, you will notice that 86.8 per cent of the calf concentrates shipped in the province of Ontario in any month during 1954 moved into the hands of franchise operators and other manufacturers who make feeds from concentrates. The balance, or 13.2 per cent, moved out of the industry and was used by farmers and other similar consumers directly.

Factor No. 2, which will turn concentrates into finished feeds, is given on pages 4, 6 and 8 in brackets after the name of each commodity.

HOW TO USE THE CONVERSION FACTORS

You will note on page 4 that the industry reported they had shipped in the province of Quebec for January, 1959 1,688 tons of Dairy and Cattle concentrates, of which 398 tons were used or sold directly for use to the farmer and other such consumers. In other words, 1,171 tons moved into the hands of secondary manufacturers for further use in manufacturing complete feeds. In order to obtain the finished feeds resulting from the conversion of 1,290 tons of Dairy and Cattle concentrates, we make use of the conversion factor as follows:

1,290 x 6.0 = 7,740 tons of Dairy and Cattle Feeds.

Now turn to page 10 and you will see that the shipments of Dairy and Cattle Feeds in the province of Quebec in the same month amounted to 10,290 tons. The summary would appear as follows:

Total shipments = 10,290 tons

Shipments by secondary manufacturers (1) = 7,740 tons

Shipments by manufacturers (2) = 2,550 tons

In order to assess the proportion of total feed shipments, which your firm enjoys, the following instructions are important. In terms of concentrates, the concentrate manufacturer would divide the total Dairy and Cattle feeds shipped in the province of Quebec (10,290 tons) by 6.0 and add 398 tons of concentrates moving out of the industry thus:

$$\frac{10,290}{6.0} = 1,713 + 398 = 2,111 \text{ tons}$$

To the above he would relate his total shipments of Dairy and Cattle concentrates for the province of Quebec during the same period.

In terms of complete feeds, the complete feeds manufacturer (including franchise operators) would assess their share of the market by determining, in the following manner, the total supply of finished feeds:

Total commercial feeds shipped		10,290 tons (see page 10)
Estimated feeds produced from concentrates sold outside the industry from which would be	398 x 6.0 =	2,388 tons (see page 4)
Total supply of finished feeds used as finished feeds or in the form of concentrates		12,678 tons

(1) Includes franchise operators and those secondary manufacturers who use concentrates to manufacture complete feeds.

(2) Includes manufacturers who produce finished feeds directly from raw materials.
